EduPilot

PRODUCT GUIDE

The complete college management system

For Engineering and Diploma colleges. Every feature, every screen and every workflow, from admission to placement.

OCTOBER 2026

CONTENTS

What is in this guide

1 Getting started 5

- Signing in
- The layout of every screen
- Search and notifications

2 Dashboards for each role 9

- Principal / Administrator dashboard
- Head of Department dashboard
- Faculty dashboard
- Student dashboard
- Parent dashboard
- Accounts dashboard
- Office staff dashboard

3 People 17

- Student directory
- Student profile
- New admission and bulk import
- ID card
- Faculty
- Admissions pipeline
- Staff attendance and leave
- Appraisal records and class swaps
- Payroll
- Alumni
- Parent contact log

4 Academic set-up 29

- Departments and programmes
- Batches, sections and terms
- Promoting a batch
- Curriculum and course allocation
- Timetable
- Academic calendar

5 Daily teaching 36

- Taking attendance
- Shortage report and substitute classes
- Student leave and on-duty
- Study material and assignments
- Syllabus coverage

6 Examinations and results 42

- Marks entry
- Exam schedule, seating and invigilation
- Hall tickets
- Results and grade cards
- Revaluation and grace marks
- Supplementary exams and electives
- Outcome attainment (CO-PO)
- Course feedback

7 Fees and finance 51

- Fee structures and invoices
- Invoice, instalments and late fines
- Day book and receipts
- Online fee payment
- Scholarships and reimbursements
- Refunds and day closing
- Fee statement and no-dues certificate

8 Campus and student services 59

- Placement drives
- Placements for students
- Library
- Hostel
- Transport
- Inventory
- Gate and visitors
- Certificates
- Helpdesk
- Notices and the notification centre

9 Reports and administration 70

- Report builder
- Accreditation data and scheduled reports
- College setup
- Academic rules
- Users and access
- Branding and settings
- System health
- Email outbox and audit log
- My profile

10 On a phone 80

11 End-to-end workflows 81

- Admission to first day
- A teaching day
- The examination cycle
- The fee cycle
- A placement drive
- A certificate request
- End of semester

12 Security, going live and scope 86

OVERVIEW

What EduPilot is

One web application that runs the academic, administrative and financial work of an Engineering or Diploma college, for everyone from the principal to the parent.

7
roles, each with its own dashboard

66
feature areas described in this guide

7
end-to-end workflows

3
interface languages: English, Hindi, Telugu

Academic

Departments, programmes, batches, curriculum with L-T-P and credits, timetable, attendance with the 75% rule, marks, results with SGPA and CGPA, outcome attainment.

Administrative

Admissions pipeline, student and staff records, leave, certificates, ID cards, hall tickets, library, hostel, transport, helpdesk, notices.

Financial

Fee structures, invoices, instalments, late fines, counter and online collection, receipts, day book, scholarships.

Outcomes

Placement drives with automatic eligibility, alumni records, a report builder, accreditation data sheets and scheduled email reports.

> Built for Indian Engineering (B.Tech, M.Tech) and Diploma (Polytechnic) colleges: semesters, lateral entry, internal and end-semester marks, condonation, backlogs and supplementary exams are part of the design.

OVERVIEW

Who uses it

Each person sees only the menu items, records and actions their role allows. The coloured tags below are used throughout this guide.

Admin	**Administrator / Principal**	Everything: set-up, people, academics, exams, fees, placements, reports and settings.
HOD	**Head of Department**	Own department: students, faculty, curriculum, course allocation, timetable, approvals and results.
Faculty	**Faculty**	Own courses: attendance, marks, study material, syllabus coverage, timetable, leave and class swaps.
Accounts	**Accounts officer**	Fee structures, invoices, collection, refunds, receipts, day book and closing, scholarships and financial reports.
Office	**Office staff**	Front desk: enquiries and admissions, student records, certificates, ID cards, helpdesk, library, hostel and transport. No marks, money or settings.
Student	**Student**	Own attendance, timetable, results, fees and online payment, placements, leave, certificates, helpdesk and ID card.
Parent	**Parent**	Read-only view of their child's attendance, results, fees and timetable, with online fee payment.
System	**EduPilot itself**	Steps the system carries out automatically, such as calculating grades, checking eligibility and sending notifications.

SECTION 1

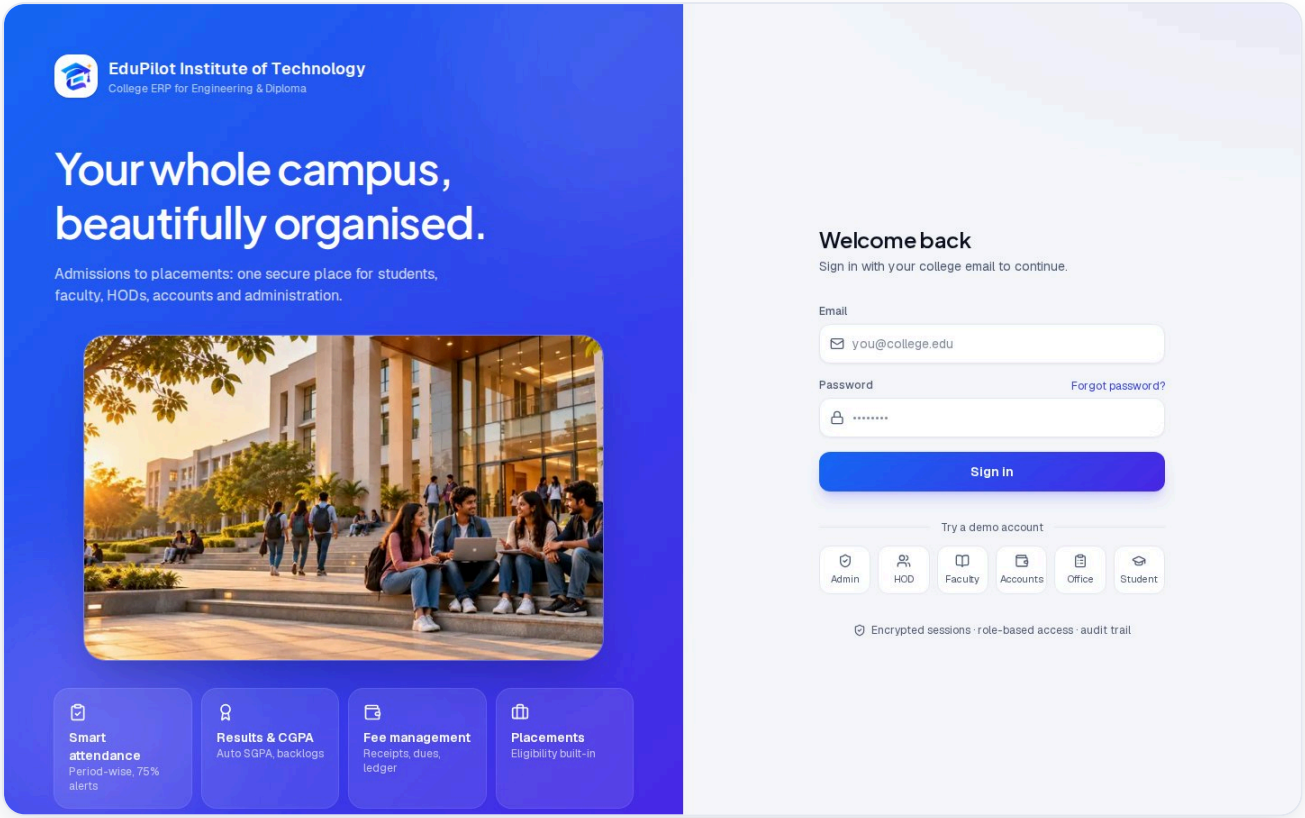

Getting started

Signing in, finding your way around, and the tools that are on every screen.

- Signing in
- The layout of every screen
- Search and notifications

Signing in

One address for the whole college. Each person signs in with their college email and sees only what their role allows.

HOW IT WORKS

1. Open the college's EduPilot address
2. Enter college email and password
3. Change the temporary password (first time only)
4. Land on your own dashboard

WHAT IT DOES

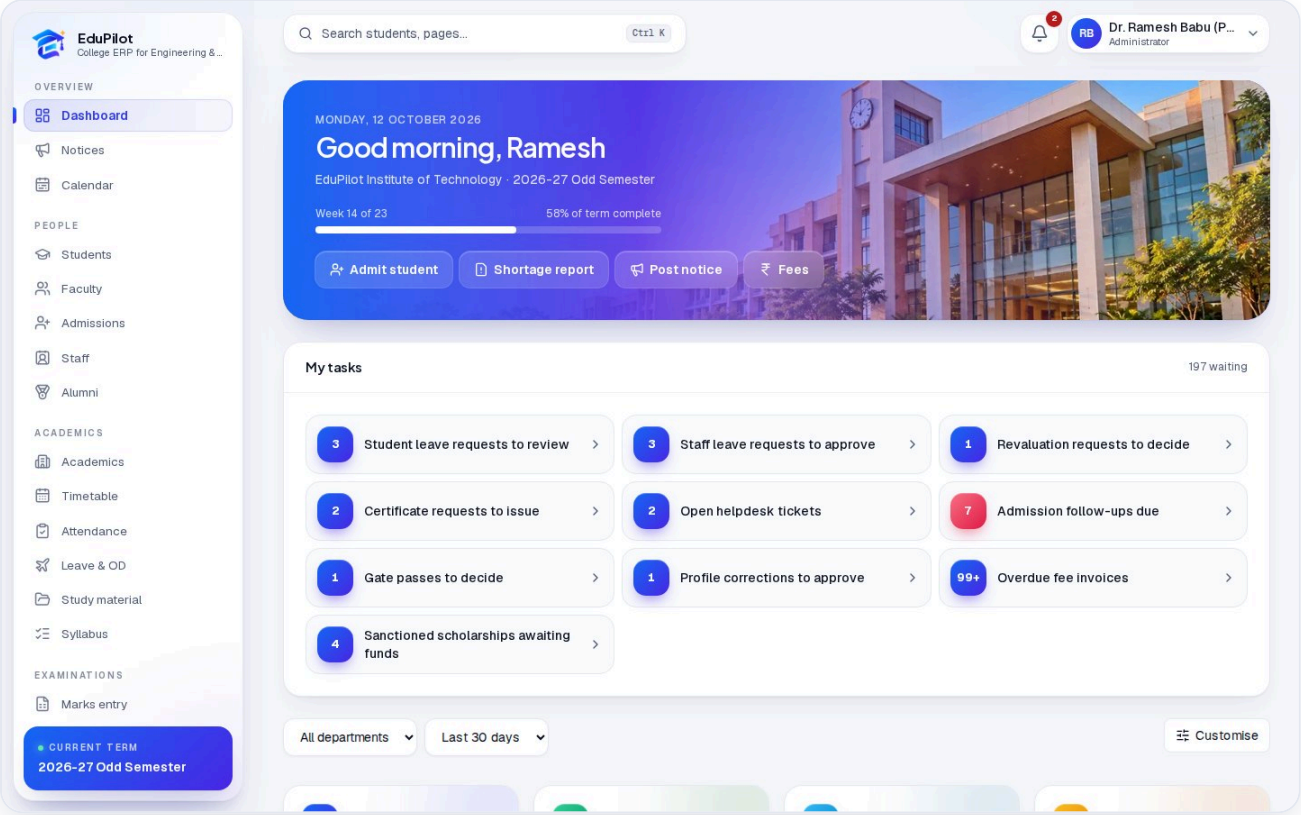

- Seven roles: Administrator / Principal, Head of Department, Faculty, Accounts officer, Office staff, Student and Parent.
- New students start with their roll number as the password, and new staff with their employee ID. Both must choose a new password at first sign-in.
- Forgot password sends a single-use link by email, valid for 30 minutes.
- An account locks for 15 minutes after 5 wrong passwords.
- Staff can turn on two-step sign-in: after the password, a six-digit code is emailed and must be entered.
- The college name, logo and photo on this page come from Branding & settings.

WHO USES IT

Admin · HOD · Faculty · Accounts · Office · Student · Parent

The layout of every screen

The same three parts everywhere: the menu on the left, search and your account at the top, and the work area in the middle.

HOW IT WORKS

1. Read My tasks
2. Click a task
3. Finish it on that page
4. The task disappears from the list

WHAT IT DOES

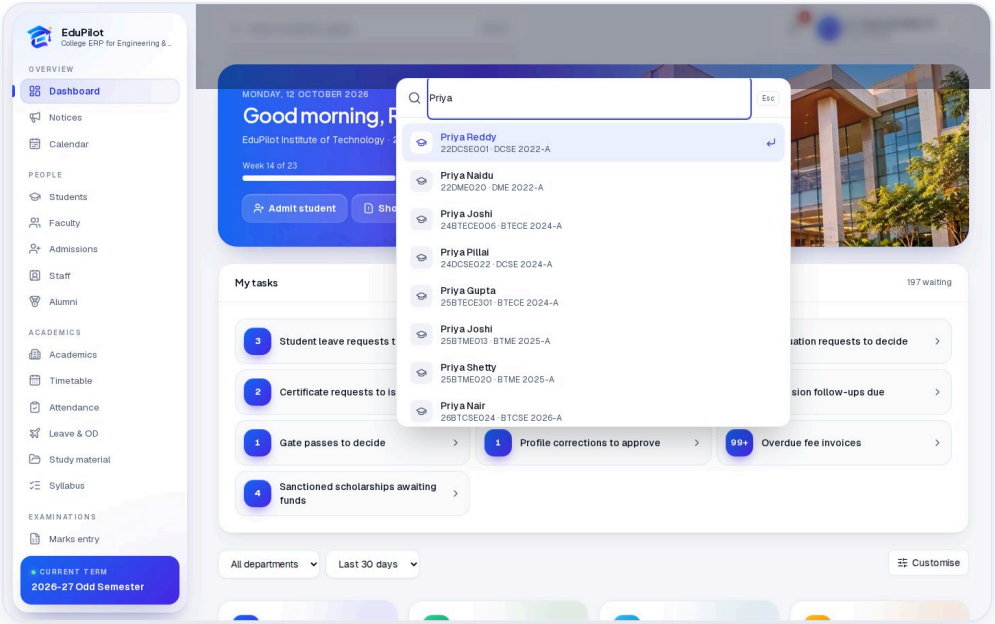

- Menu: grouped by area (People, Academics, Examinations, Campus, Services, System). It shows only the items your role can use.
- Greeting banner: today's date, the current term and how far through the term you are, with shortcut buttons for the most common jobs.
- My tasks: everything waiting on you right now, each one a link to where it gets done. Urgent items are shown in red.
- Current term card at the bottom of the menu, so nobody works in the wrong semester.
- A short guided tour runs the first time each person signs in, and can be replayed from My Profile.

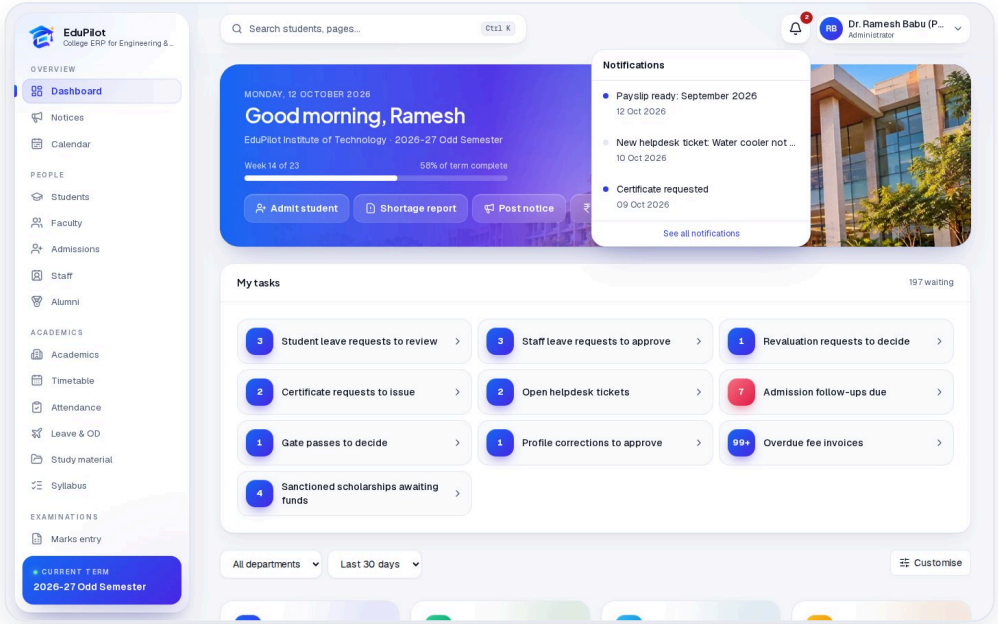

WHO USES IT

Admin · HOD · Faculty · Accounts · Office · Student · Parent

Search and notifications

Find any student or page in two keystrokes, and never miss an approval, result or payment.

WHAT IT DOES

- Press Ctrl + K (or click the search box) to jump to any page or find a student by name or roll number.
- The bell holds a personal inbox: approvals, results published, fee updates, helpdesk replies and absences.
- Opening a notification marks it read and takes you straight to the page it is about.
- Account menu: language (English, Hindi or Telugu for the menu and common labels), text size, keyboard shortcuts, profile and sign out.

WHO USES IT

Admin · HOD · Faculty · Accounts · Office · Student · Parent

SECTION 2

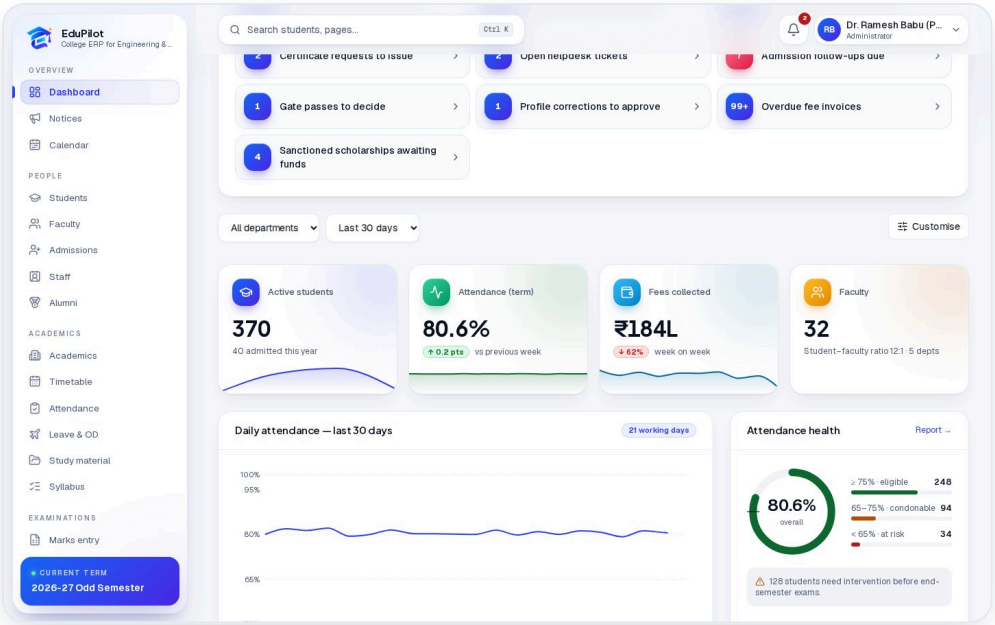

Dashboards for each role

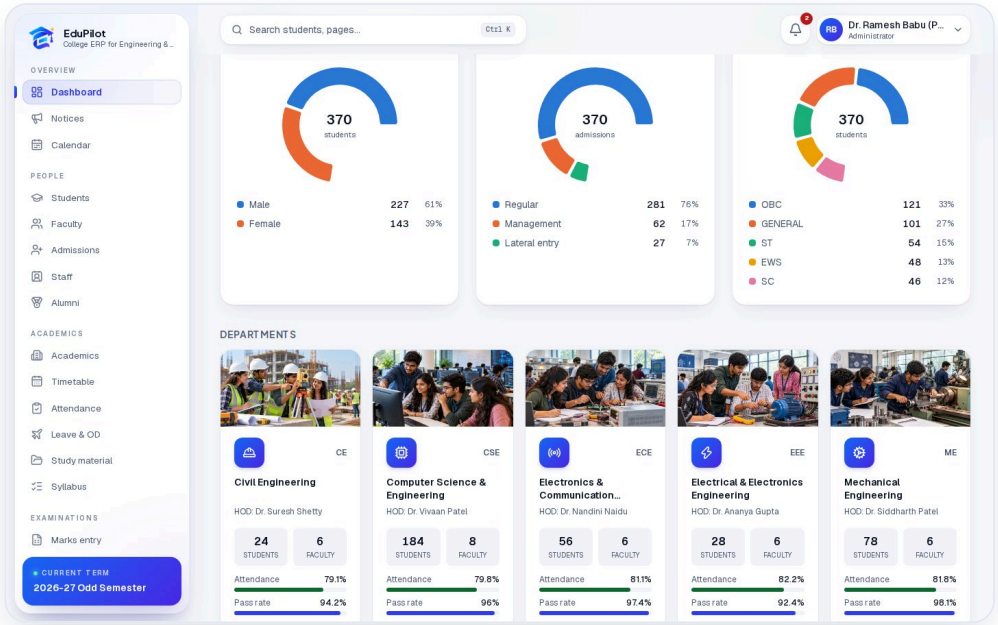

Every role opens on a page built for its own daily work.

- Principal / Administrator dashboard
- Head of Department dashboard
- Faculty dashboard
- Student dashboard
- Parent dashboard
- Accounts dashboard
- Office staff dashboard

Principal / Administrator dashboard

The health of the whole institution on one page, with every number linking to the list behind it.

WHAT IT DOES

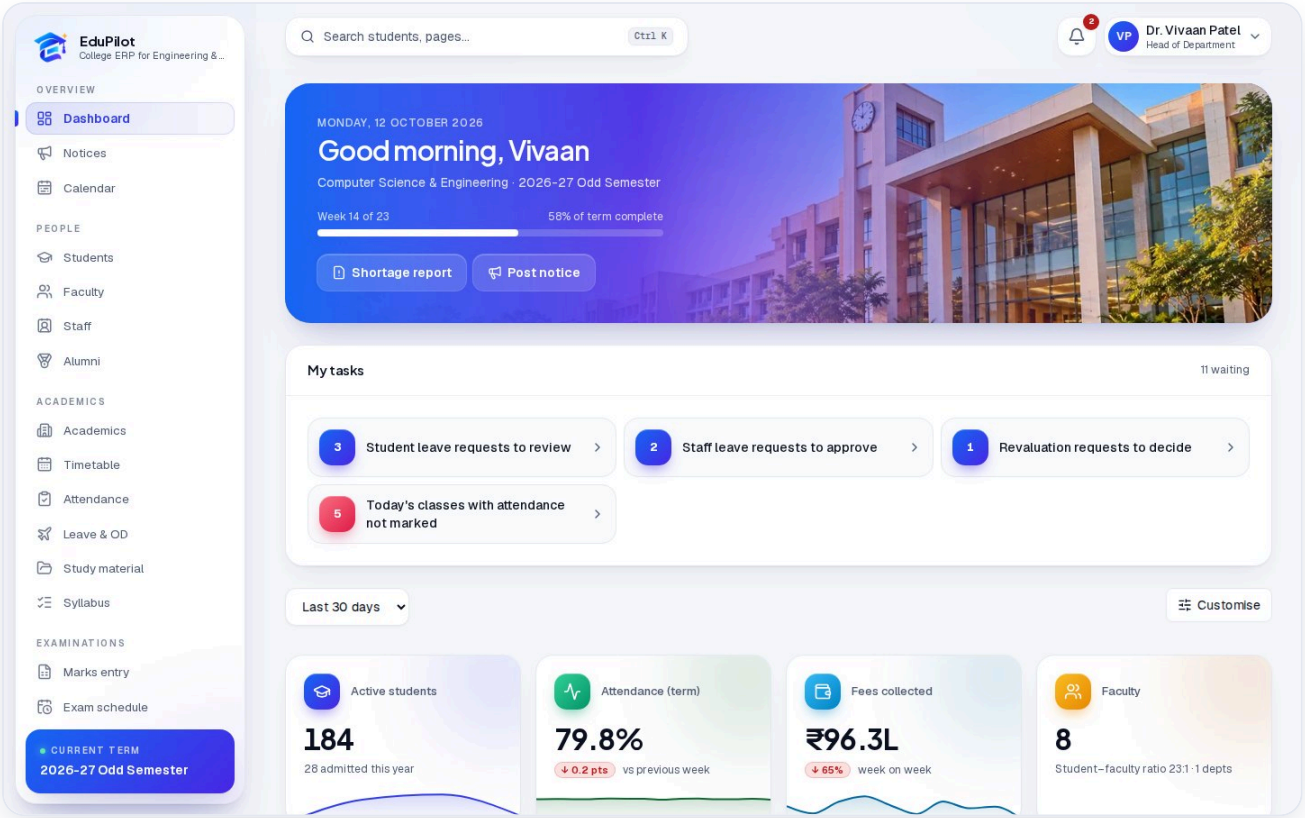

- Headline tiles: active students, term attendance, fees collected and faculty strength, each with its trend.
- Daily attendance chart for the last 30, 60 or 90 days, and an attendance-health gauge showing how many students are eligible, condonable or at risk.
- Student demographics: gender, admission route and reservation category.
- Department cards with strength, attendance and pass rate. Click one to open its students.
- Filter by department, and use Customise to choose which sections appear.
- Charts expand to full screen and download as images for presentations.
- The banner and task list appear at once; the figures follow as they are worked out.

WHO USES IT

Admin

Head of Department dashboard

The same picture as the principal's, limited to the HOD's own department.

WHAT IT DOES

- Students, attendance, fee collection and faculty numbers for the department only.
- Tasks: student leave to review, staff leave to approve, today's classes with attendance not marked, courses without a teacher.
- An HOD manages the department's students, faculty, curriculum, course allocation and results, and cannot see other departments.

WHO USES IT

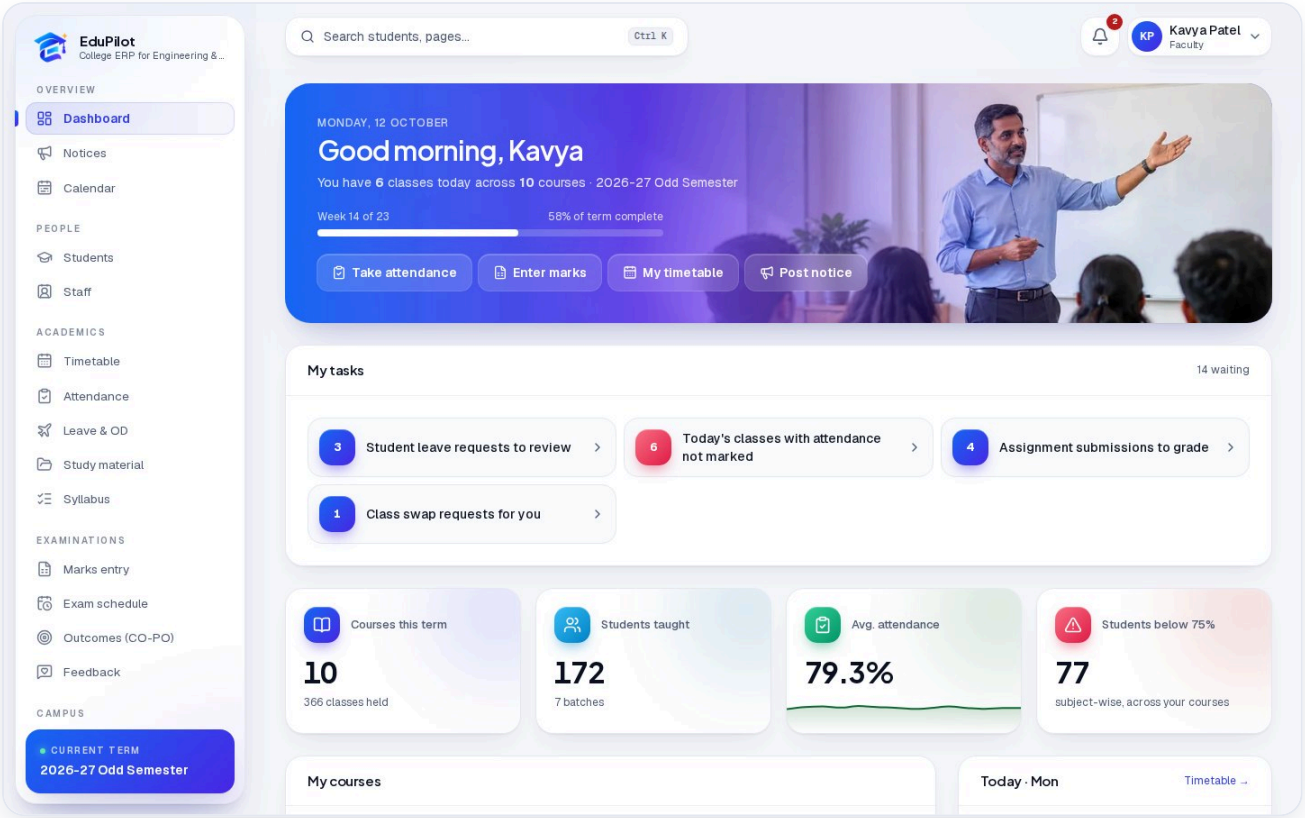

HOD

HOW IT WORKS

1. Review leave requests
2. Check unmarked classes
3. Assign substitutes
4. Watch attendance and results

Faculty dashboard

Today's classes and everything a teacher owes, on one page.

HOW IT WORKS

1. Open today's class
2. Mark attendance
3. Enter marks when due
4. Grade submitted assignments

WHAT IT DOES

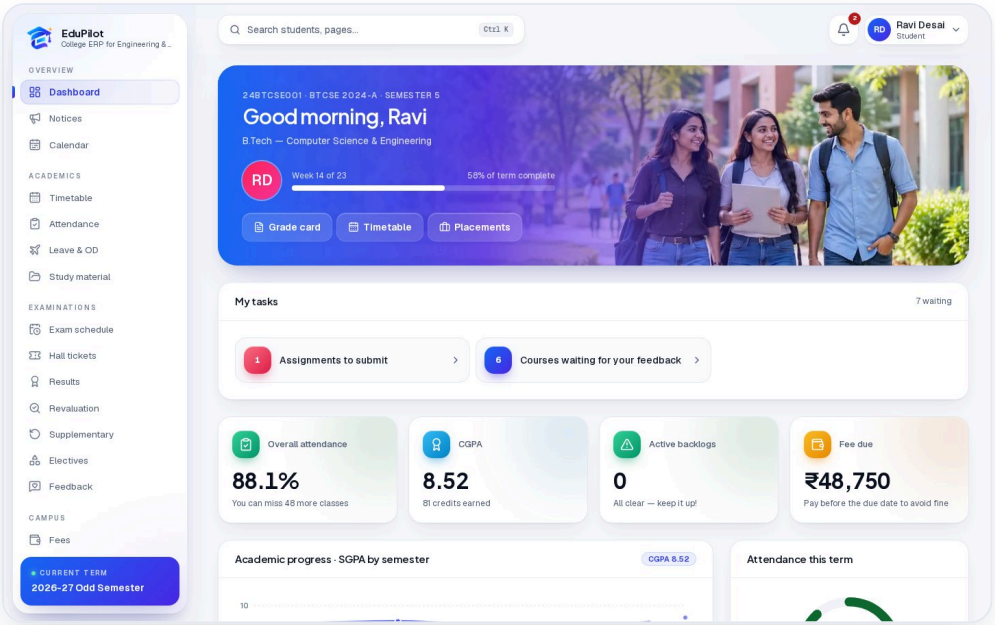

- Shortcut buttons: Take attendance, Enter marks, My timetable, Post notice.
- Tiles: courses this term, students taught, average attendance, and students below 75% in the teacher's subjects.
- My courses and today's timetable, with one click to the attendance sheet for each class.
- Tasks: leave requests to review, classes not yet marked, assignments to grade, swap requests from colleagues.

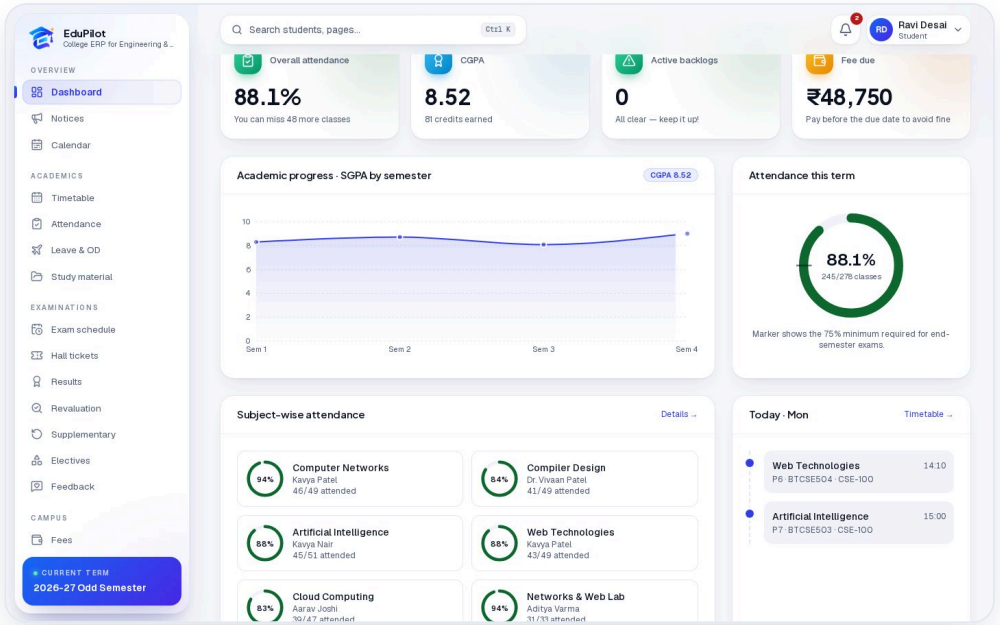

WHO USES IT

Faculty

Student dashboard

Attendance, results, fees and today's classes, the moment a student signs in.

WHAT IT DOES

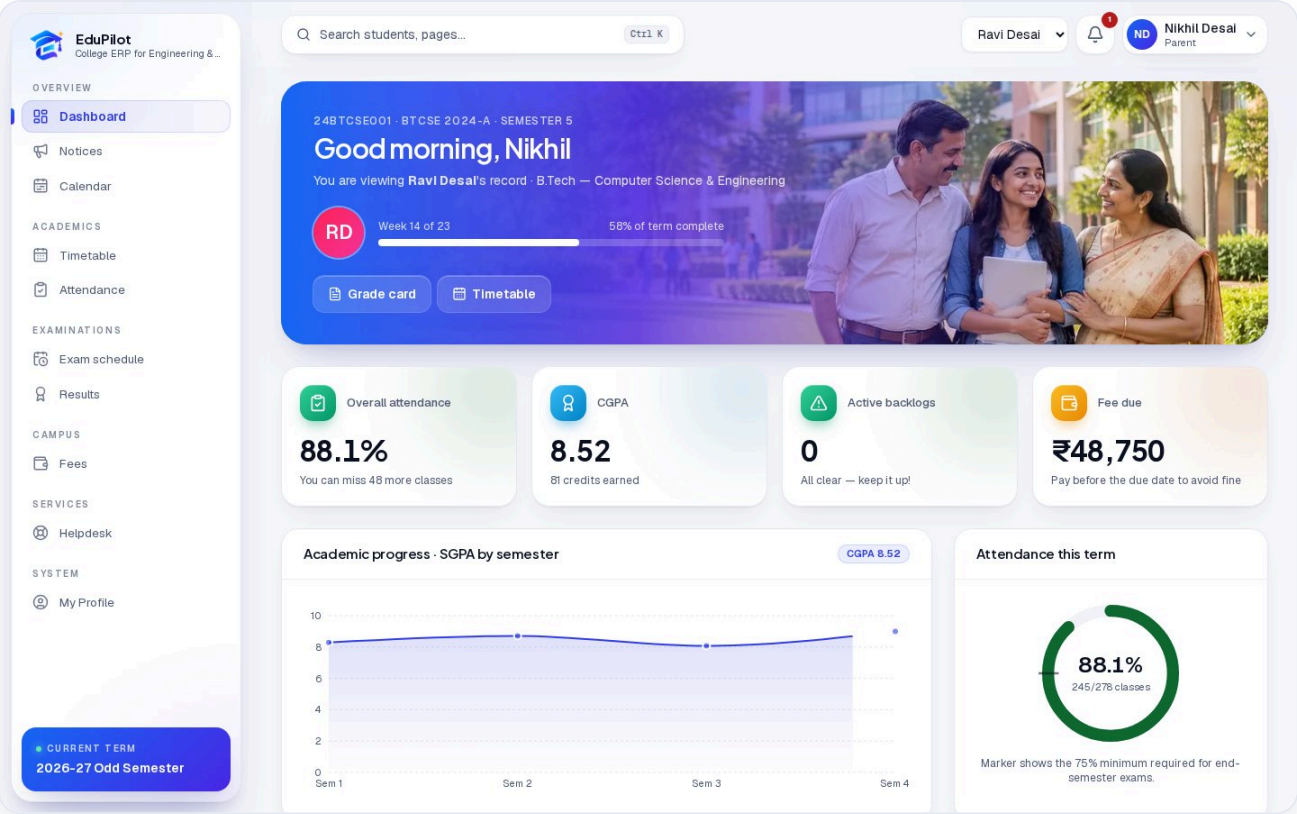

- Tiles: overall attendance with how many more classes can be missed, CGPA and credits earned, active backlogs, and fee due.
- SGPA trend across semesters and an attendance gauge against the 75% line.
- Subject-wise attendance rings and today's classes with room and time.
- Tasks: assignments to submit, courses waiting for feedback, overdue fees.

WHO USES IT

Student

Parent dashboard

A read-only window into the child's attendance, results, fees and timetable.

HOW IT WORKS

1. Office creates the parent login
2. Parent signs in
3. Views attendance and results
4. Pays fees online

WHAT IT DOES

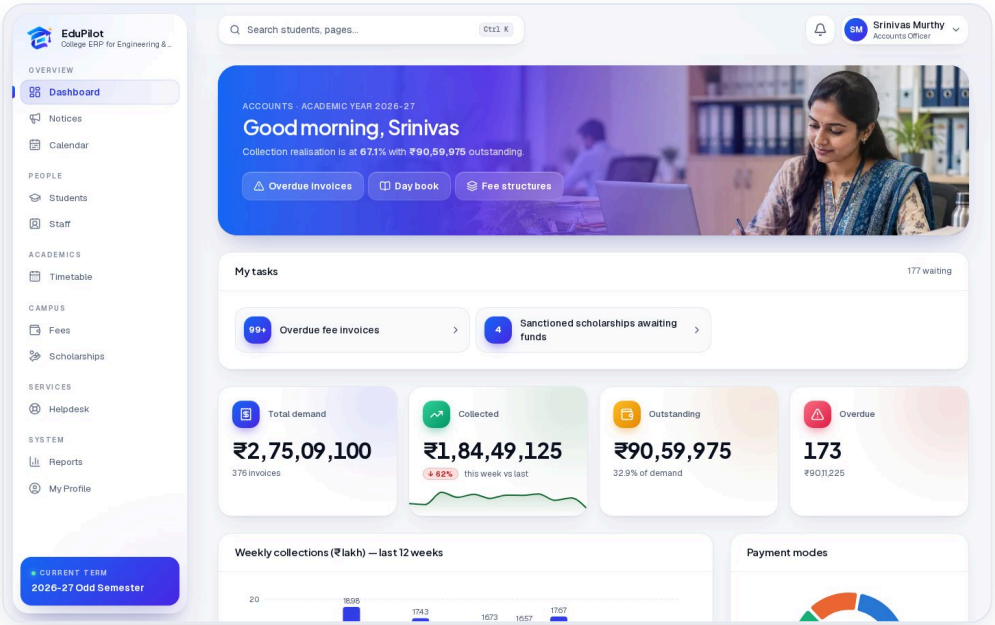

- The parent login is created from the student's record by the office.
- Shows the same attendance, CGPA, backlog and fee tiles the student sees.
- A parent with more than one child in the college switches between them from the top bar.
- Parents can pay fees online and download receipts, and cannot change any academic record.

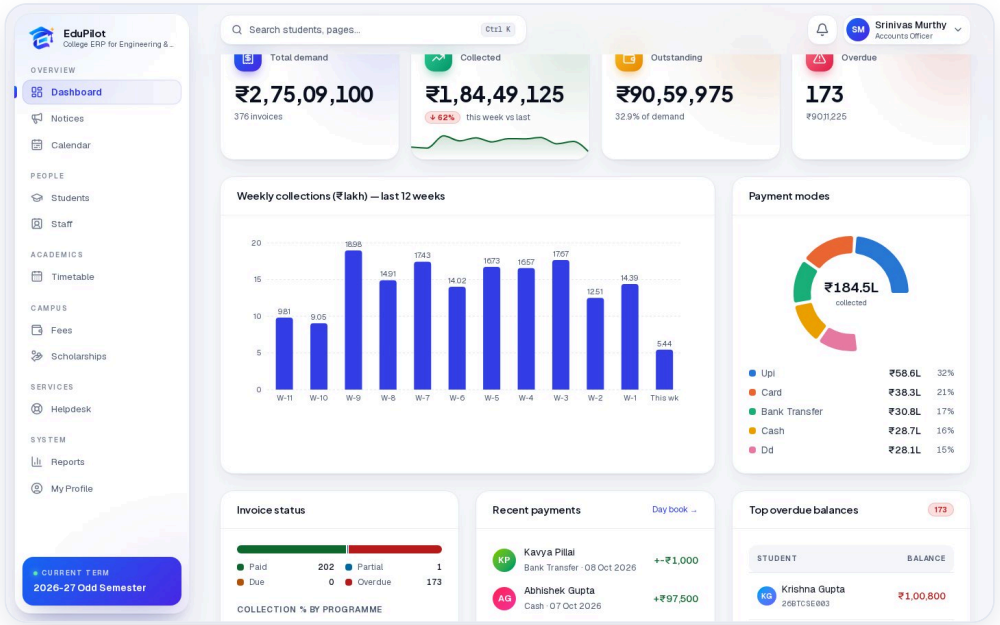

WHO USES IT

Parent

Accounts dashboard

Demand, collection and dues for the academic year.

WHAT IT DOES

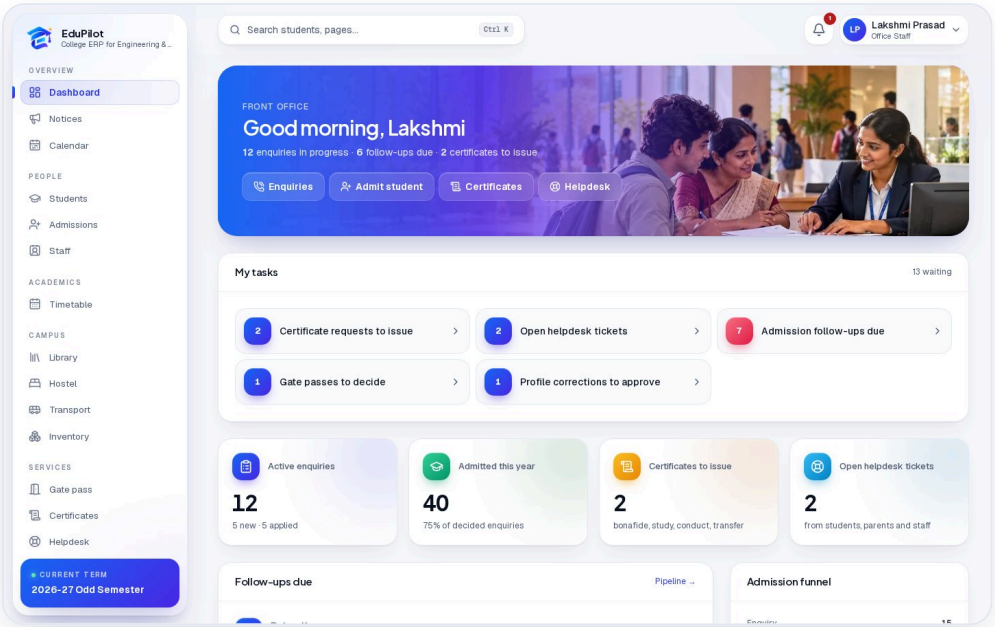

- Tiles: total demand, collected (with week-on-week change), outstanding, and number of overdue invoices.
- Weekly collections for the last 12 weeks and a split by payment mode (cash, UPI, card, bank transfer, DD).
- Invoice status bar, recent payments, and the students with the largest overdue balances.
- Shortcut buttons to overdue invoices, the day book and fee structures.

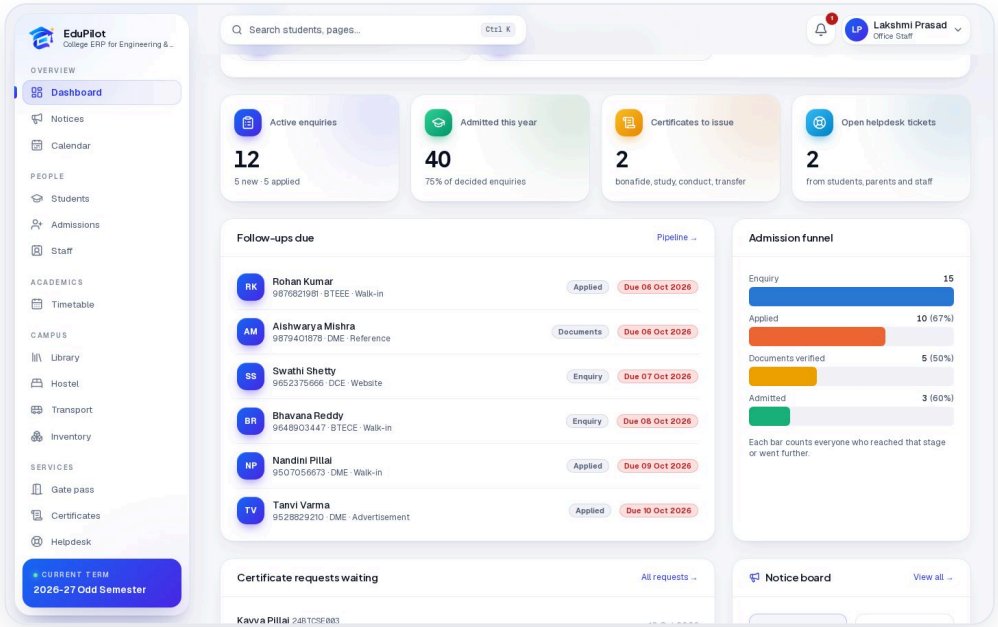

WHO USES IT

Accounts · Admin

Office staff dashboard

The front desk's own page: enquiries, admissions, certificates and helpdesk, with no access to marks, money or settings.

WHAT IT DOES

- Shortcut buttons to enquiries, new admission, certificates and helpdesk.
- Tiles: active enquiries, students admitted this year, certificates to issue and open helpdesk tickets.
- Follow-ups due today or overdue, each with the applicant's phone, programme and stage.
- An admission funnel and the certificate requests that are waiting.
- Office staff manage student records, admissions, certificates, library, hostel and transport. They cannot open fees, marks, results, reports or administration.

WHO USES IT

Office

HOW IT WORKS

1. Call the follow-ups that are due
2. Move enquiries forward
3. Admit and create the student
4. Issue certificates

SECTION 3

People

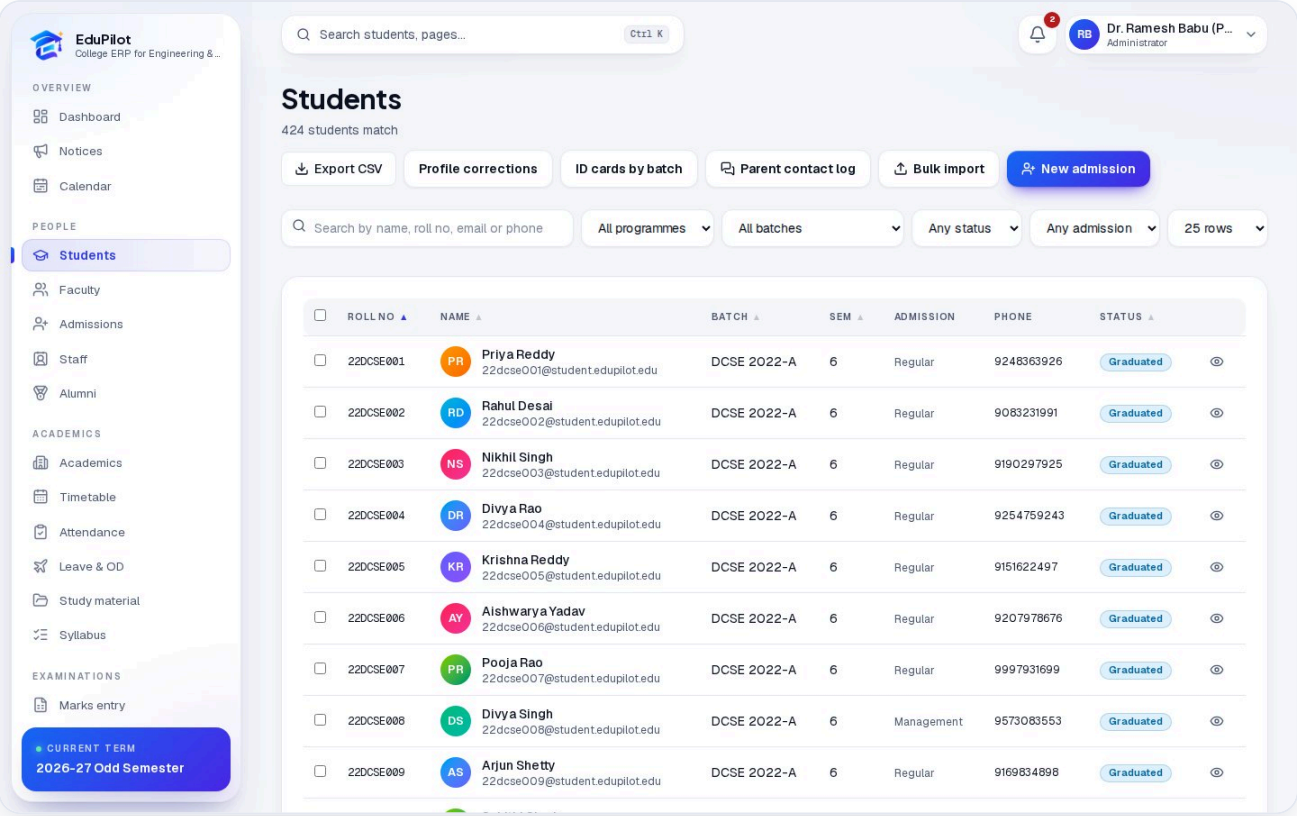

Students, faculty, admissions, staff and alumni.

- Student directory
- Student profile
- New admission and bulk import
- ID card
- Faculty
- Admissions pipeline
- Staff attendance and leave
- Appraisal records and class swaps
- Payroll
- Alumni
- Parent contact log

PEOPLE · 3.1

Student directory

Every student in the college, searchable and filterable, with bulk actions.

HOW IT WORKS

1. Search or filter
2. Open a student, or tick several
3. Apply a bulk action or export

WHAT IT DOES

- Search by name, roll number, email or phone. Filter by programme, batch, status and admission type.
- Sort by any column, choose rows per page, and save a set of filters for reuse.
- Select several students to change status or batch together, or export only the selected rows.
- Status values: active, detained, suspended, dropped and graduated.
- Export the list to CSV for Excel at any time.

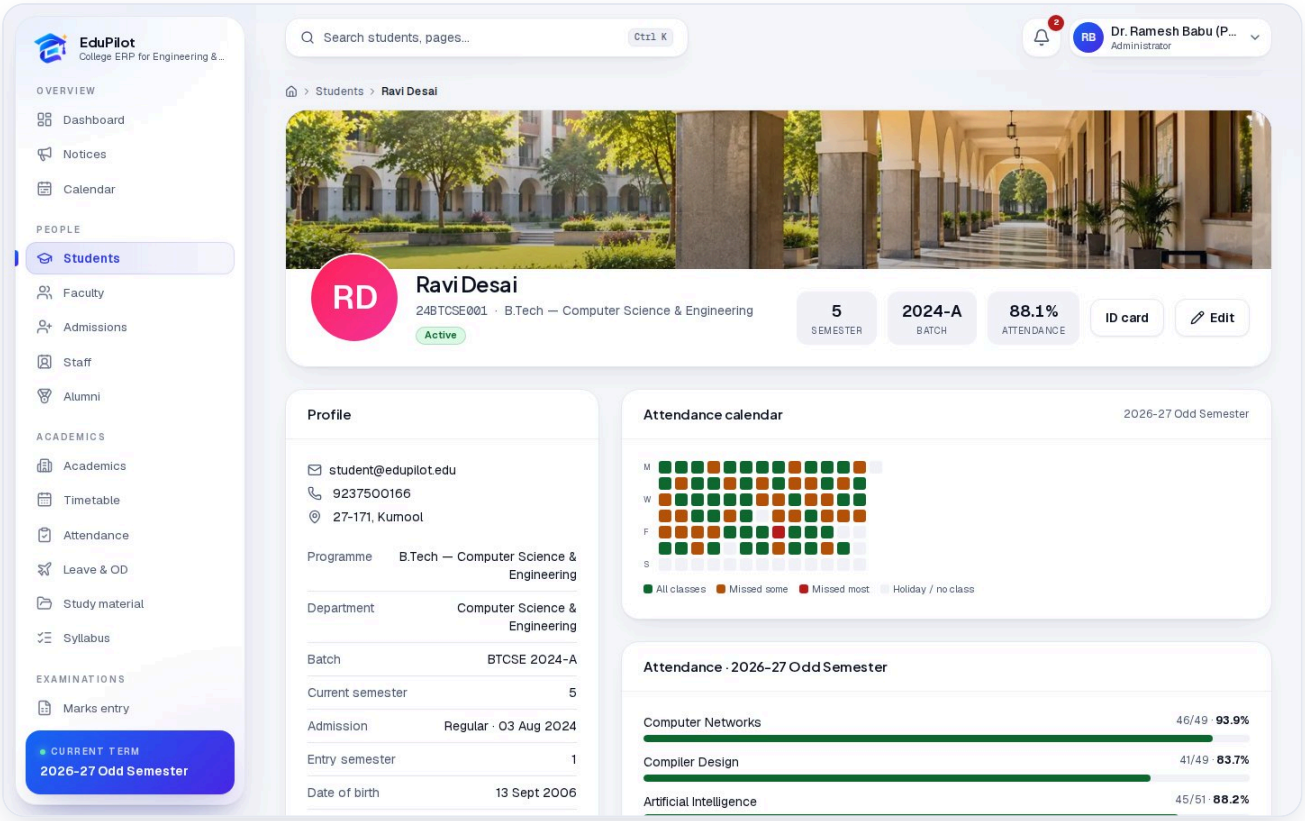

WHO USES IT

Admin · Office · HOD · Faculty

PEOPLE · 3.2

Student profile

One page with everything about a student: personal details, attendance, results, fees and placement.

WHAT IT DOES

- Header with semester, batch and attendance at a glance.
- Attendance calendar (heat-map) for the term and subject-wise percentages.
- Fee invoices and payments, semester results with SGPA and CGPA, and placement history.
- Contact details can be edited in place. Create the parent login from here.
- Buttons for the ID card and a printable one-page summary.
- Students and parents can ask for a contact detail to be corrected from their own profile; it changes only when the office approves.

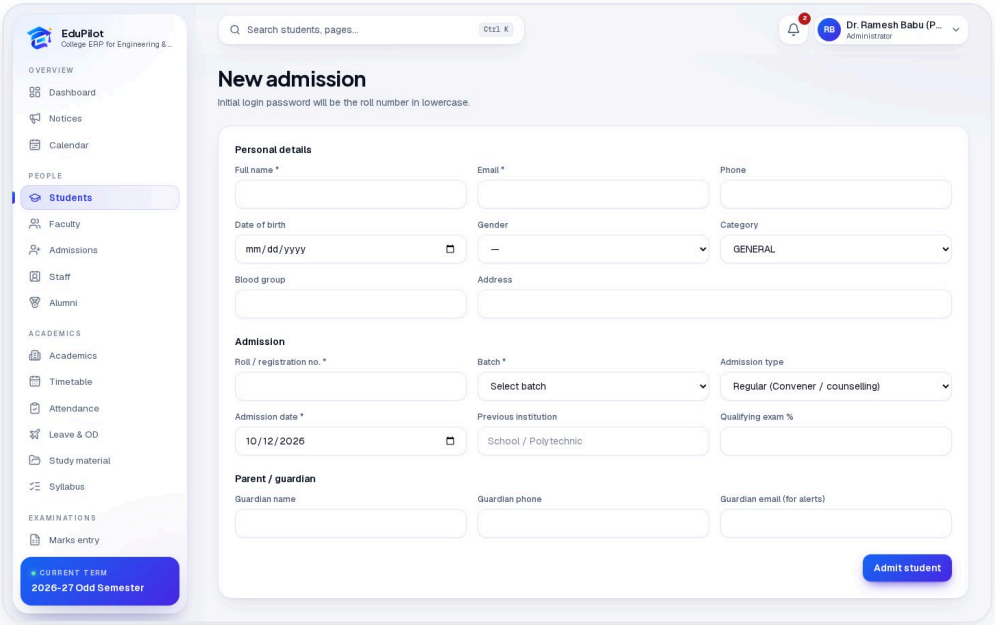

WHO USES IT

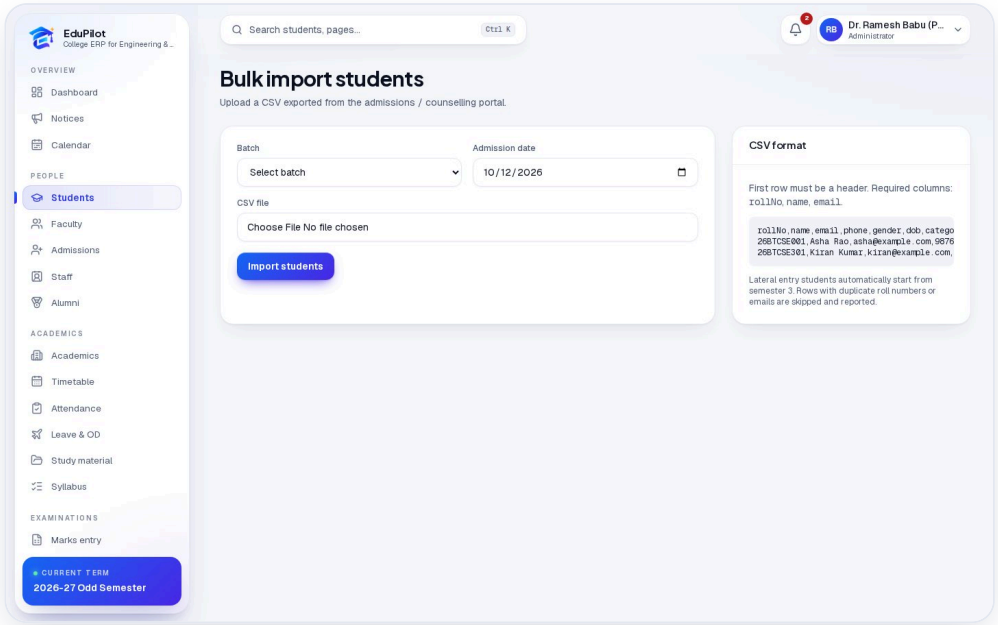

Admin · Office · HOD · Faculty

PEOPLE · 3.3

New admission and bulk import

Admit one student with a form, or a whole batch from a spreadsheet.

WHAT IT DOES

- The admission form covers personal details, batch, admission type, previous institution and guardian contact.
- Lateral entry (Diploma to B.Tech second year) starts the student in semester 3 automatically.
- Bulk import reads a CSV exported from the admissions or counselling portal. Duplicate roll numbers and emails are skipped and reported.
- A login is created for every student at the same time.

WHO USES IT

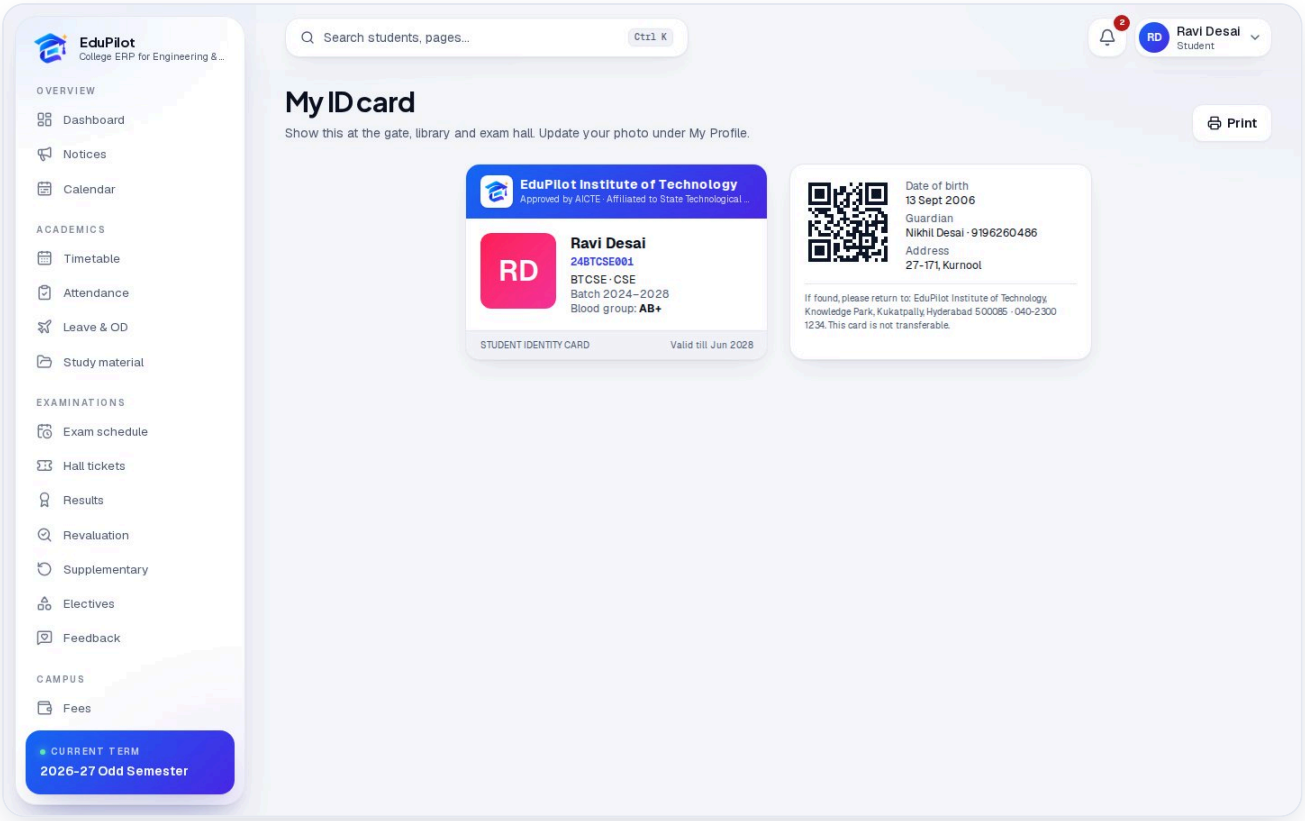

Admin · Office

HOW IT WORKS

1. Fill the form or upload the CSV
2. EduPilot creates the student and the login
3. Student signs in with the roll number
4. Student sets a new password

ID card

A printable identity card, front and back, generated from the student's record.

WHAT IT DOES

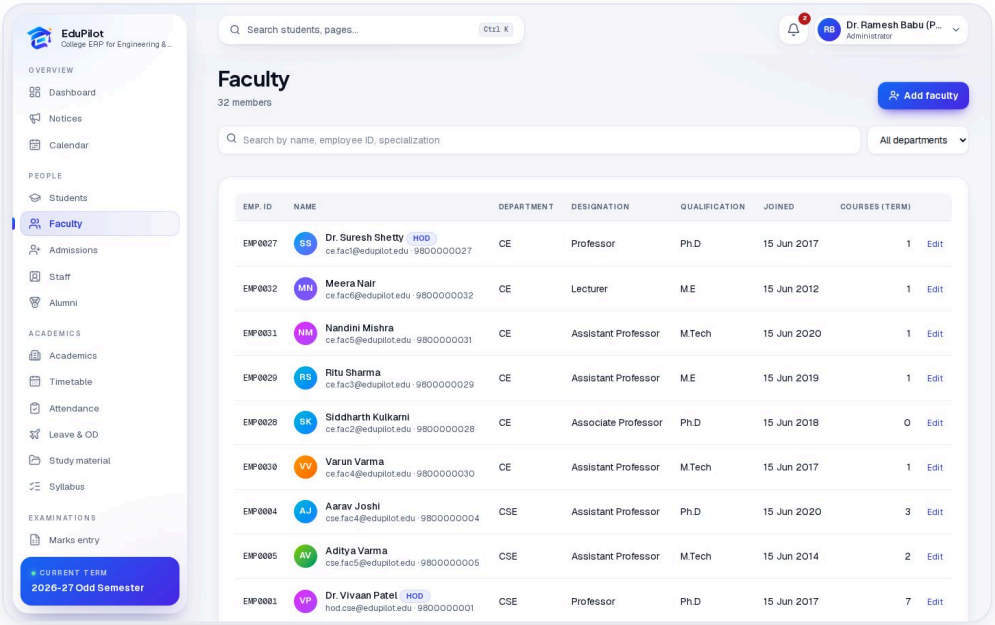

- Shows photo, name, roll number, programme, batch, blood group, guardian contact and address.
- Carries a QR code and the college name and logo from Branding & settings.
- Students see their own card under ID card; the office can open any student's card from the profile.
- ID cards for a whole batch print from one page.

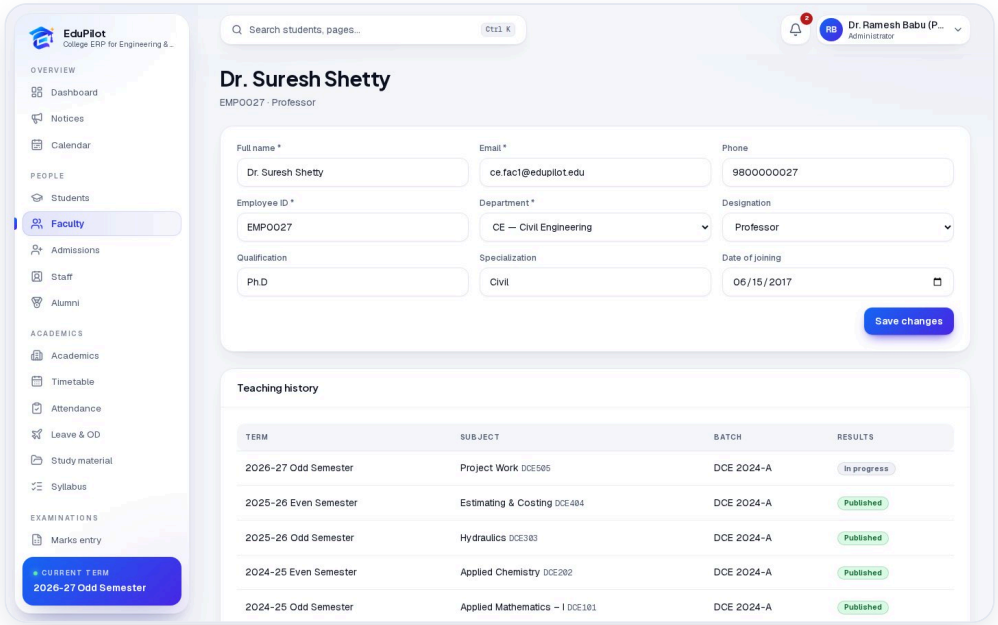

WHO USES IT

Admin · Office · Student

Faculty

Staff profiles with designation, qualification, department and teaching history.

WHAT IT DOES

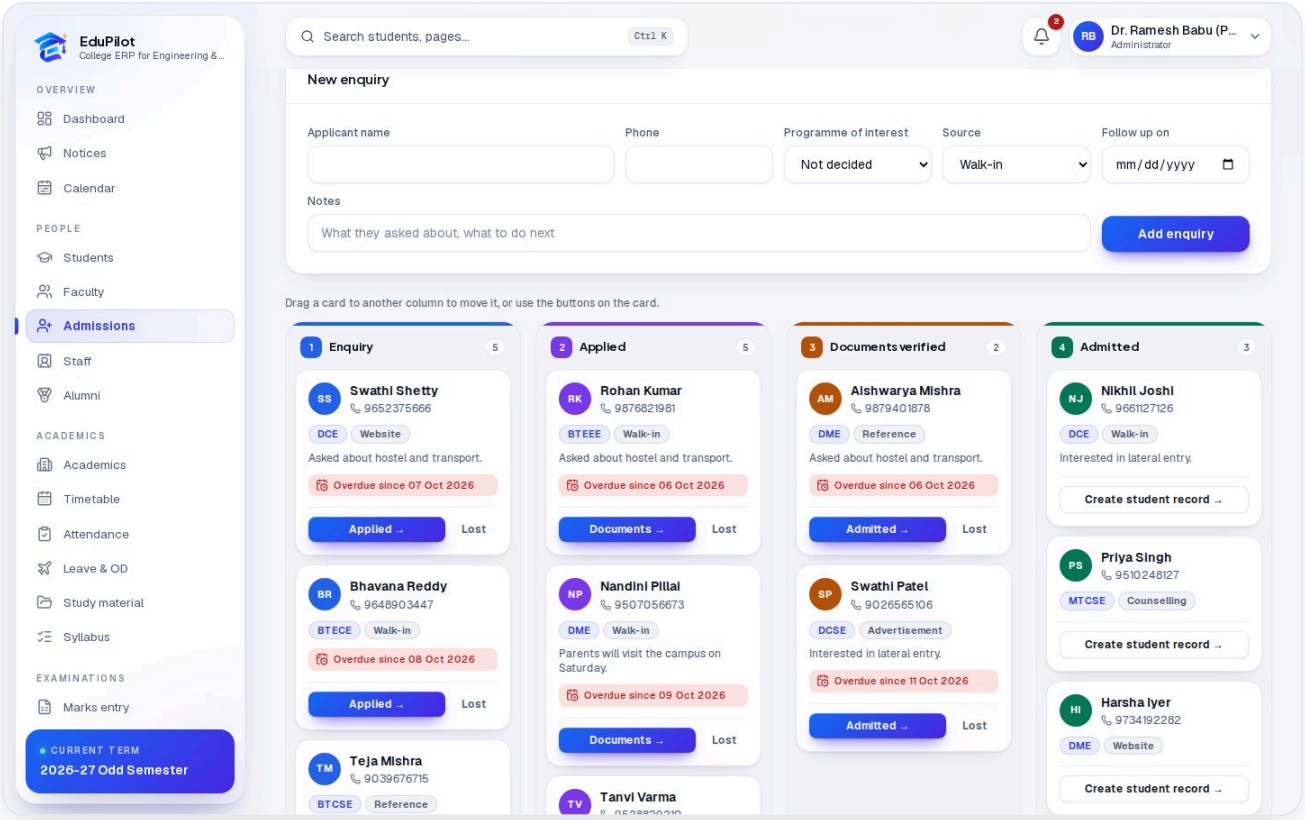

- Search by name, employee ID or specialisation; filter by department.
- Each profile lists every subject the teacher has taught, term by term.
- Adding a faculty member creates their login (employee ID as the first password).
- Workload per teacher is shown on the course allocation page.

WHO USES IT

Admin · HOD

Admissions pipeline

Track every enquiry from the first call to a confirmed admission.

WHAT IT DOES

- A board with four stages: Enquiry, Applied, Documents verified, Admitted.
- Each card holds the applicant's phone, programme, source, notes and next follow-up date. Overdue follow-ups are shown in red.
- Drag a card to another column to move it, or use the button on the card.
- Tiles for active enquiries, follow-ups due today, admitted count and conversion rate.
- An admitted enquiry can be turned into a student record in one step.

WHO USES IT

Admin · Office

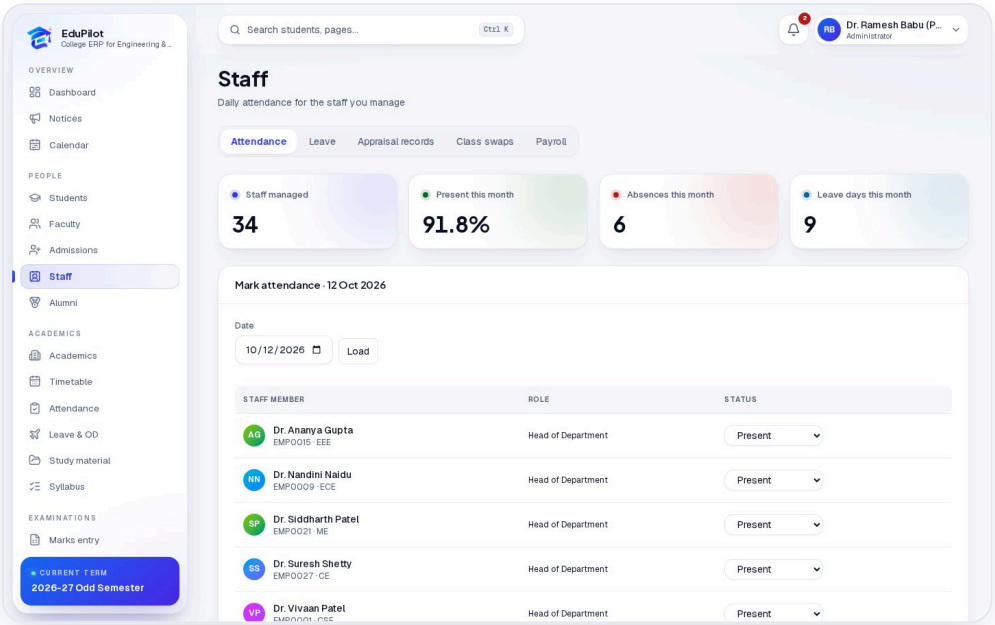

HOW IT WORKS

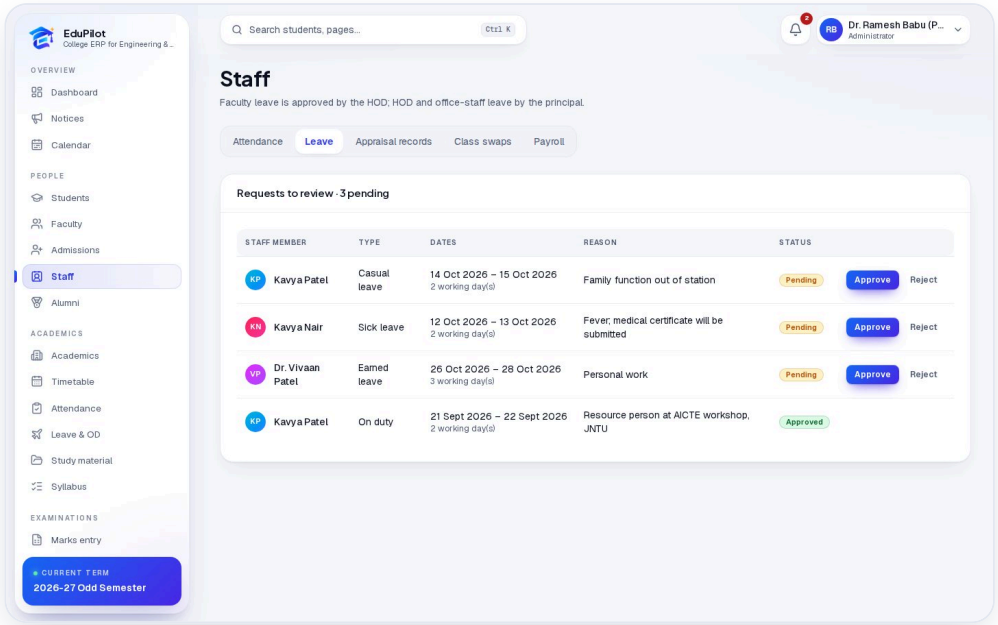

1. Record the enquiry
2. Move it to Applied
3. Verify documents
4. Mark Admitted
5. Create the student record

PEOPLE · 3.7

Staff attendance and leave

Daily attendance for staff, and leave requests with yearly balances.

WHAT IT DOES

- Mark each staff member's attendance for the day; approved leave shows automatically.
- Leave types: casual, sick, earned and on-duty, each with a yearly balance that is checked when applying.
- Faculty leave is approved by the HOD; HOD and office-staff leave by the principal.
- The applicant is notified of the decision.

WHO USES IT

Admin · HOD · Faculty

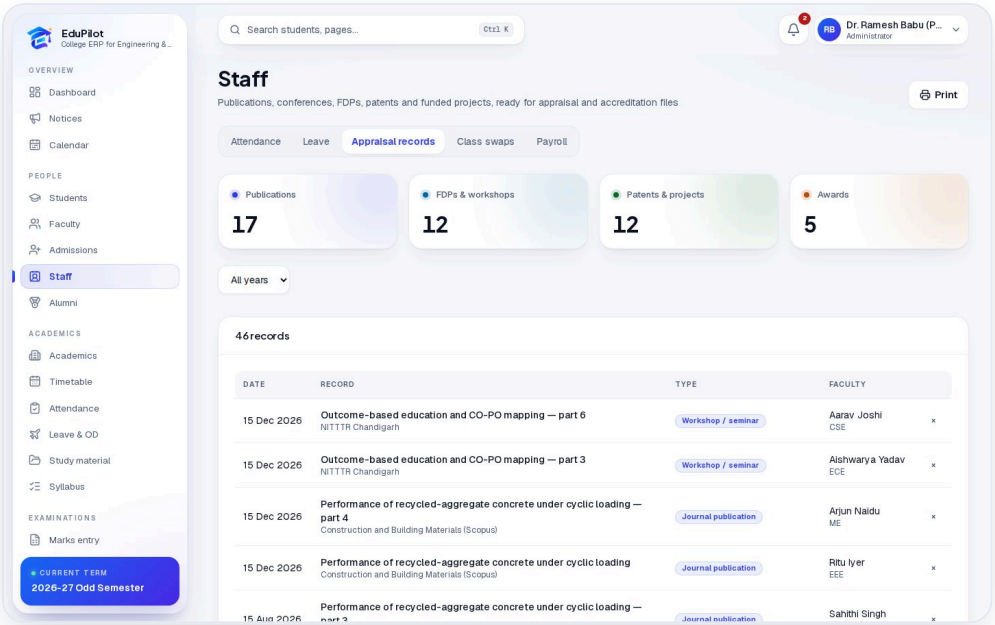

HOW IT WORKS

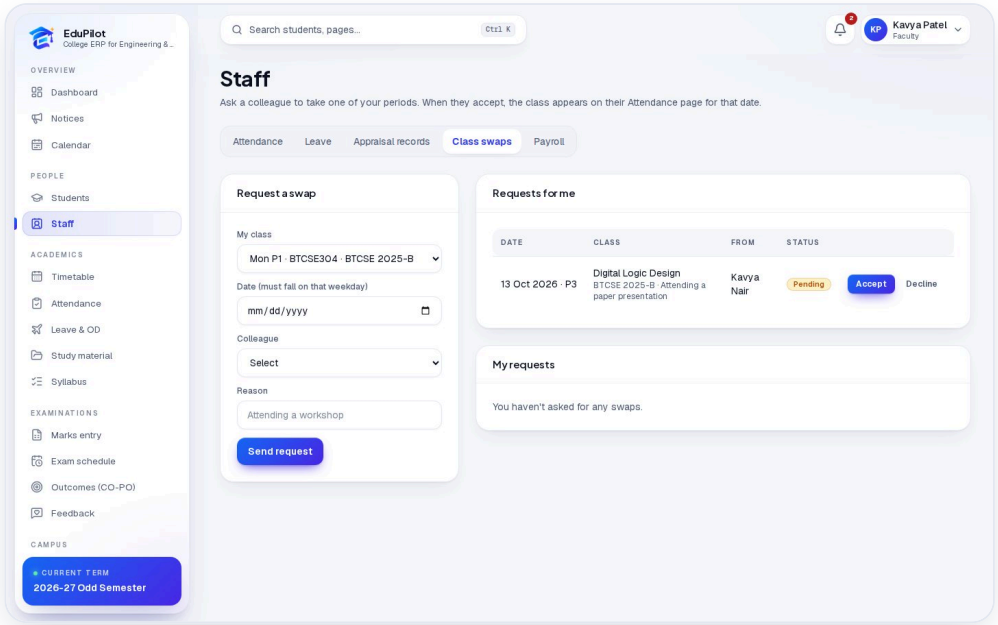

1. Staff member applies
2. HOD or principal approves
3. Balance is reduced
4. Attendance shows the leave

PEOPLE · 3.8

Appraisal records and class swaps

A record of each teacher's contributions, and a simple way to exchange a class with a colleague.

WHAT IT DOES

- Appraisal records: publications, conferences, FDPs and workshops, patents, funded projects and awards.
- These feed the accreditation data sheets.
- Class swap: a teacher asks a colleague to take a period. When the colleague accepts, the class appears on their attendance page for that date.

WHO USES IT

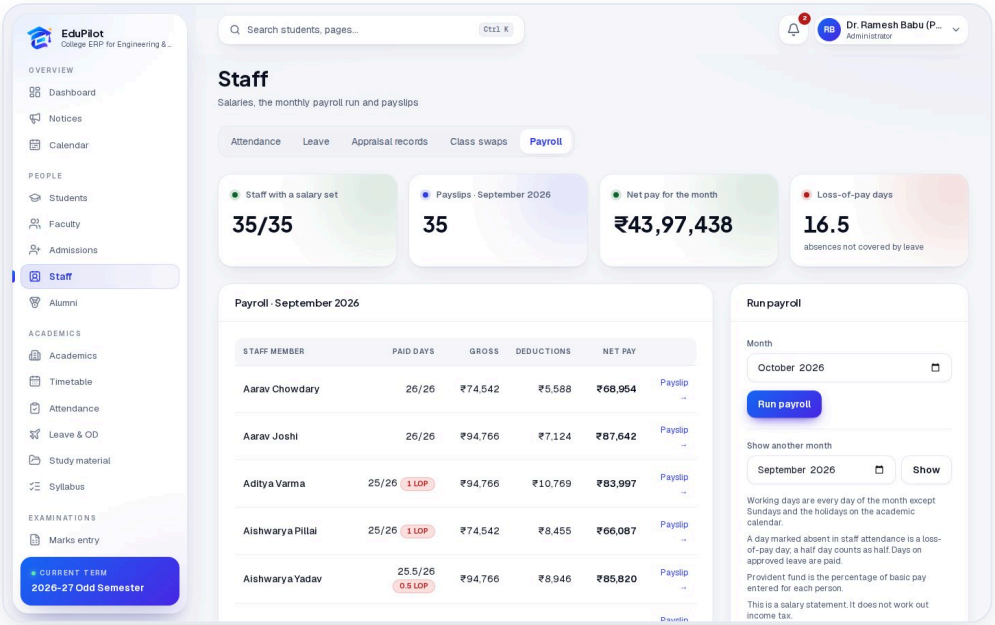

Faculty · HOD · Admin

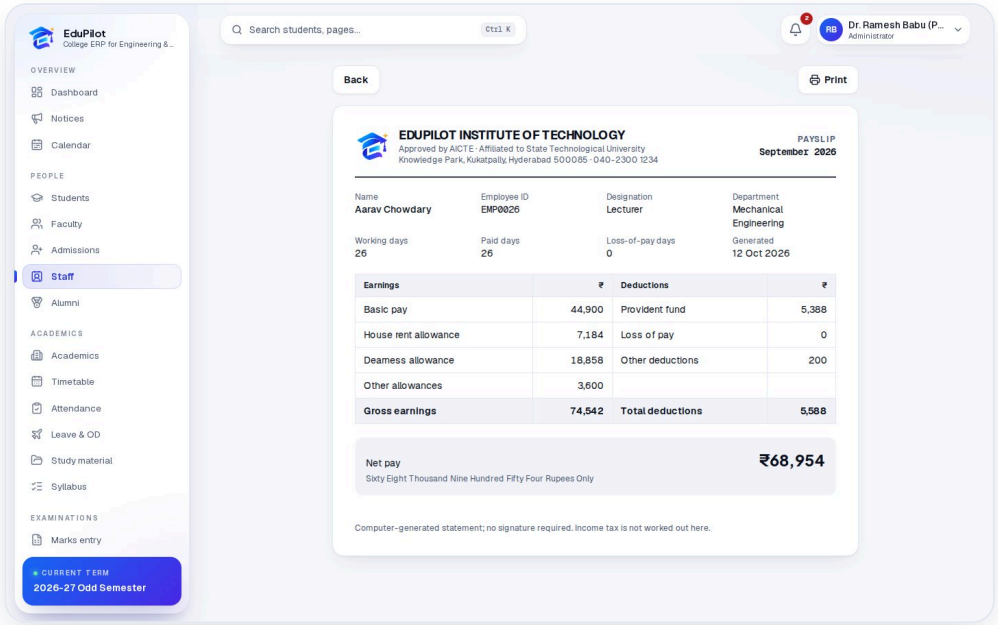

HOW IT WORKS

1. Teacher requests a swap
2. Colleague accepts
3. Colleague takes attendance for that class

Payroll

A salary for each member of staff, a monthly run, and a payslip for everyone.

WHAT IT DOES

- Set basic pay, HRA, DA, allowances, provident-fund percentage and fixed deductions per person.
- Run payroll for a month in one click. It can be run again after attendance is corrected.
- Working days leave out Sundays and the holidays on the academic calendar.
- A day marked absent in staff attendance is a loss-of-pay day; a half day counts as half. Approved leave is paid.
- Each person sees their own payslips; it prints on the college letterhead with the net pay in words.
- This is a salary statement. It does not work out income tax.

WHO USES IT

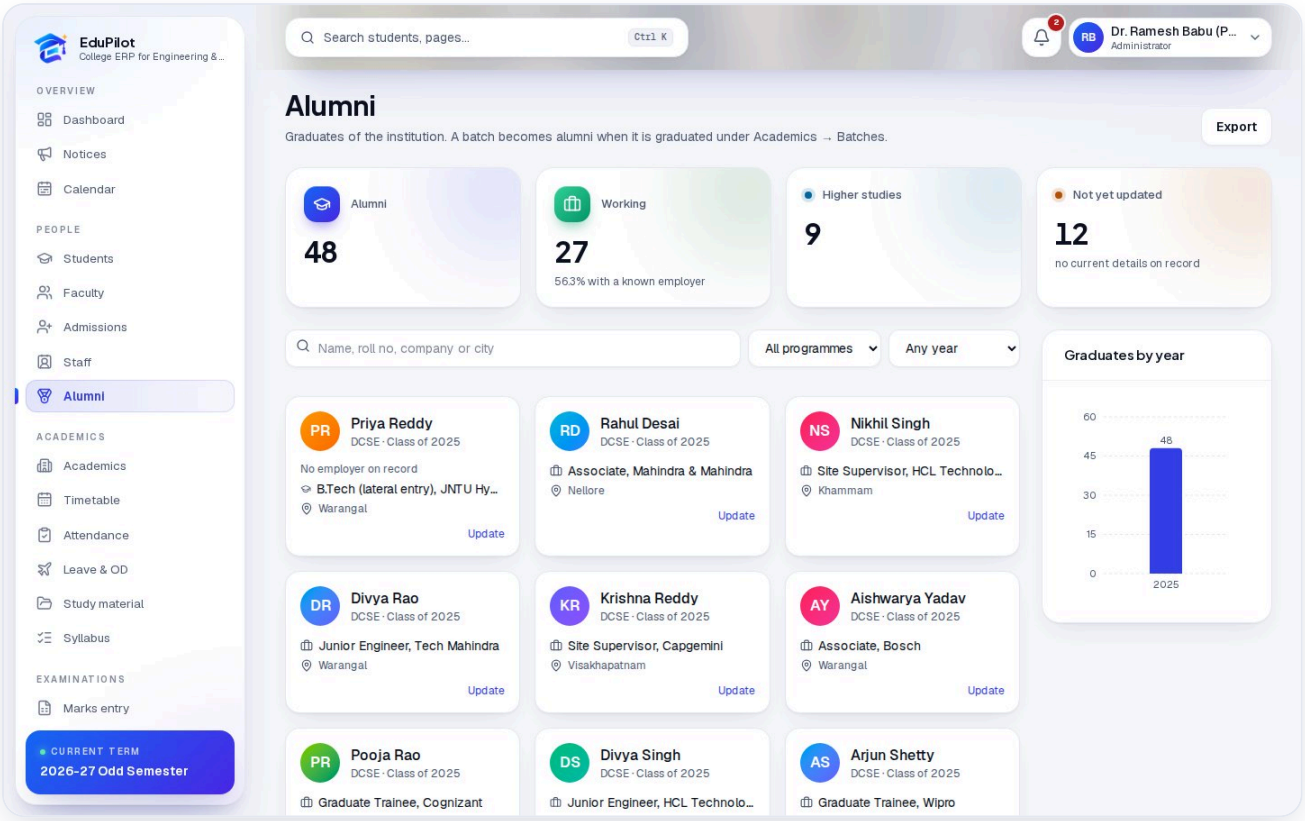

Accounts · Admin · Faculty · HOD · Office

HOW IT WORKS

1. Set salaries once
2. Mark staff attendance through the month
3. Run payroll
4. Staff open their payslips

Alumni

Graduated batches become alumni records automatically.

WHAT IT DOES

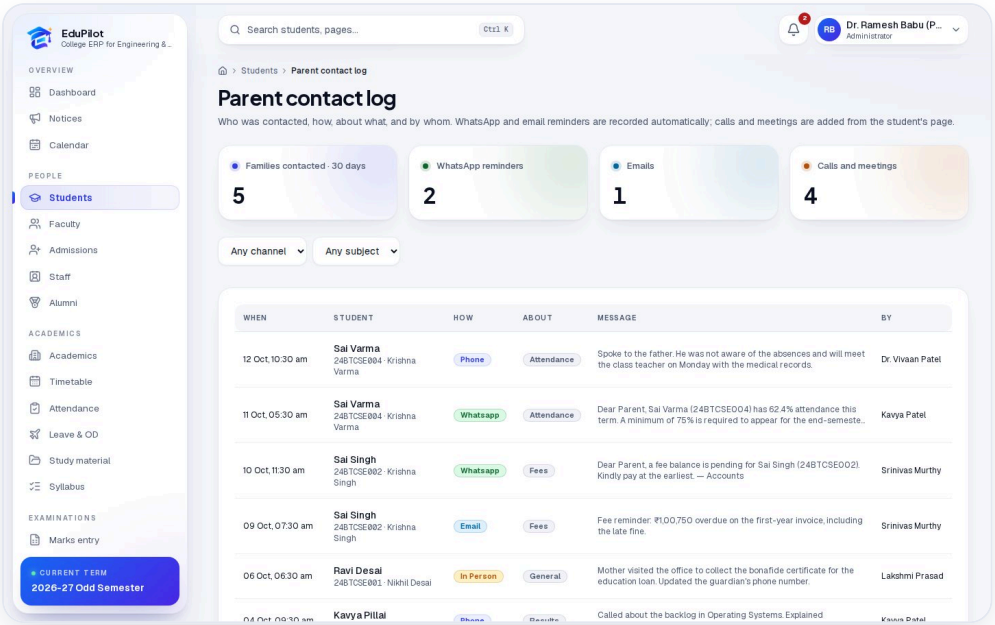

- Each record holds current employer, designation, city and higher-studies details.
- Tiles: total alumni, working with a known employer, in higher studies, and not yet updated.
- Search by name, roll number, company or city; filter by programme and graduation year.
- Export for alumni meets and accreditation.

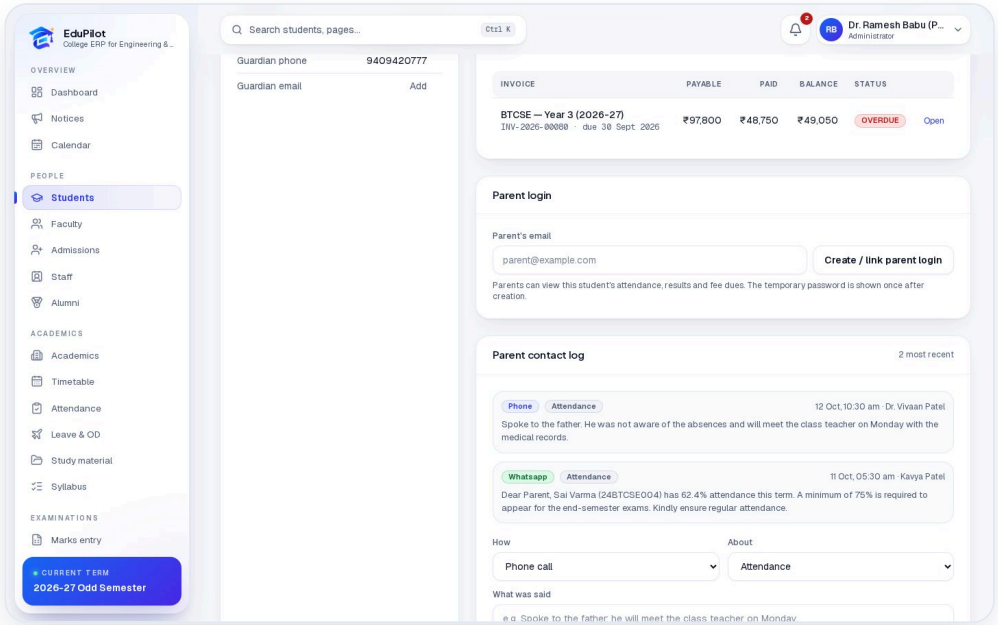

WHO USES IT

Admin

Parent contact log

A record of every time the college contacted a parent, so the next person knows what was already said.

WHAT IT DOES

- Each entry shows how the parent was contacted (WhatsApp, email, phone or in person), what it was about, the message and who made the contact.
- WhatsApp reminders and bulk reminder emails are recorded automatically.
- Phone calls and meetings are added in a few words from the student's page.
- A college-wide log filters by channel and subject, with a 30-day count of families contacted.
- HODs and teachers see entries for their own department's students only.

WHO USES IT

Admin · HOD · Faculty · Accounts · Office

HOW IT WORKS

1. Press Remind parent, or add a call
2. The entry is saved with your name
3. Colleagues see it on the student's page

SECTION 4

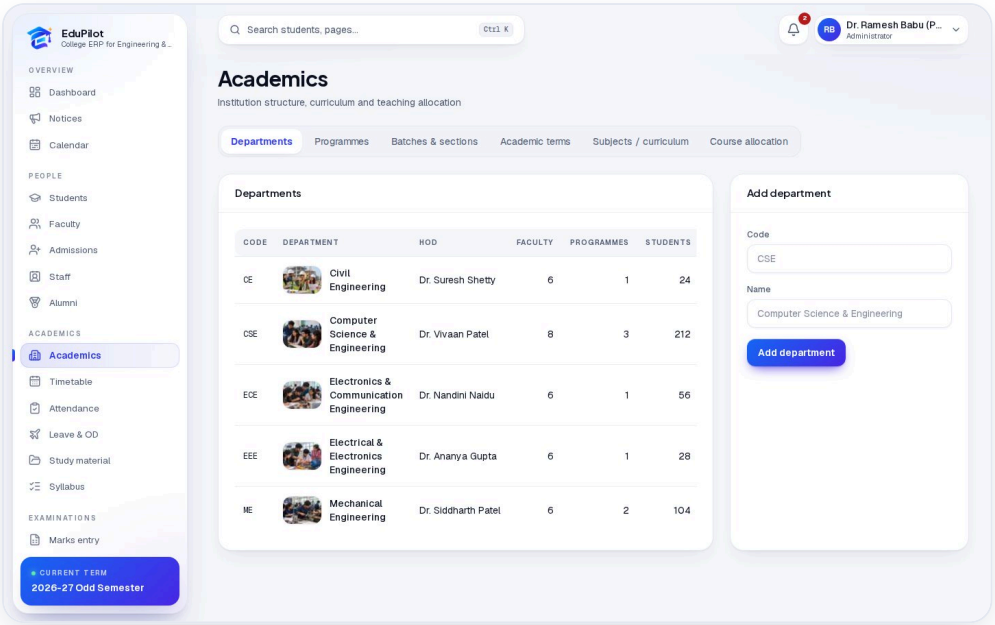

Academic set-up

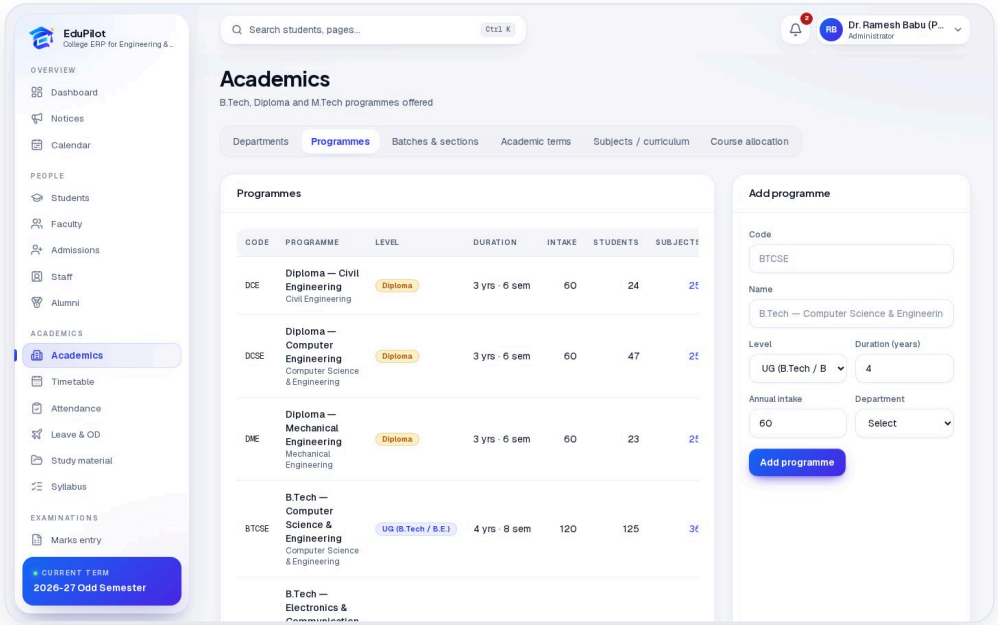

The structure everything else depends on: departments, programmes, batches, curriculum, timetable and calendar.

- Departments and programmes
- Batches, sections and terms
- Promoting a batch
- Curriculum and course allocation
- Timetable
- Academic calendar

Departments and programmes

Define the college's departments and the courses each one offers.

WHAT IT DOES

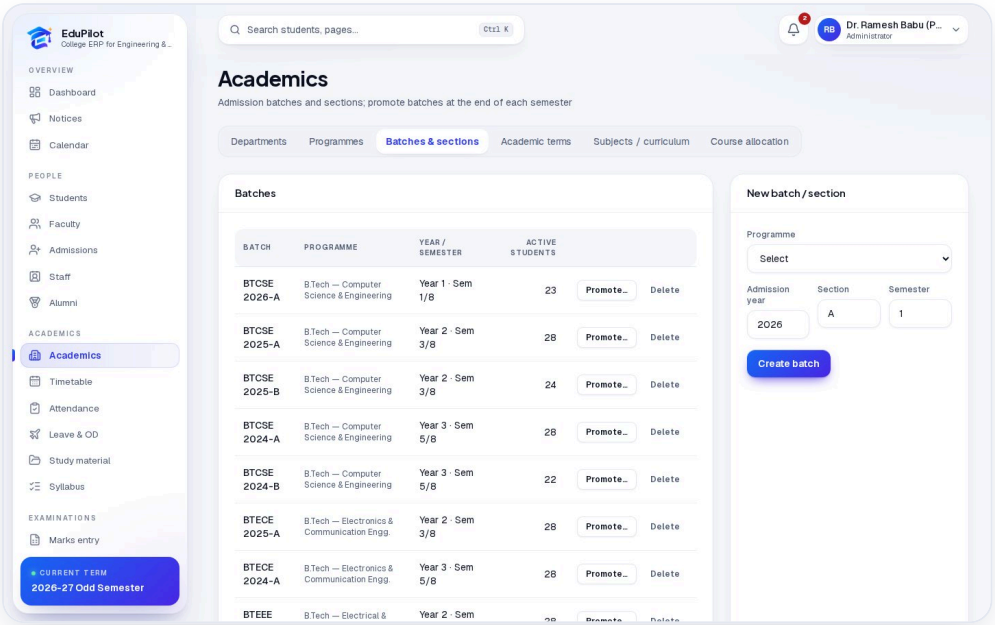

- Departments with their Head of Department, faculty count and student strength.
- Programmes at three levels: Diploma, UG (B.Tech) and PG (M.Tech), each with duration and sanctioned intake.
- Appointing an HOD gives that person department-wide access.

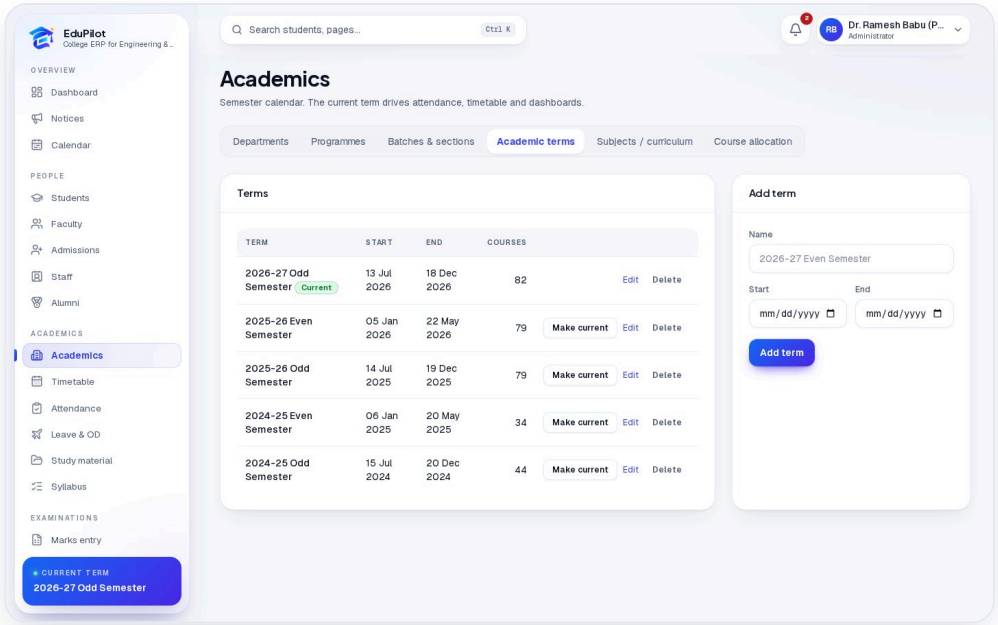

WHO USES IT

Admin

Batches, sections and terms

Group students by admission year and section, and move them forward each semester.

WHAT IT DOES

- A batch is one admission year and section of a programme, for example BTCSE 2024-A.
- Promote moves a whole batch to the next semester. After the final semester the batch is graduated and its students become alumni.
- Academic terms hold the start and end dates. One term is marked current, and it drives attendance, timetable and dashboards.

WHO USES IT

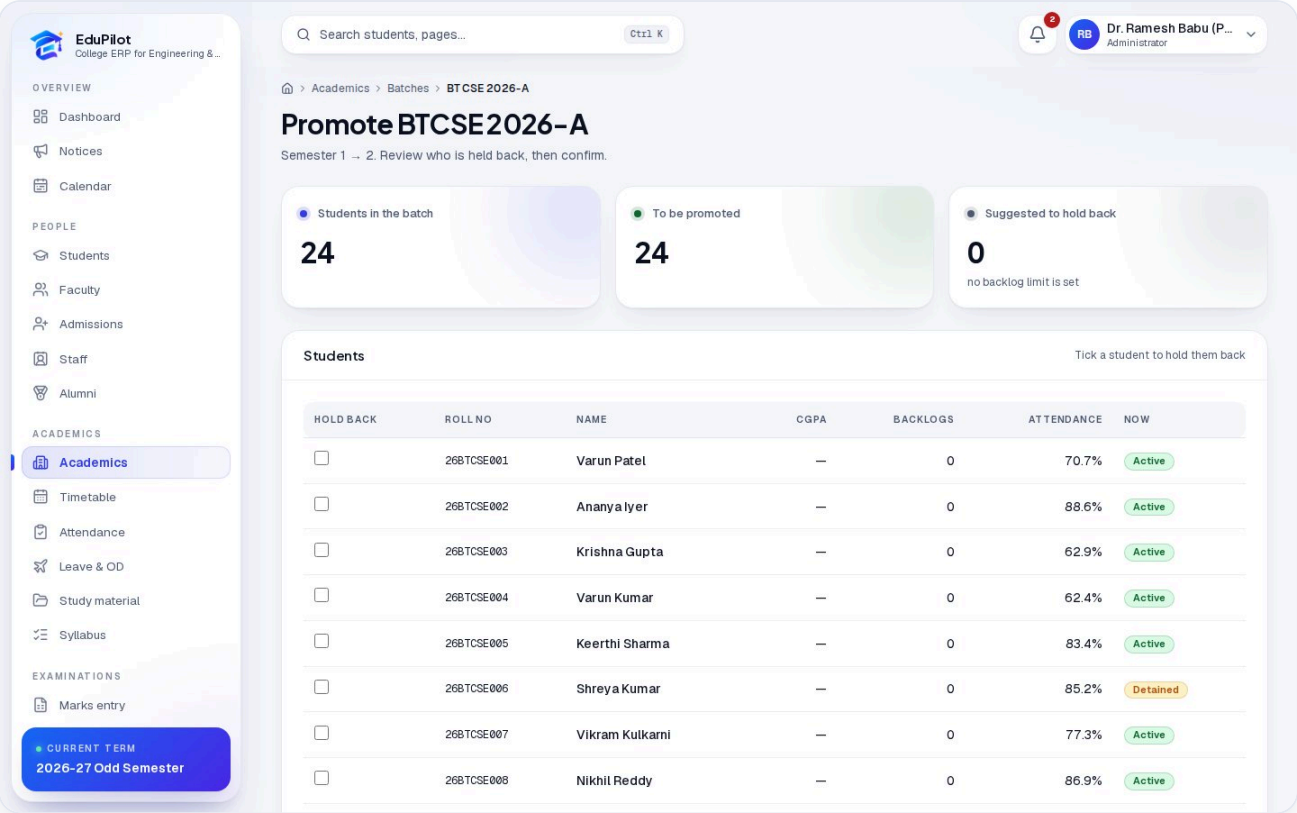

Admin

HOW IT WORKS

1. Create the term
2. Mark it current
3. Teach and examine
4. Promote each batch
5. Graduate final-year batches

Promoting a batch

Move a class to the next semester after reviewing who is held back.

HOW IT WORKS

1. Open Promote on the batch
2. Review the ticked students
3. Confirm
4. Detained students move to the junior batch

WHAT IT DOES

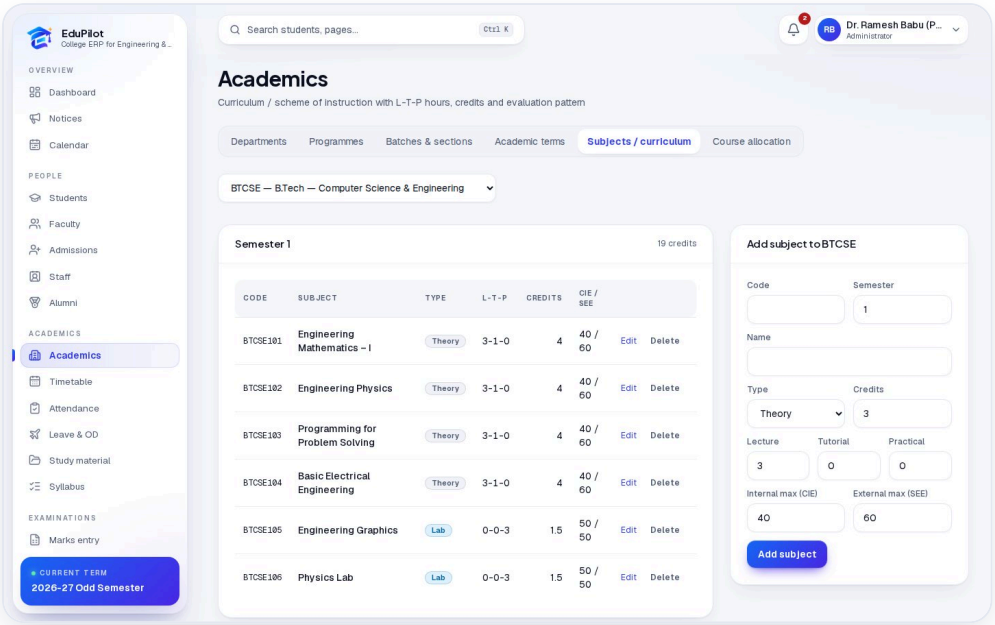

- The review lists every student with CGPA, active backlogs and attendance.
- Students over the college's backlog limit are already ticked to be held back. The administrator can change any tick before confirming.
- Held-back students are marked detained and join the batch a year below, so they repeat the year with that class.
- A final-semester batch graduates instead: its students become alumni, and anyone with a backlog is held back.
- The backlog limit is set under Administration → Rules. With no limit, everyone is promoted.

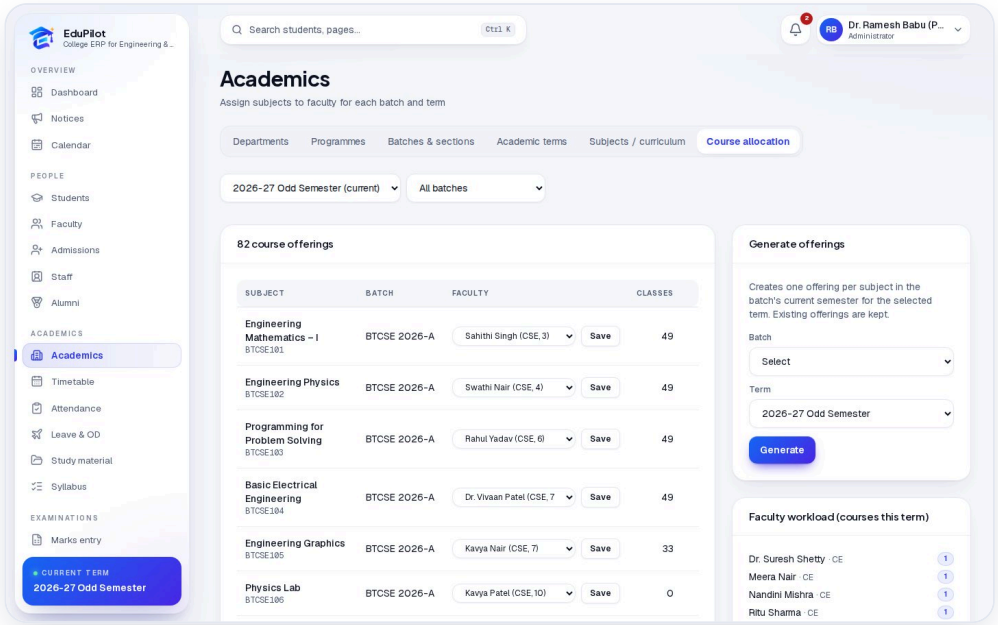

WHO USES IT

Admin

Curriculum and course allocation

The scheme of instruction for each programme, and who teaches what this term.

WHAT IT DOES

- Each subject has a code, type (theory or lab), L-T-P hours, credits and the internal / external marks split.
- Generate creates this term's courses for a batch from its curriculum in one click.
- Assign a teacher to each course. A workload panel shows how many courses each teacher holds.
- Courses without a teacher appear as an urgent task for the HOD.

WHO USES IT

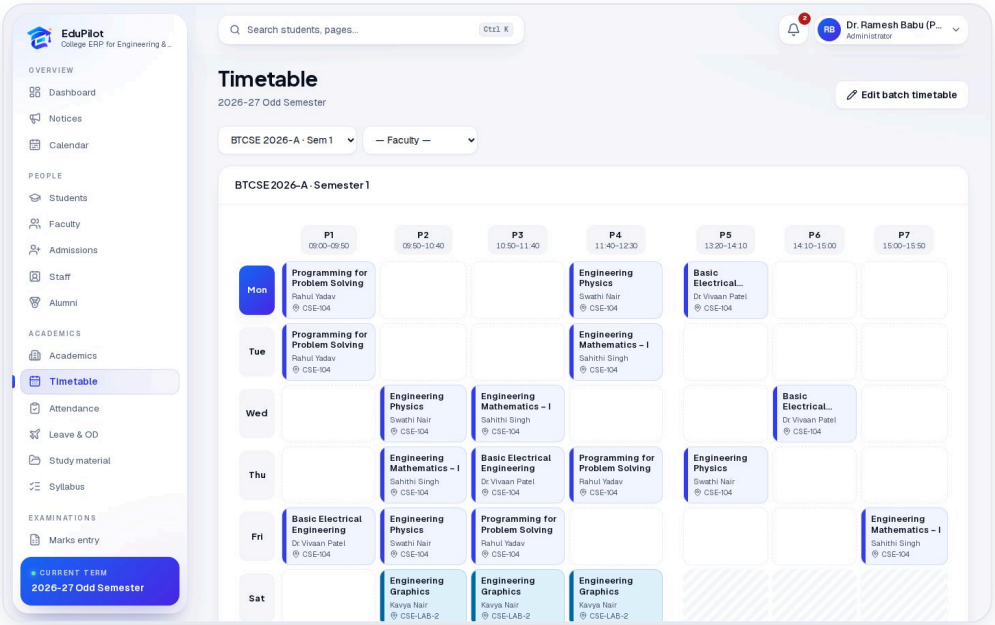

Admin · HOD

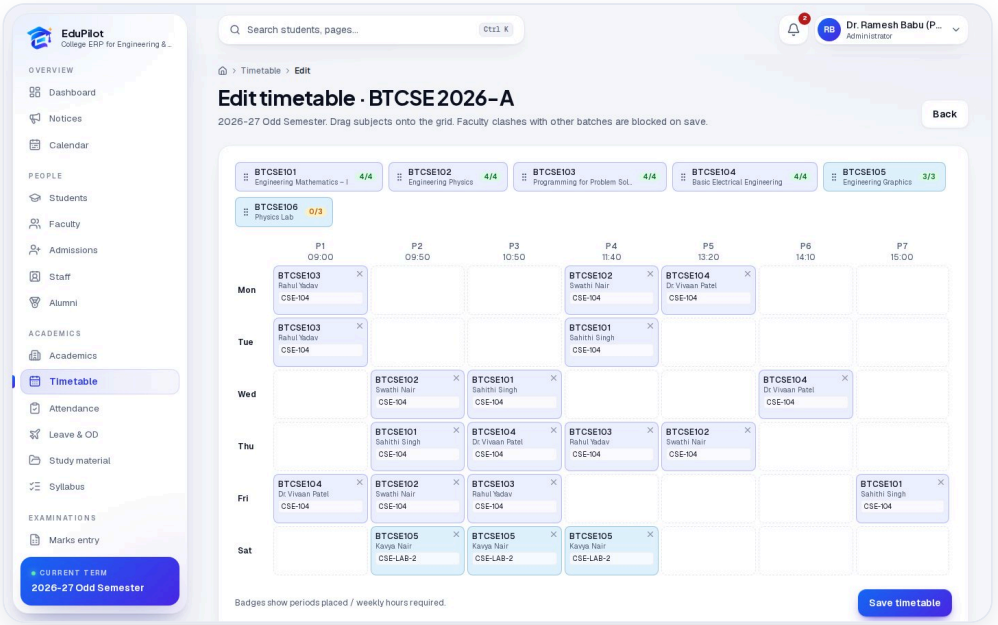

HOW IT WORKS

1. Enter the curriculum once
2. Generate courses for the term
3. Assign teachers
4. Build the timetable

Timetable

A weekly grid for each batch or each teacher, with clash checks.

WHAT IT DOES

- View by batch or by faculty member. Students and parents see their own batch.
- The editor is drag-and-drop: drag a subject onto a period.
- A teacher cannot be placed in two classes at the same time; the clash is blocked on save.
- Each subject shows periods placed against weekly hours required.

WHO USES IT

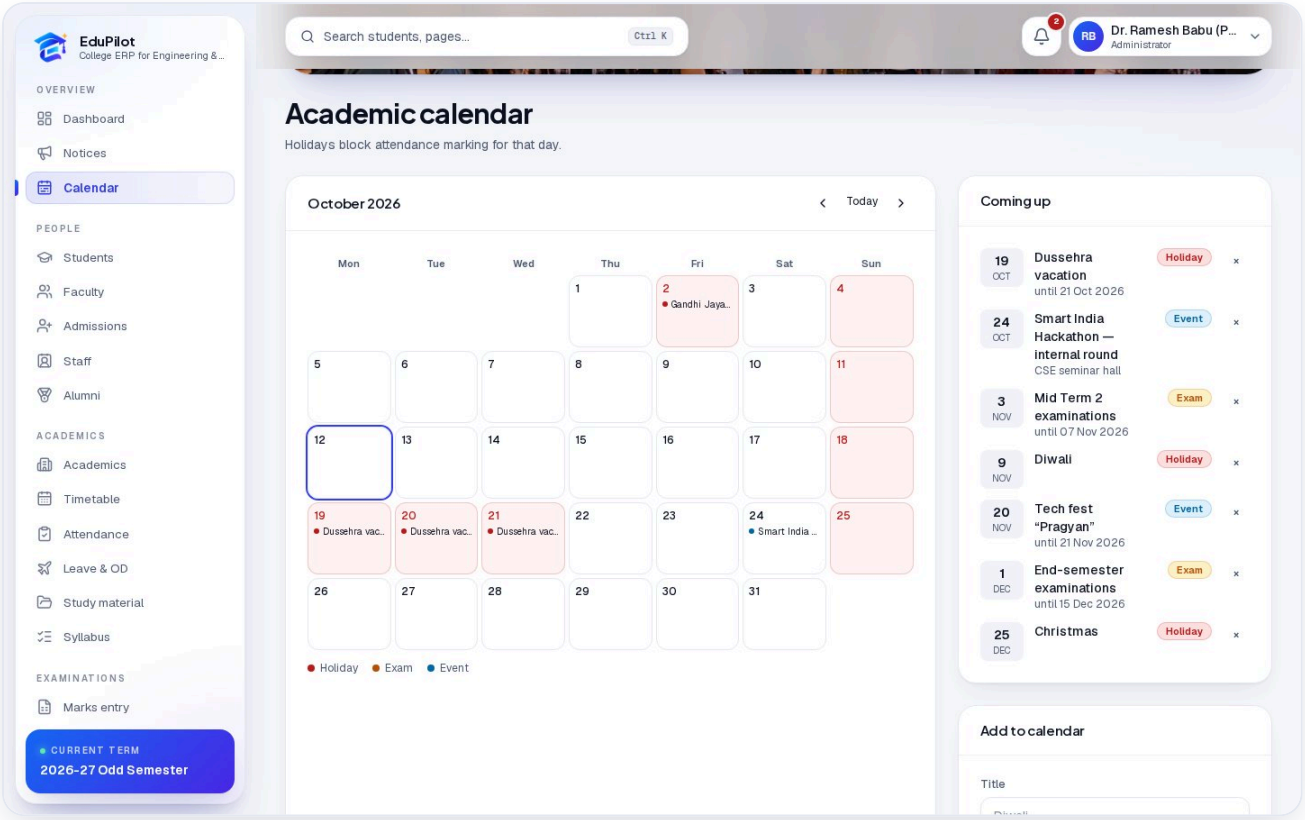

Admin · HOD · Faculty · Student · Parent

HOW IT WORKS

1. Open Edit batch timetable
2. Drag subjects onto the grid
3. Save (clashes are refused)
4. Students and teachers see it immediately

Academic calendar

Holidays, examinations and events in a month view.

WHAT IT DOES

- Three kinds of entry: holiday, exam and event.
- Holidays and Sundays block attendance marking, so no class is recorded on a closed day.
- A Coming up list shows the next dates for everyone.

WHO USES IT

Admin · HOD · Faculty · Student · Parent

SECTION 5

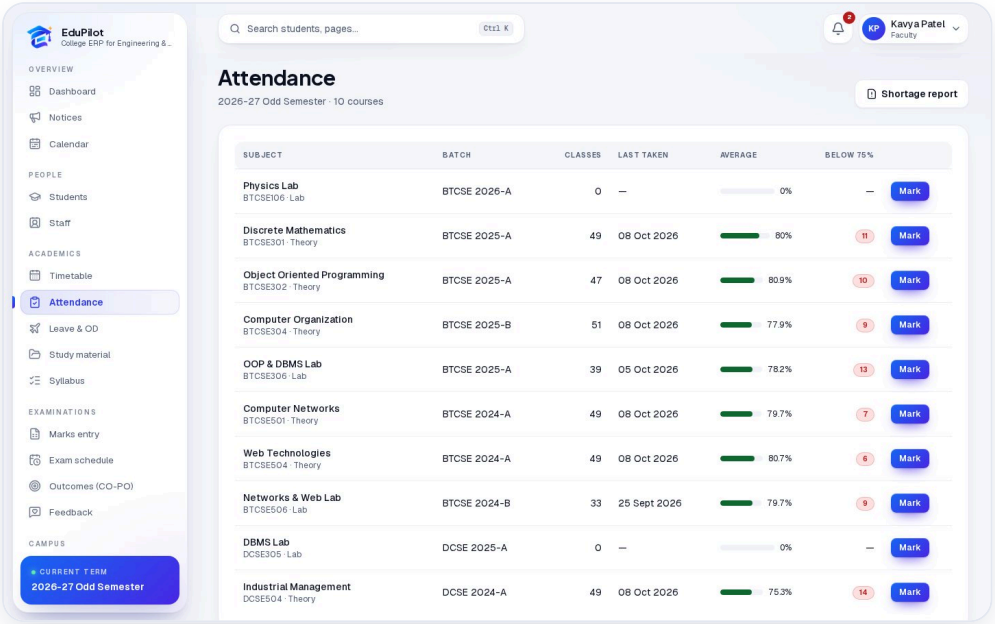

Daily teaching

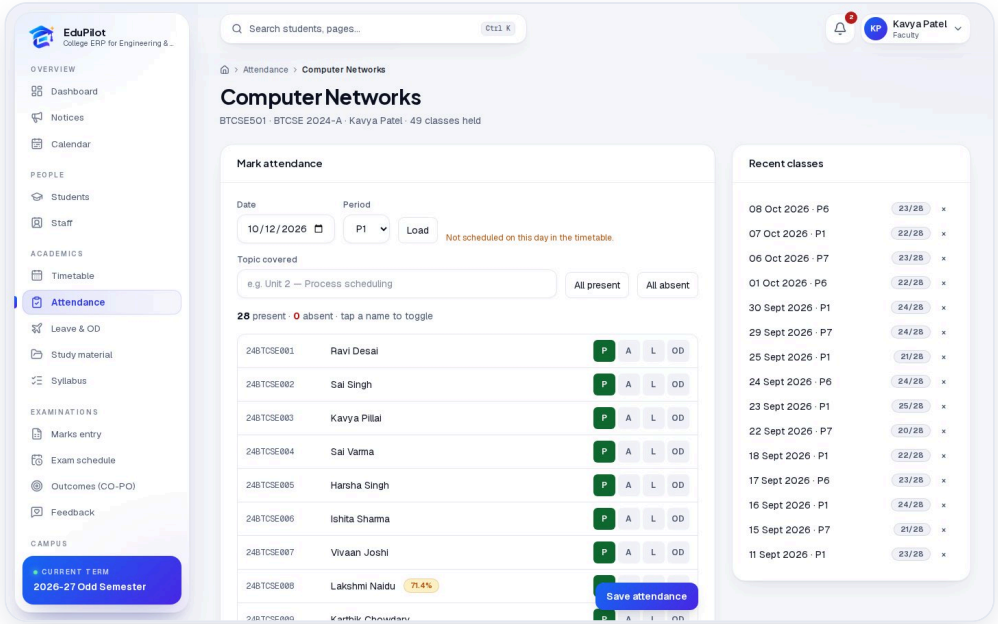

Attendance, leave, study material and syllabus progress.

- Taking attendance
- Shortage report and substitute classes
- Student leave and on-duty
- Study material and assignments
- Syllabus coverage

Taking attendance

Period-wise attendance in a few taps, from a desk or a phone.

WHAT IT DOES

- The teacher's courses with classes held, last class taken, average attendance and students below 75%.
- Everyone starts as present; tap a name to mark absent. Late and On-duty are one tap each.
- Students below 75% are flagged on the sheet. Approved leave and on-duty are pre-filled.
- Record the topic covered with each class. Past classes can be reopened and corrected, with the change recorded.
- On a phone, swipe left for absent and right for present. A sheet marked without a connection is kept on the device and uploads when the network returns.

WHO USES IT

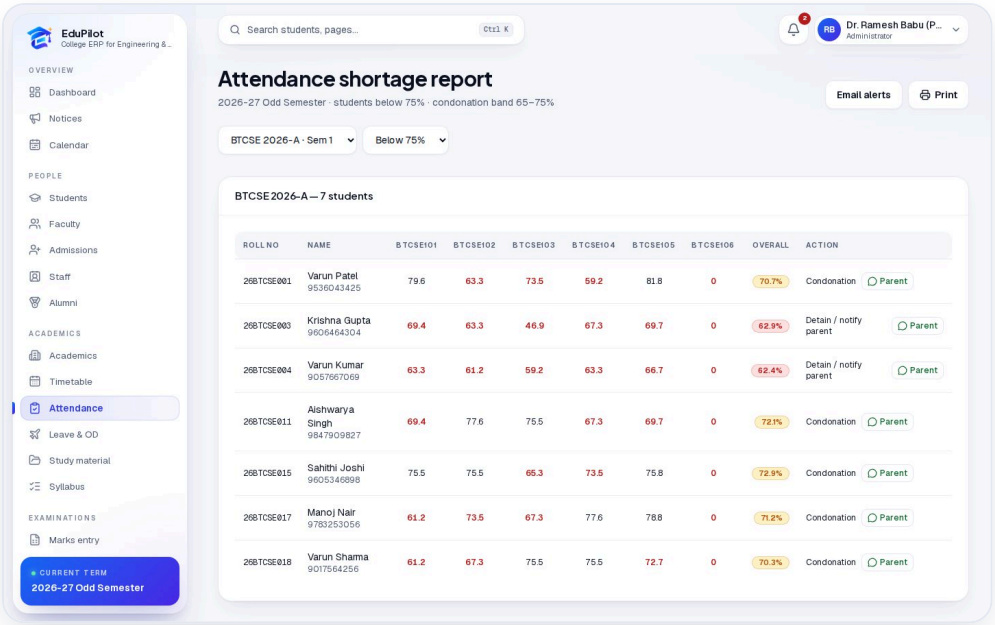

Faculty · HOD

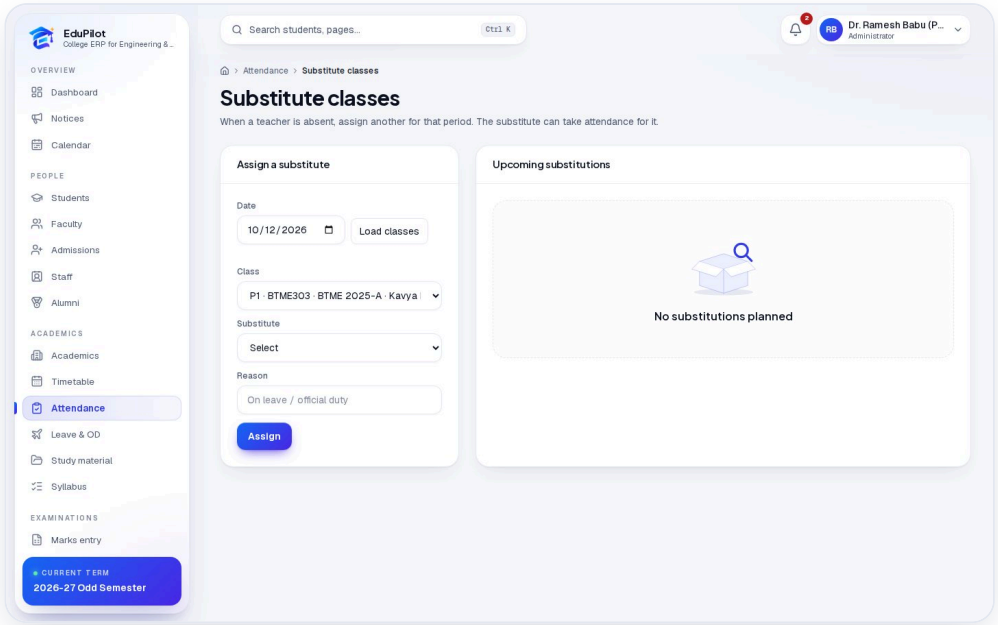

HOW IT WORKS

1. Open the course
2. Pick date and period
3. Tap the absentees
4. Save

Shortage report and substitute classes

See who is falling short before the exams, and cover a class when a teacher is away.

WHAT IT DOES

- The 75% rule with a 65–75% condonation band (both figures can be changed under Administration → Rules): each student is shown as eligible, condonable or detained.
- Subject-wise percentages for every student in a batch, printable for the notice board.
- Email alerts to all students below the line, and a Remind parent button that opens WhatsApp with the message already written.
- Substitutes: the HOD assigns another teacher for a period. It is refused if that teacher already has a class then.

WHO USES IT

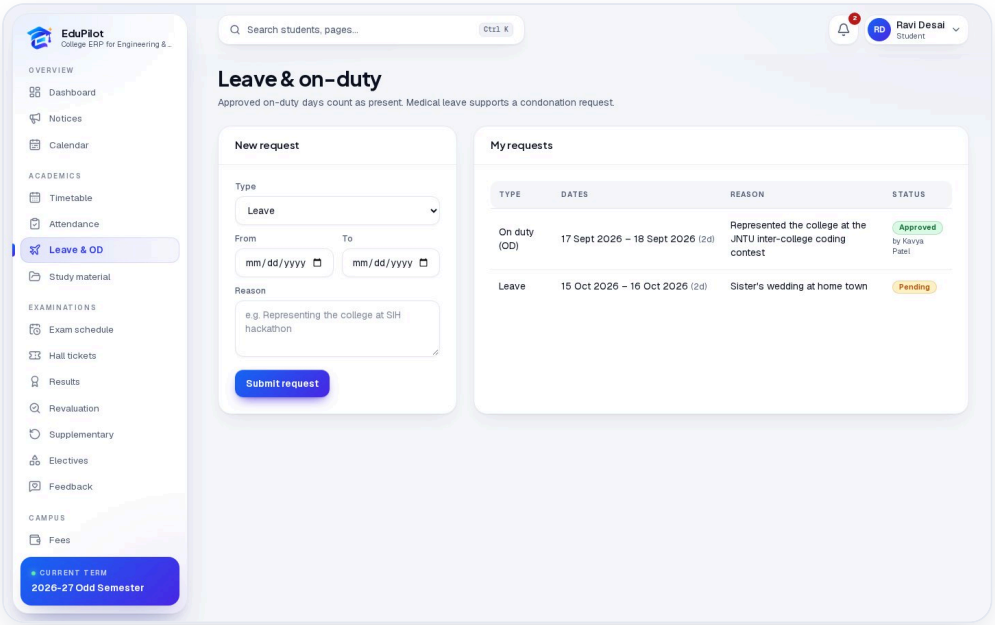

Admin · HOD

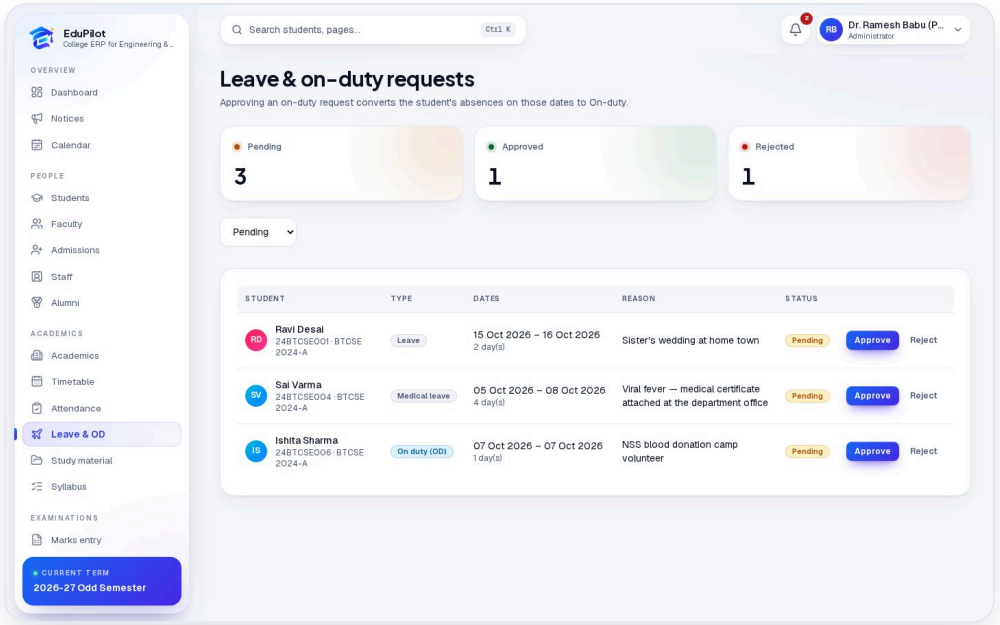

HOW IT WORKS

1. Open the shortage report
2. Send alerts
3. Students apply for condonation
4. Hall tickets follow the rule

Student leave and on-duty

Students apply online; staff approve; attendance is corrected automatically.

WHAT IT DOES

- Three request types: leave, medical leave and on-duty (representing the college).
- Approving on-duty converts that student's absences on those dates to On-duty, and pre-fills OD on future attendance sheets.
- Approved medical leave supports a condonation request when attendance is between 65% and 75%.
- The student is notified of the decision in the app and by email.

WHO USES IT

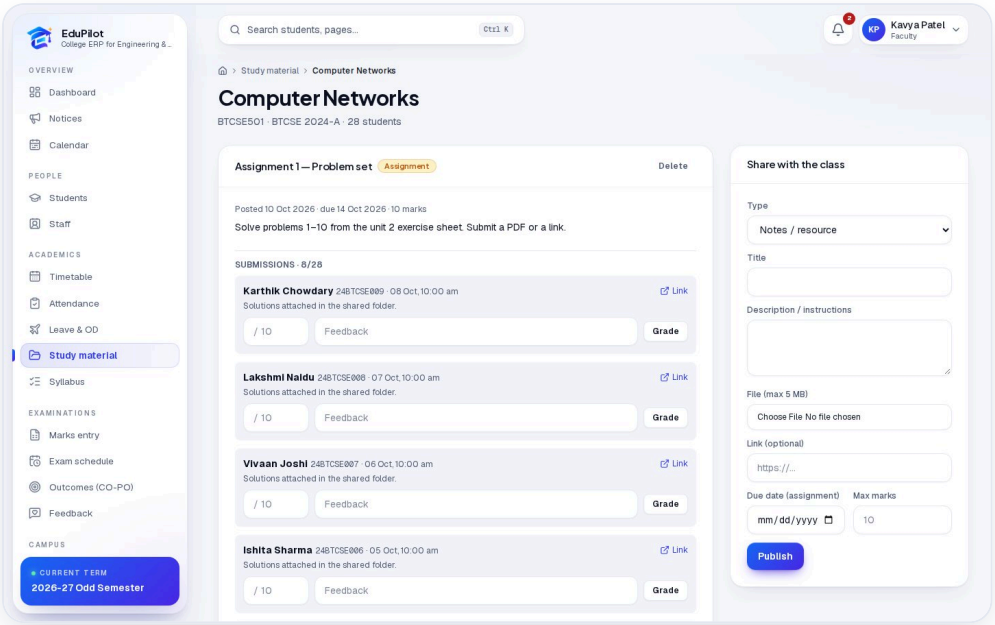

Student · Faculty · HOD · Admin

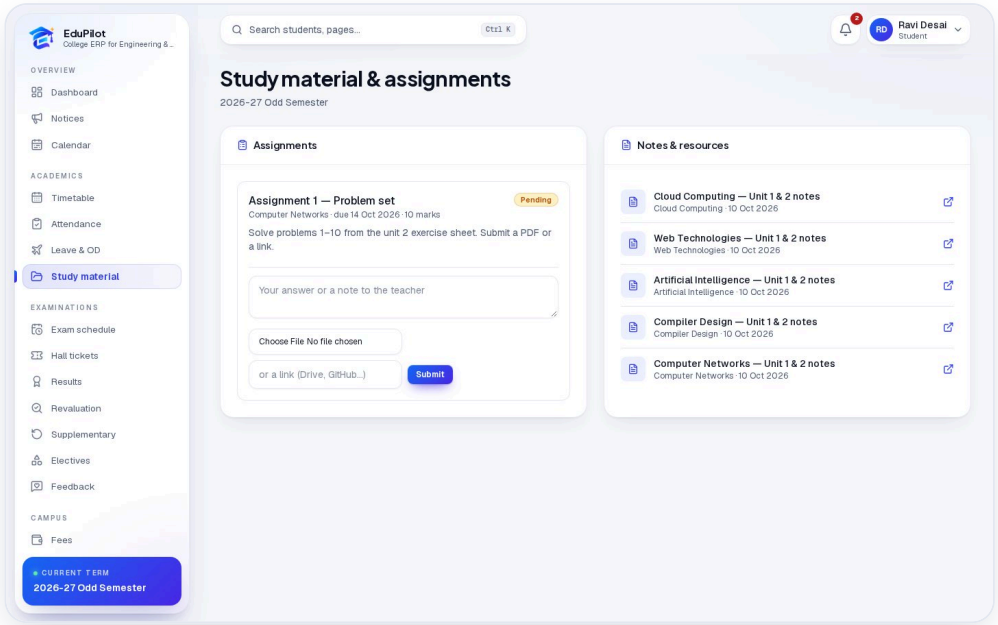

HOW IT WORKS

1. Student applies with dates and reason
2. Teacher or HOD approves
3. Attendance updates
4. Student is notified

Study material and assignments

Share notes with a class, set assignments, collect submissions and grade them.

WHAT IT DOES

- Share a file (up to 5 MB) or a link with the whole class.
- Set an assignment with a due date and maximum marks.
- Students submit an answer, a file or a link online.
- The teacher grades each submission and writes feedback; the student sees both.

WHO USES IT

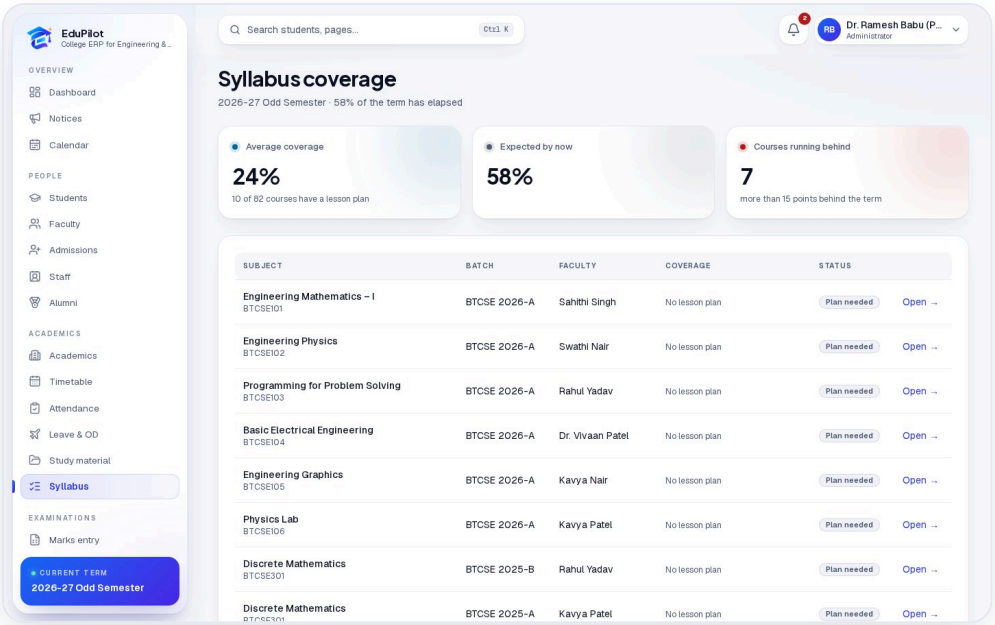

Faculty · Student

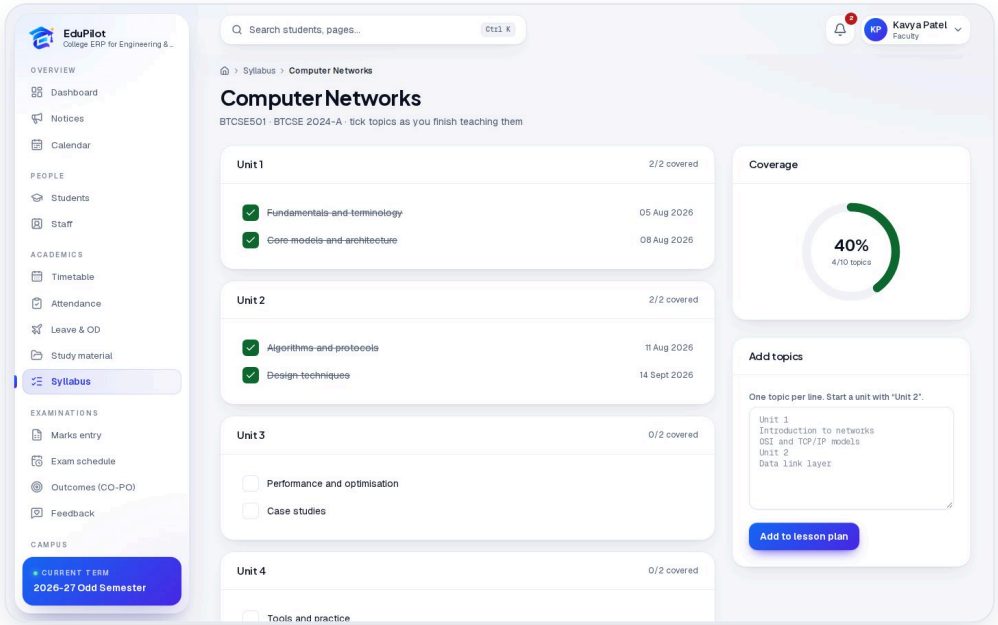

HOW IT WORKS

1. Teacher publishes notes or an assignment
2. Students are notified
3. Students submit
4. Teacher grades with feedback

Syllabus coverage

A unit-wise lesson plan for each subject, ticked off as it is taught.

WHAT IT DOES

- The teacher enters the units and topics once, then ticks each topic when it is finished.
- HODs see coverage for every course against how much of the term has elapsed.
- Courses running more than 15 points behind are counted and highlighted.

WHO USES IT

Faculty · HOD · Admin

HOW IT WORKS

1. Enter the lesson plan
2. Tick topics as taught
3. HOD reviews coverage

SECTION 6

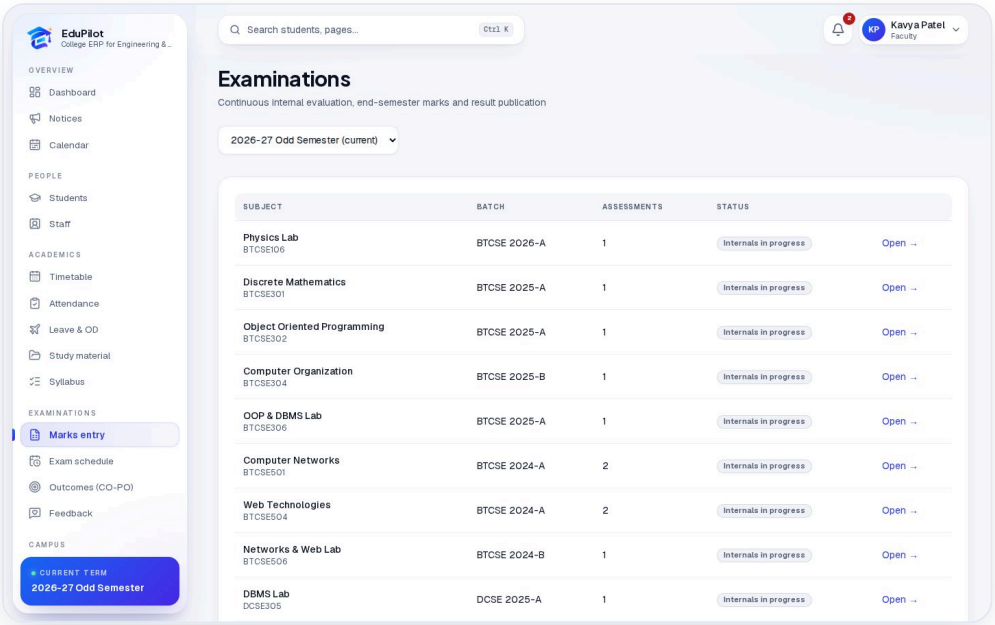

Examinations and results

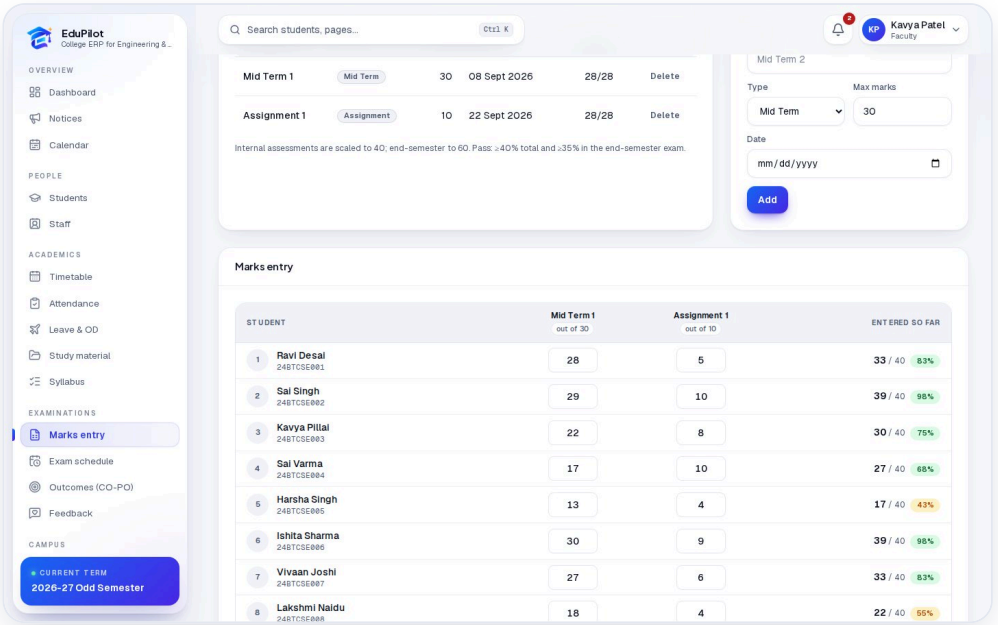

From internal marks to the grade card.

- Marks entry
- Exam schedule, seating and invigilation
- Hall tickets
- Results and grade cards
- Revaluation and grace marks
- Supplementary exams and electives
- Outcome attainment (CO-PO)
- Course feedback

Marks entry

A spreadsheet-style grid for internal and end-semester marks.

WHAT IT DOES

- An assessment plan per course: mid-terms, assignments, quizzes, lab internals and the end-semester exam.
- Type marks down the column with the keyboard, enter AB for absent, or paste a whole column from Excel.
- Internal marks are scaled to the subject's internal maximum automatically.
- A live preview shows the projected pass percentage and class average.
- The HOD or administrator publishes: this locks the marks and releases results to students.

WHO USES IT

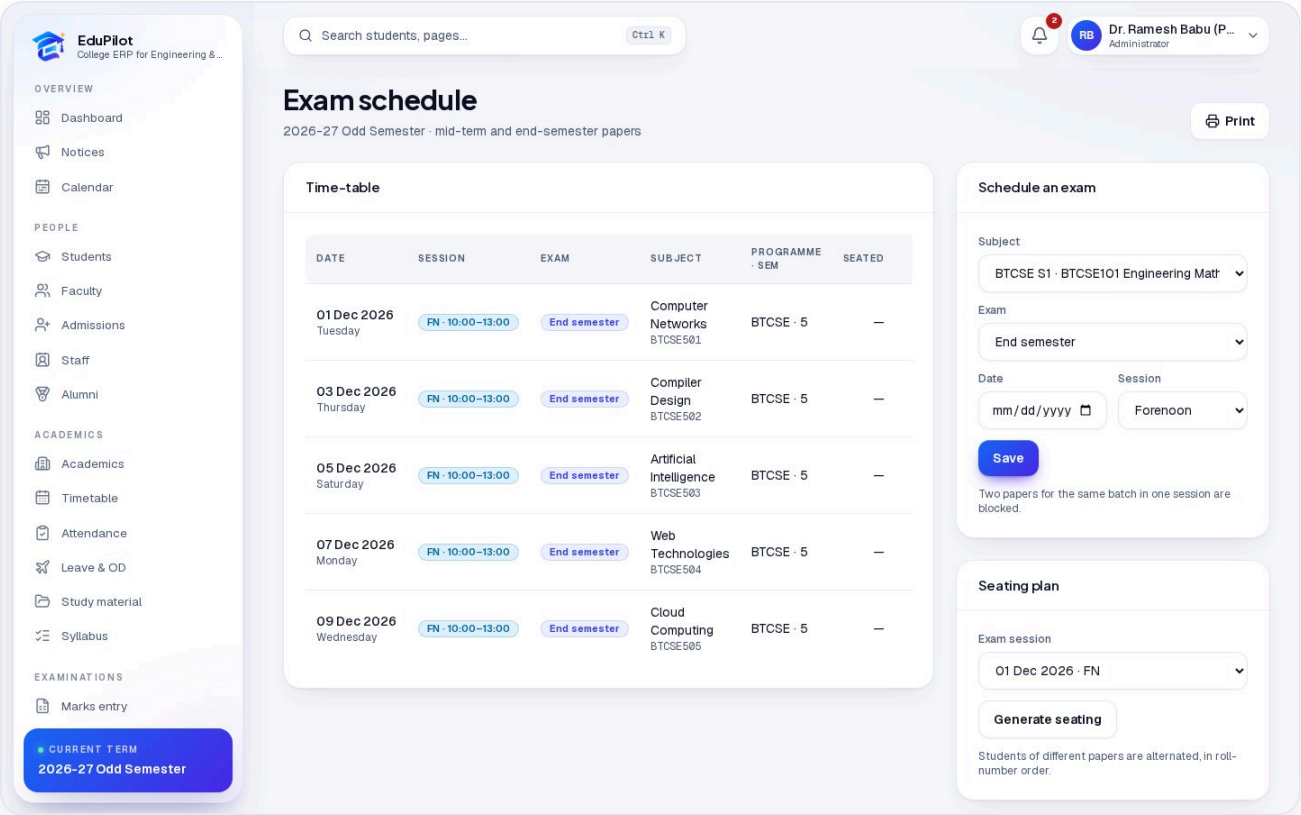

Faculty · HOD

HOW IT WORKS

1. Add the assessments
2. Enter or paste marks
3. Check the preview
4. HOD publishes and locks

Exam schedule, seating and invigilation

The time-table for mid-term and end-semester papers, exam halls, a generated seating plan and who supervises each hall.

HOW IT WORKS

1. Schedule the papers
2. Add exam halls
3. Generate seating
4. Assign teachers to halls
5. Print

WHAT IT DOES

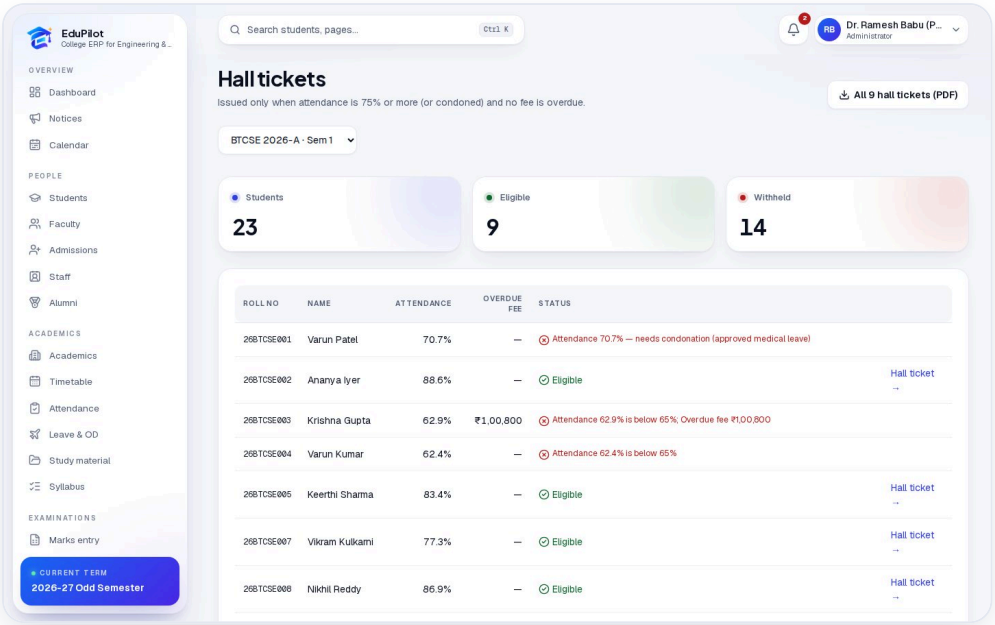

- Schedule mid-term and end-semester papers with date and session. Two papers for the same batch in one session are refused.
- Record exam halls with their capacity.
- Generate seating places students in roll-number order and alternates papers so neighbours write different exams.
- The schedule and seat numbers appear on the hall ticket.
- Invigilation duty: one click gives each hall a teacher, skipping anyone on approved leave and sharing duties evenly. Teachers are notified and see their own duties at the top of the page.

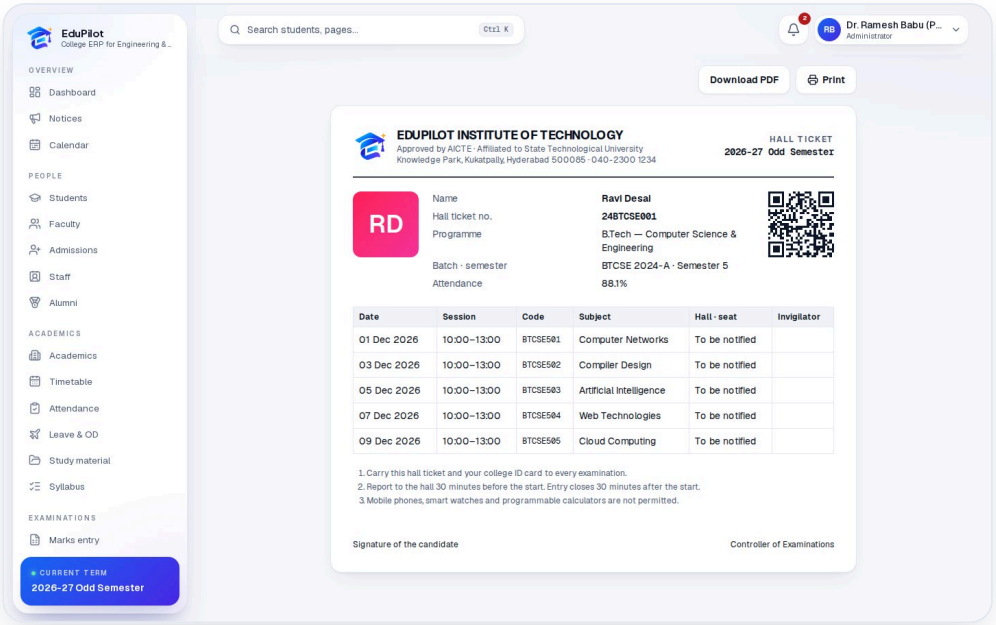

WHO USES IT

Admin

Hall tickets

Issued only to students who meet the attendance and fee rules.

WHAT IT DOES

- A student is eligible with 75% attendance, or 65–75% with approved medical leave, and no overdue fee.
- The list states the exact reason a ticket is withheld.
- The ticket shows photo, exam dates, sessions, hall and seat, with a QR code, and prints or downloads as a PDF.
- Students download their own ticket once eligible.
- All eligible tickets for a batch download as one PDF, ready to print in a single run.

WHO USES IT

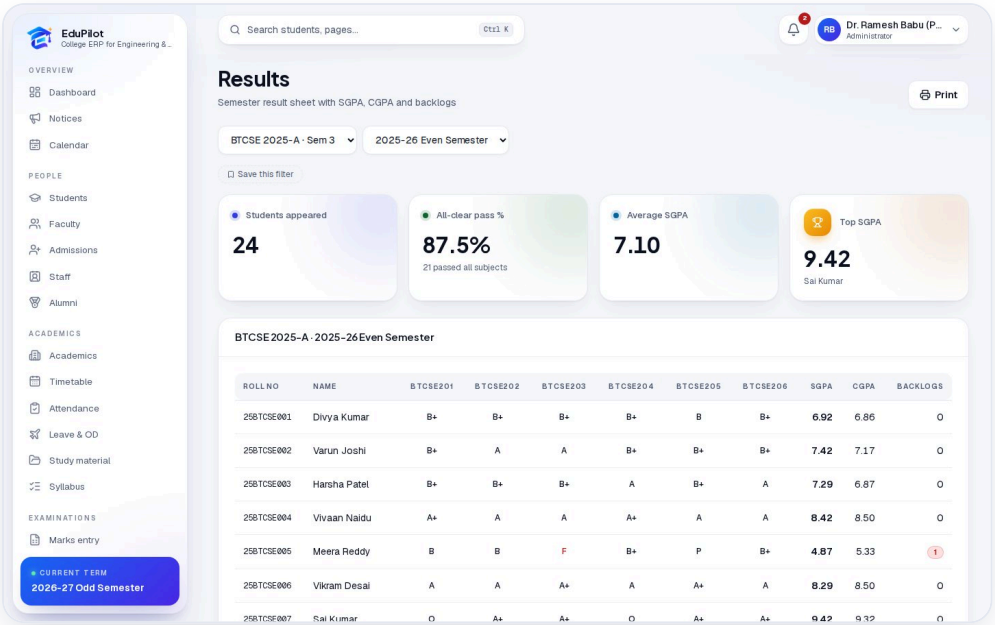

Admin · Student

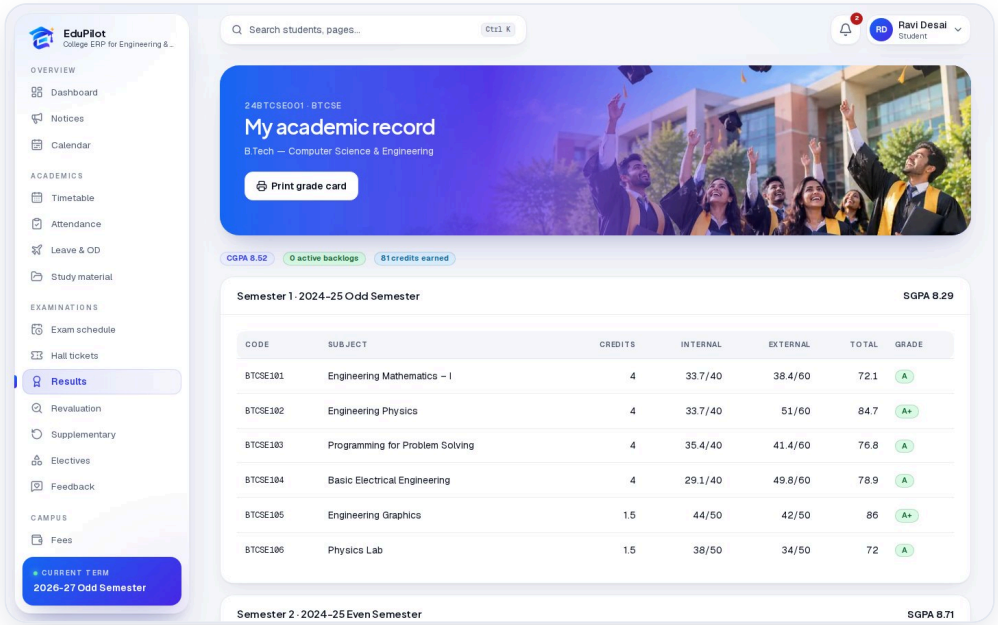

HOW IT WORKS

1. EduPilot checks attendance and fees
2. Eligible students get a ticket
3. Others see the reason
4. Clearing the dues or shortage releases it

Results and grade cards

Grades, SGPA and CGPA calculated the moment marks are published.

WHAT IT DOES

- Ten-point grading: O, A+, A, B+, B, C, P and F (or AB).
- Pass rule: at least 40% in total and at least 35% in the end-semester exam by default. Both, and the grade scale, are set under Administration → Rules.
- Batch result sheet with students appeared, all-clear pass percentage, average SGPA and the topper.
- Backlogs are tracked, and a later pass clears them.
- Students see every semester's results and print a grade card.

WHO USES IT

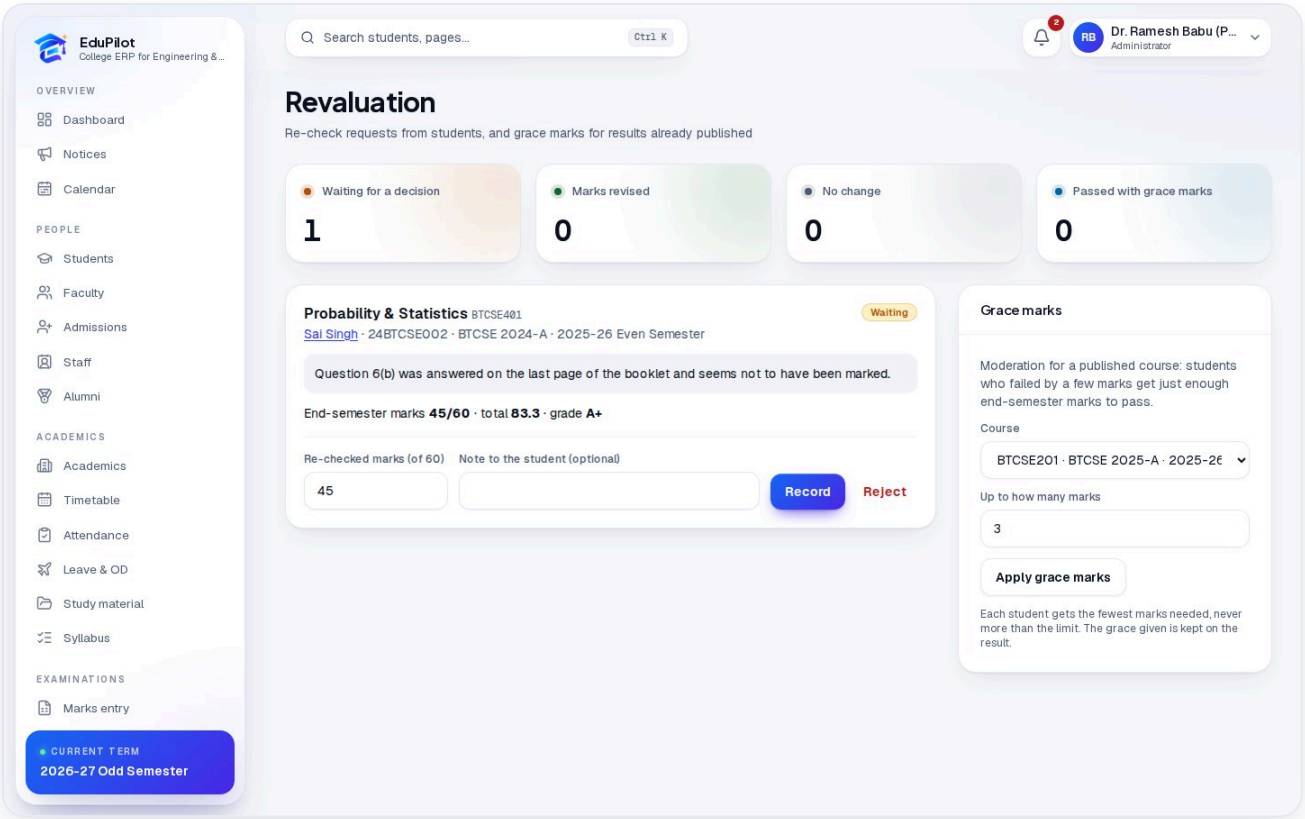

Admin · HOD · Student · Parent

HOW IT WORKS

1. Marks are published
2. Grades and SGPA are computed
3. Students are notified
4. Grade card is printed

Revaluation and grace marks

Correct a published result properly, with a record of who changed what.

HOW IT WORKS

1. Student requests a re-check
2. Examiner enters the re-checked marks
3. Result updates
4. Student is notified

WHAT IT DOES

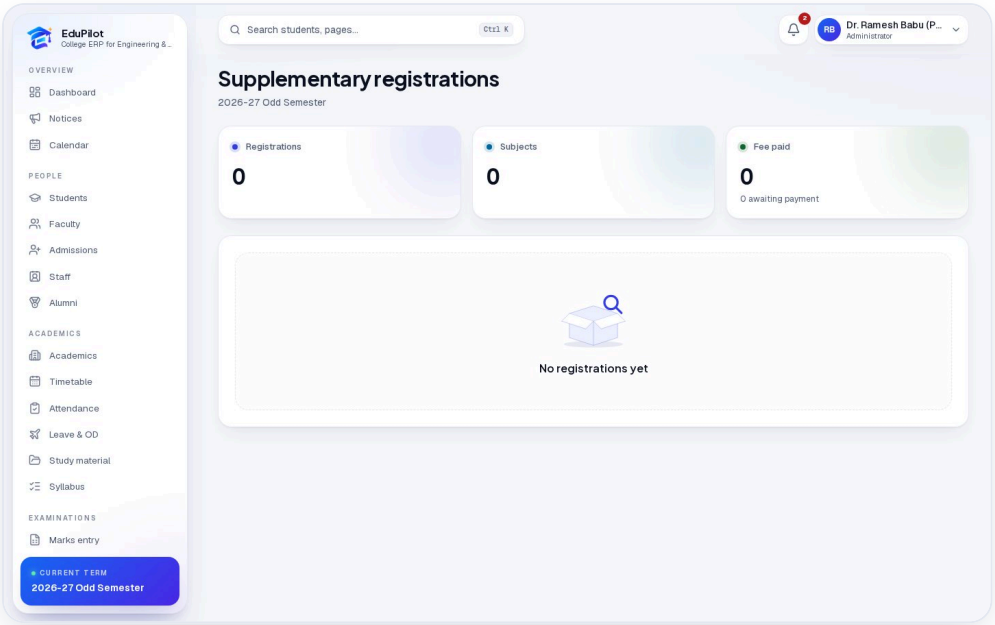

- A student asks for an end-semester paper to be re-checked, with a reason. One request per subject.
- The HOD or administrator enters the re-checked marks. The published result, grade, SGPA, CGPA and backlogs follow automatically.
- Marks can go up or down. If nothing changed, the request is closed as “no change”. The student is notified either way.
- Grace marks (moderation): for a published course, students who failed within a set number of marks get just enough to pass.
- Grace given is kept on each result, and every change is in the audit log.

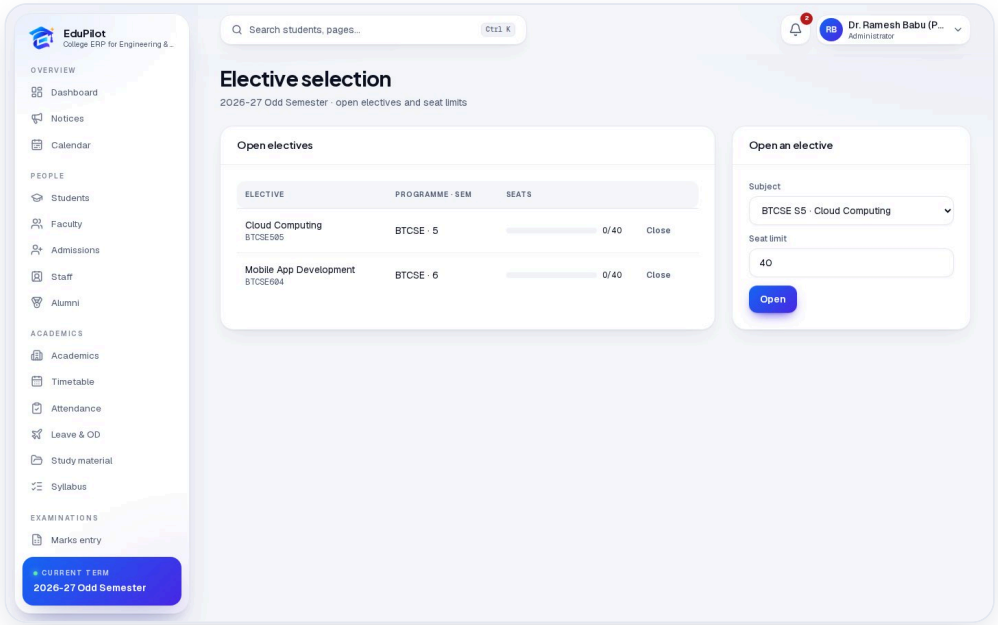

WHO USES IT

Student · HOD · Admin

Supplementary exams and electives

Backlog registration with an automatic fee, and seat-limited elective choice.

WHAT IT DOES

- A student with backlogs registers for the supplementary exam and picks the subjects.
- A fee invoice is raised automatically for the registration.
- Electives: the office opens electives with a seat limit; each student chooses one per semester until seats run out.

WHO USES IT

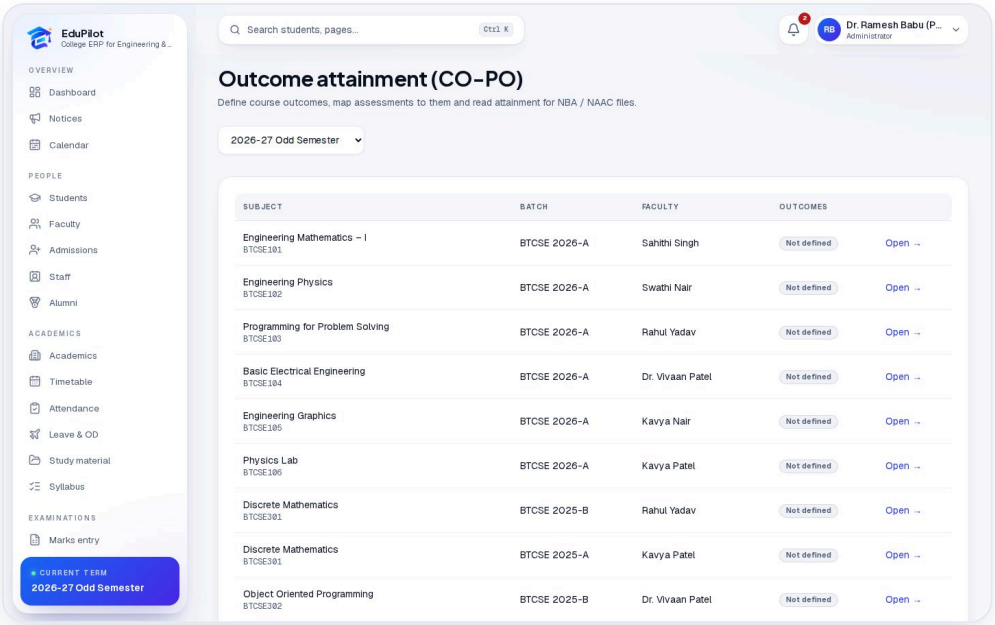

Student · Admin

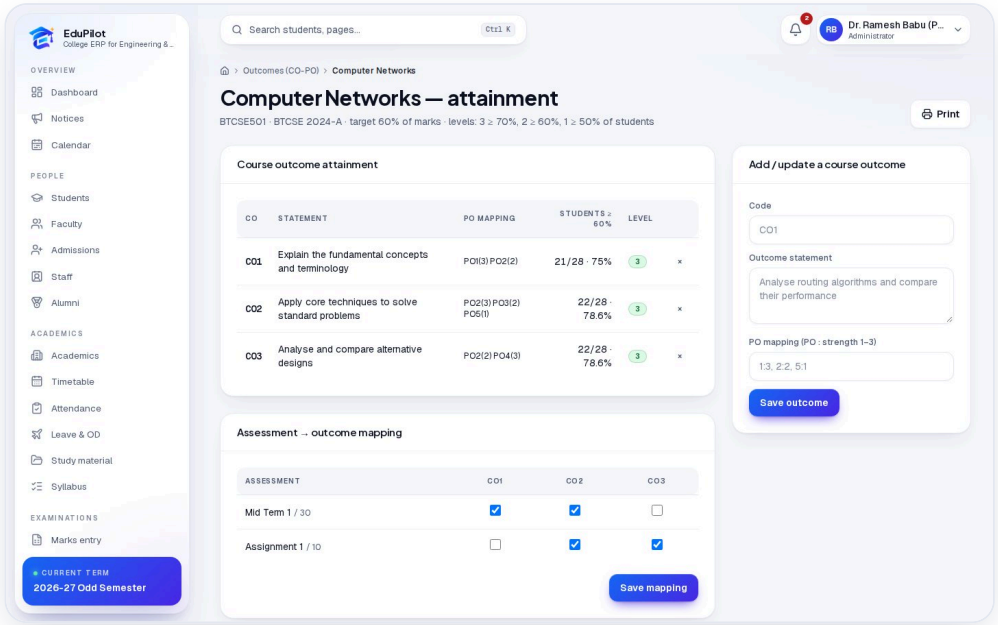

HOW IT WORKS

1. Student registers for backlog subjects
2. Invoice is raised
3. Student pays
4. Marks entered as usual

Outcome attainment (CO–PO)

Course outcomes mapped to assessments, for NBA and NAAC files.

WHAT IT DOES

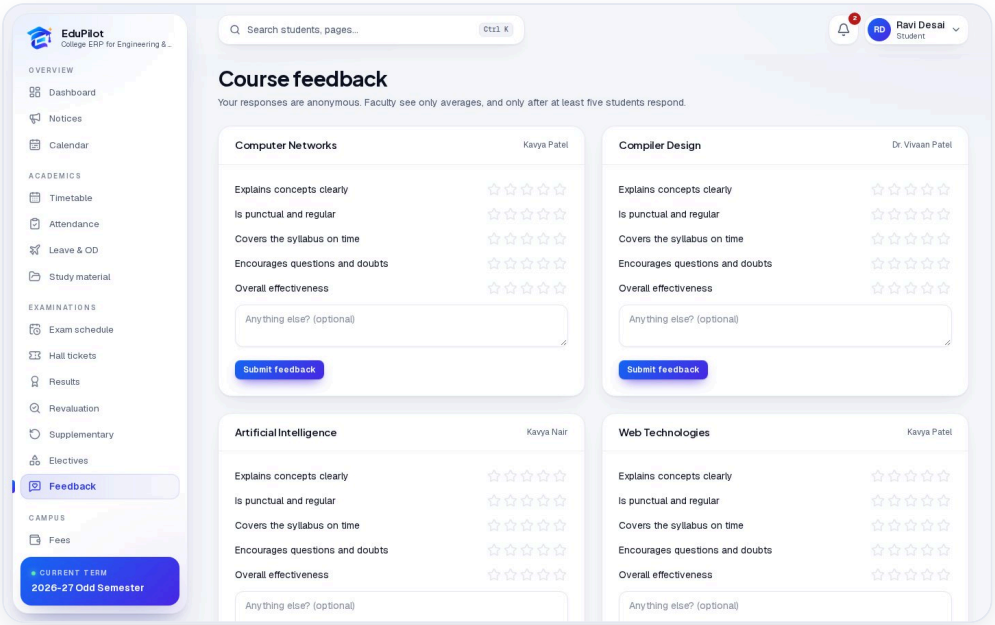

- Define course outcomes (CO1, CO2 …) for a subject and map each to programme outcomes with a strength of 1 to 3.
- Map assessments to the outcomes they test.
- Attainment levels are calculated from marks against a target (for example 60% of marks by 70%, 60% or 50% of students).
- A programme-outcome chart summarises the result, and the page prints cleanly.

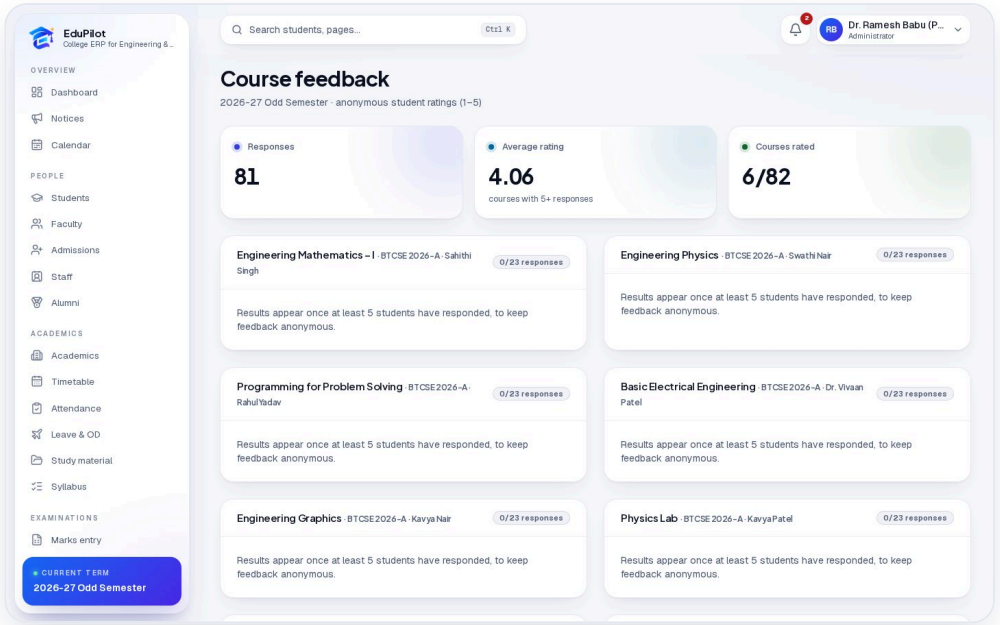

WHO USES IT

Faculty · HOD · Admin

Course feedback

Anonymous ratings from students on every course.

WHAT IT DOES

- Five questions rated from one to five, with an optional comment.
- Responses are anonymous. Staff see only averages.
- Results for a course appear only after at least five students have responded.

WHO USES IT

Student · Faculty · HOD · Admin

HOW IT WORKS

1. Student rates each course
2. Responses are pooled
3. Averages appear after five responses

SECTION 7

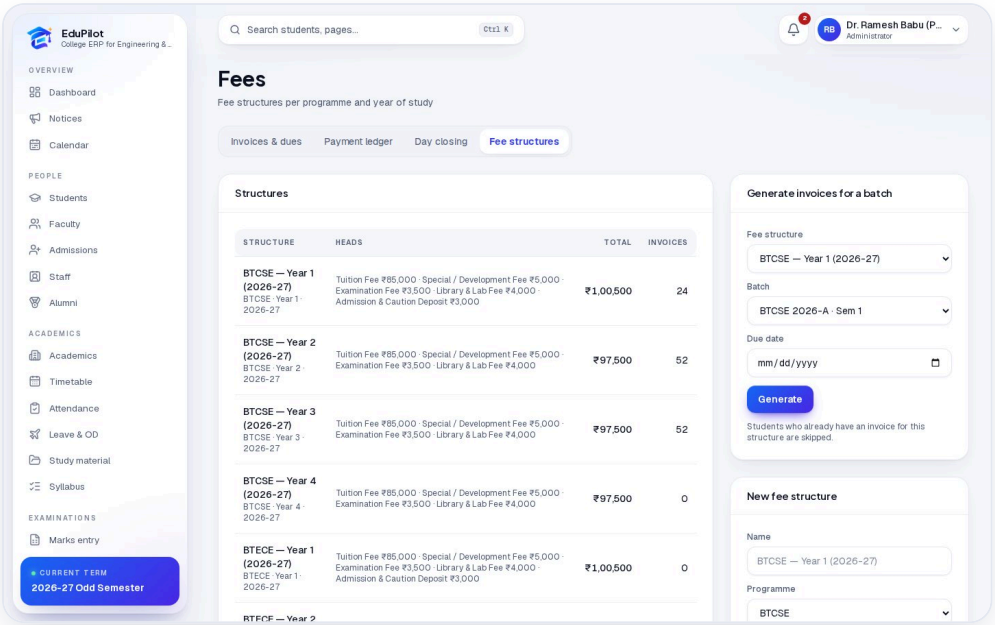

Fees and finance

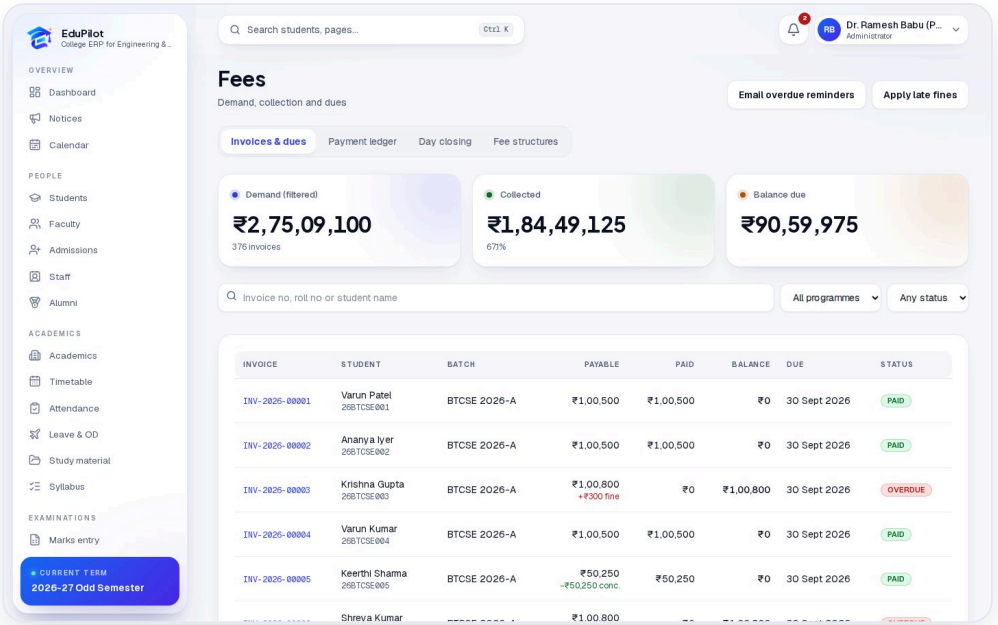

Structures, invoices, collection, receipts, online payment and scholarships.

- Fee structures and invoices
- Invoice, instalments and late fines
- Day book and receipts
- Online fee payment
- Scholarships and reimbursements
- Refunds and day closing
- Fee statement and no-dues certificate

Fee structures and invoices

Set the fee once per programme and year, then raise invoices for a whole batch.

WHAT IT DOES

- A structure lists the heads (tuition, development, examination, library and lab, and so on) for one programme and year.
- Generate raises an invoice for every student in a batch. Students who already have one are skipped.
- The invoice list shows payable, paid, balance, due date and status: paid, partial, pending or overdue.
- Filter by programme and status; email reminders to everyone overdue in one click.

WHO USES IT

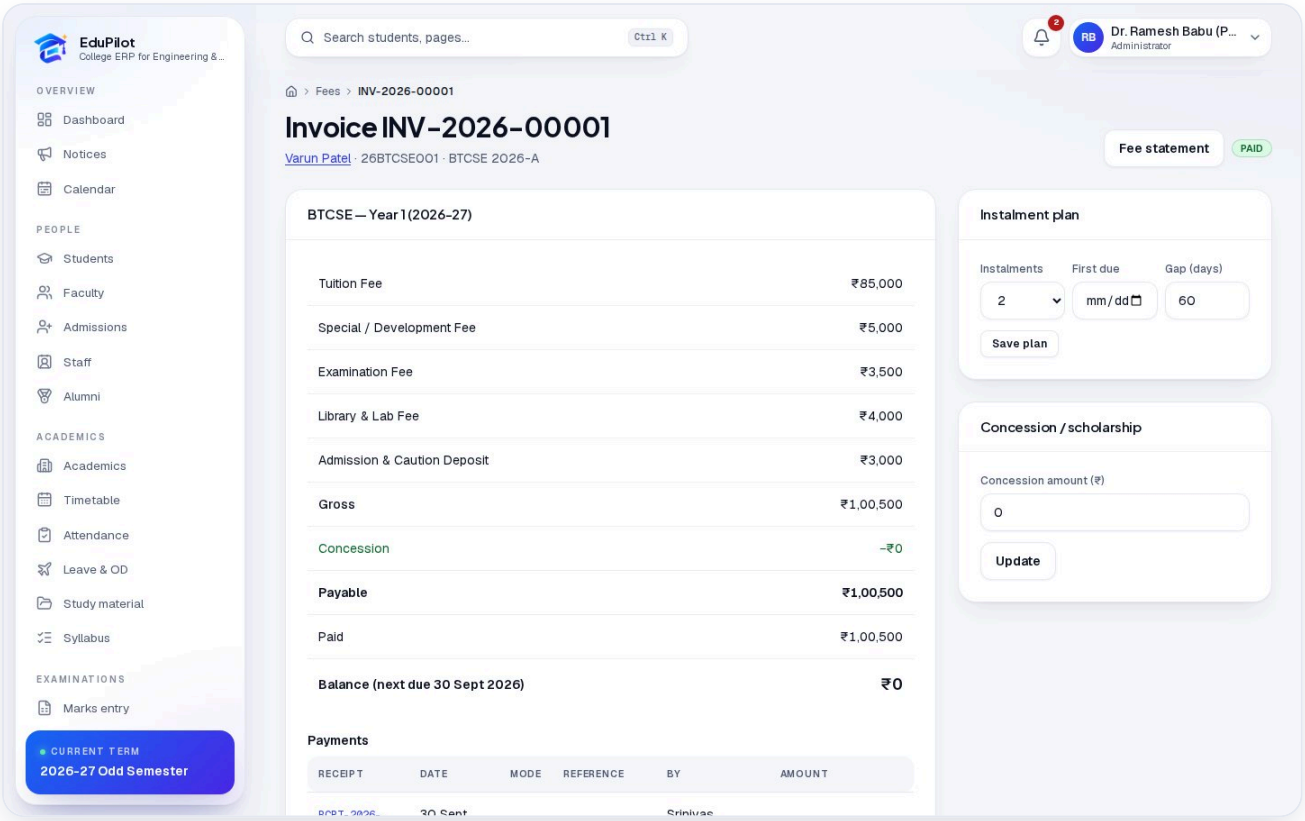

Accounts · Admin

HOW IT WORKS

1. Create the fee structure
2. Generate invoices for a batch
3. Students see the invoice
4. Collect and track

Invoice, instalments and late fines

Everything about one student's fee on a single page.

HOW IT WORKS

1. Open the invoice
2. Record the payment and mode
3. Receipt is created
4. Student and parent are notified

WHAT IT DOES

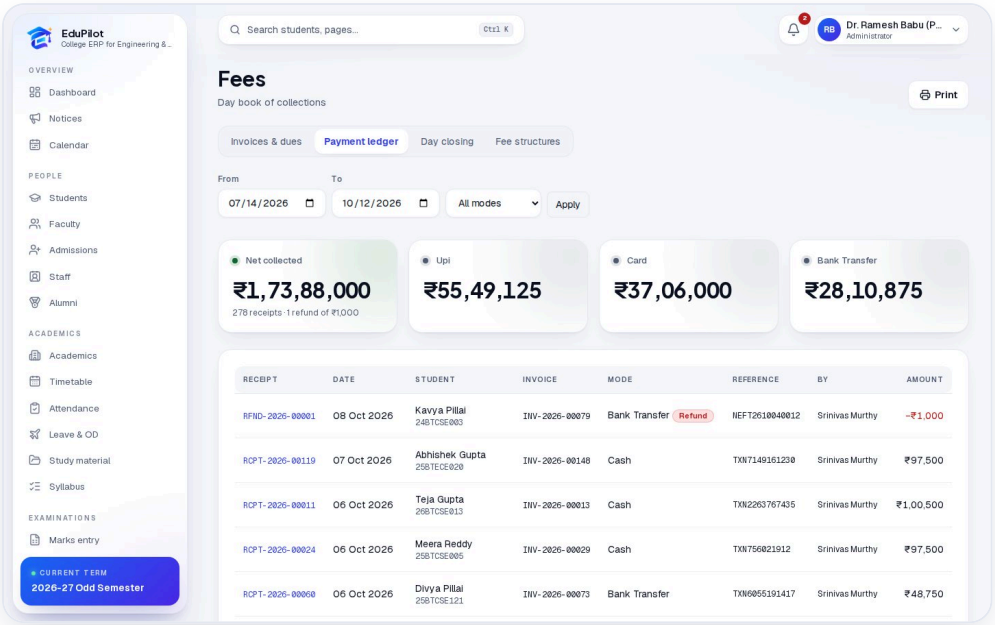

- Fee heads, concession or scholarship, amount payable, paid and balance.
- Split an invoice into instalments, each with its own due date.
- A per-day late fine with an upper cap can be applied to overdue invoices, and waived by the administrator.
- Record a payment at the counter by cash, UPI, card, bank transfer or demand draft.
- Refund a receipt from the same page, and open the student's fee statement.

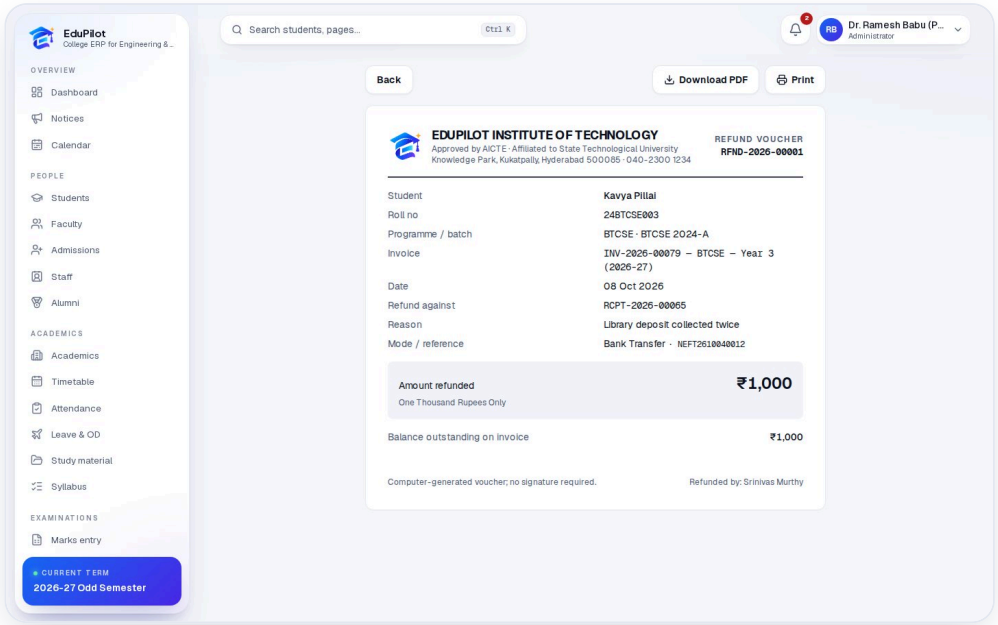

WHO USES IT

Accounts · Admin

Day book and receipts

Every payment in order, and a receipt for each one.

WHAT IT DOES

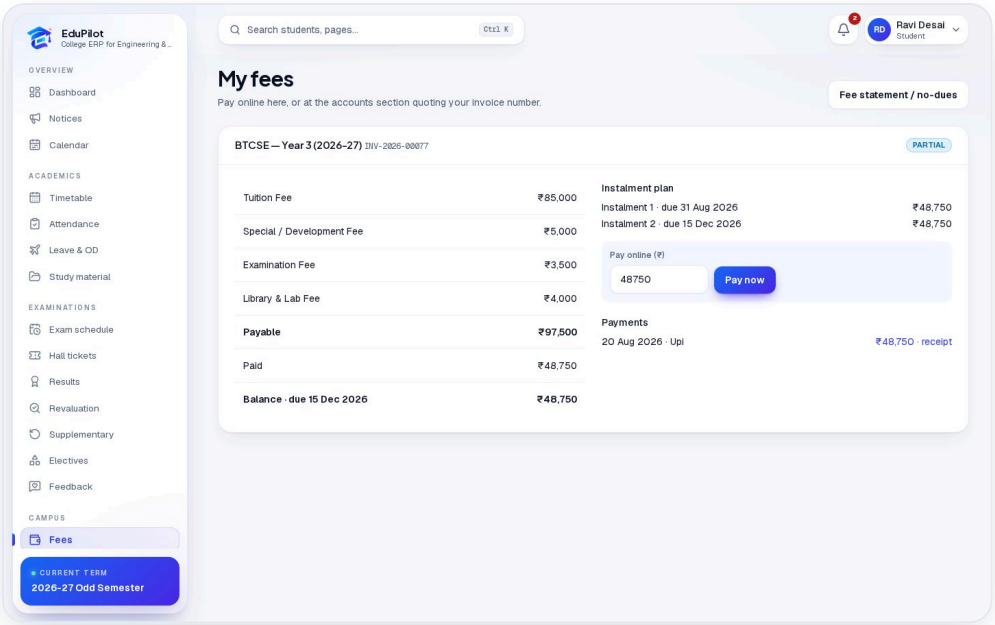

- The payment ledger filters by date range and mode, with totals for each mode.
- Receipts are numbered in sequence and carry the amount in words.
- Each receipt prints on the college letterhead and downloads as a PDF.
- The receipt is emailed to the student when a mail server is connected.

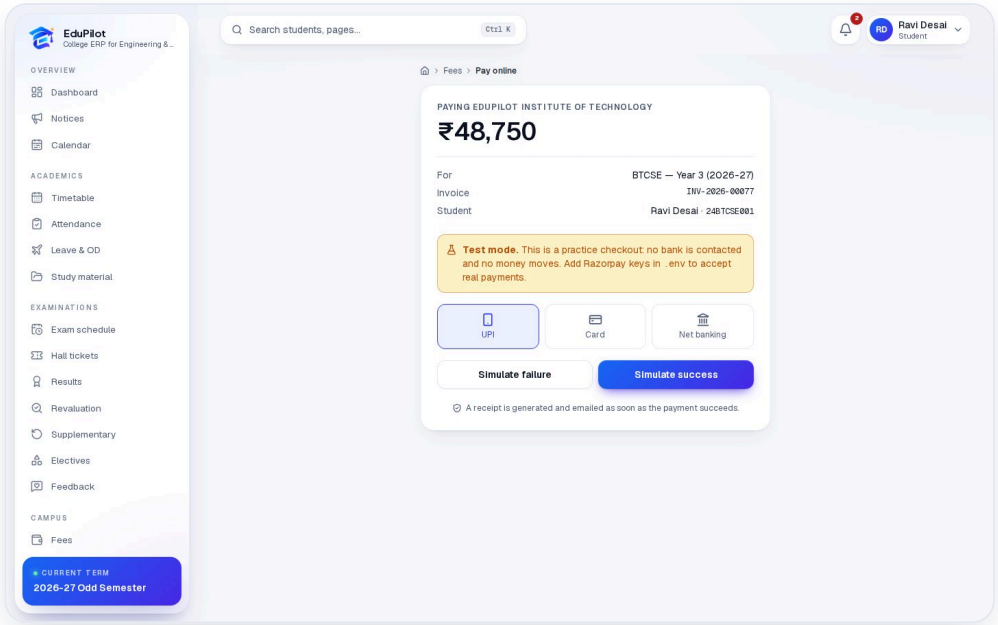

WHO USES IT

Accounts · Admin

Online fee payment

Students and parents pay from their own login.

WHAT IT DOES

- My fees shows each invoice, the instalment plan, payments made and the balance.
- Pay now opens the checkout for the amount due.
- A built-in test checkout lets the college try the whole flow without a payment account.
- With Razorpay keys entered, real payments go through Razorpay. This path follows Razorpay's documented flow and should be tried with the college's own account before going live.
- The receipt is created only after the payment is verified.

WHO USES IT

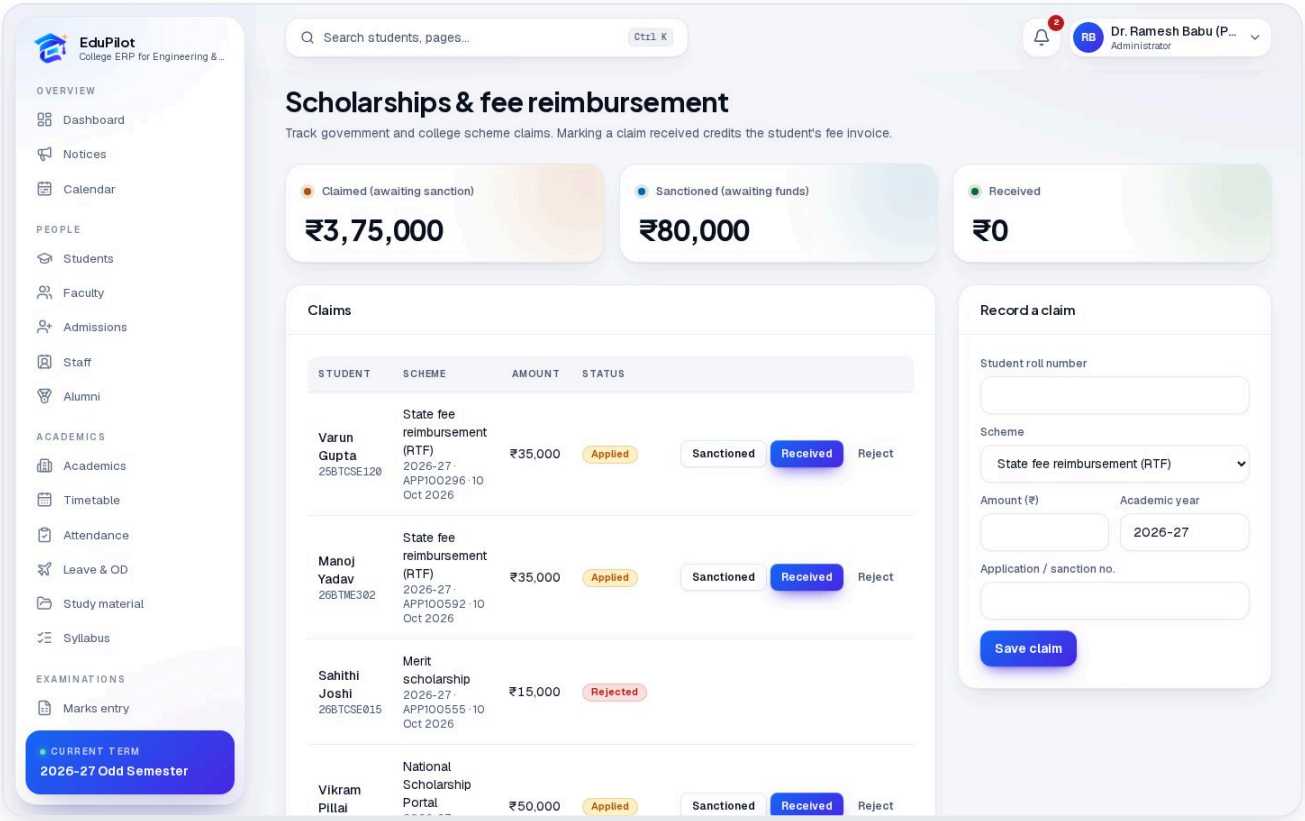

Student · Parent

HOW IT WORKS

1. Student opens My fees
2. Clicks Pay now
3. Pays at the checkout
4. Payment is verified
5. Receipt appears and is emailed

Scholarships and reimbursements

Track government and college scheme claims until the money arrives.

HOW IT WORKS

1. Record the claim
2. Mark it sanctioned
3. Mark it received
4. Invoice balance is reduced

WHAT IT DOES

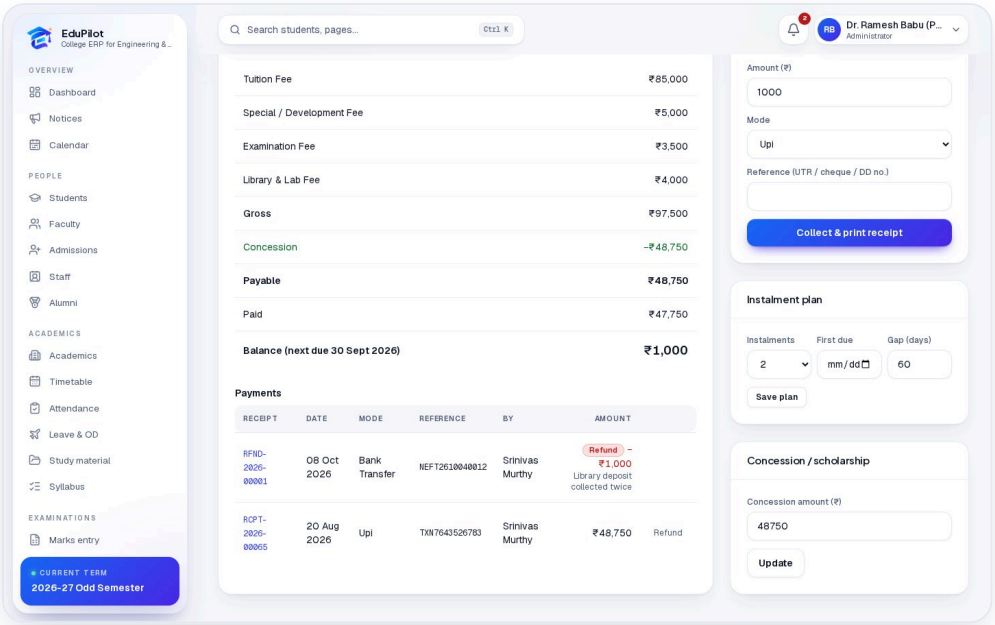

- Record a claim against a student with scheme, amount, academic year and application number.
- Stages: applied, sanctioned, received or rejected.
- Marking a claim received credits the student's invoice automatically.
- Tiles show the totals claimed, sanctioned and received.

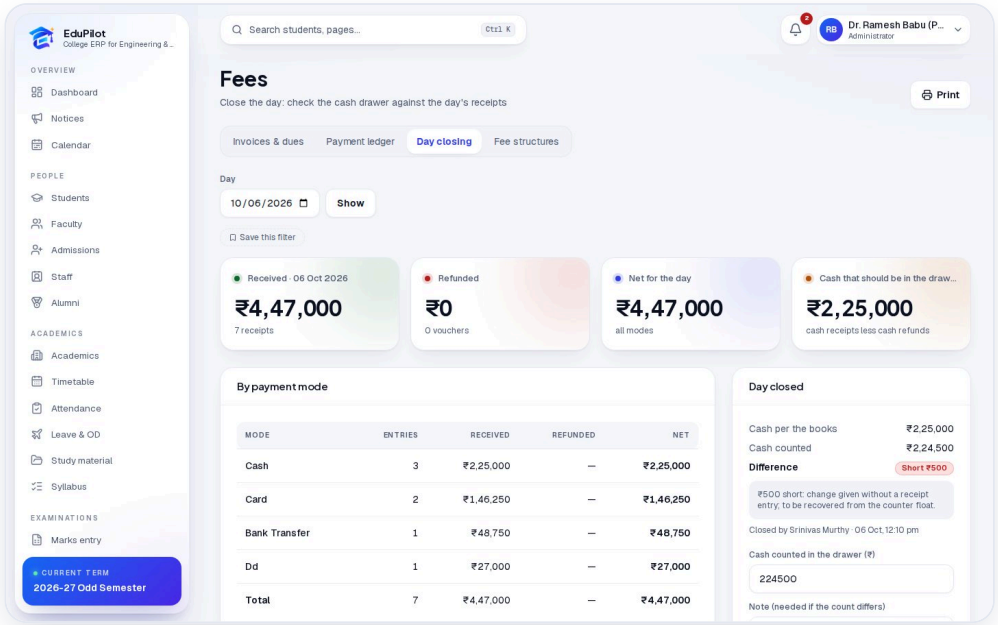

WHO USES IT

Accounts · Admin

Refunds and day closing

Pay money back against a receipt, and check the cash drawer against the books every evening.

WHAT IT DOES

- Refund all or part of any receipt, with a reason. The refund gets its own voucher number and reduces the amount paid on the invoice.
- A receipt can never be refunded for more than was paid on it.
- Day closing totals the day's receipts and refunds by payment mode and by cashier.
- Enter the cash counted in the drawer. A difference from the books must be explained in a note before the day can be closed.
- Each closing is kept, shown as tallied, short or excess, and prints as a report.

WHO USES IT

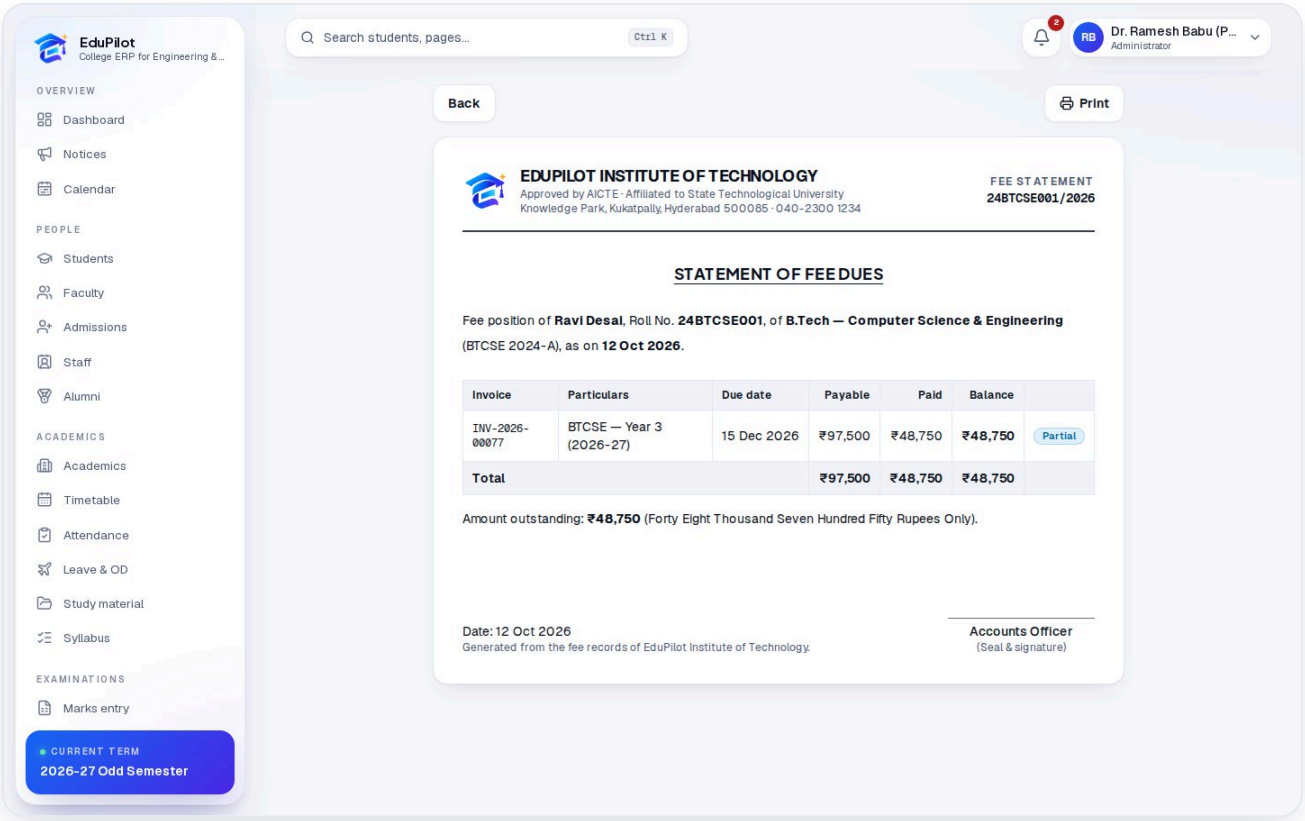

Accounts · Admin

HOW IT WORKS

1. Open Day closing
2. Check the totals by mode
3. Count the cash and enter it
4. Explain any difference
5. Close the day

Fee statement and no-dues certificate

One document with a student's complete fee position.

HOW IT WORKS

1. Open the student's fee statement
2. Print
3. Sign and seal

WHAT IT DOES

- Lists every invoice with amount payable, paid and balance.
- When nothing is outstanding it reads as a no-dues certificate, ready for the accounts officer's seal and signature.
- When a balance remains it is a statement of dues, with the amount in words.
- Students and parents open their own from My fees; the office opens anyone's from the student or invoice page.
- Prints on the college letterhead.

WHO USES IT

Accounts · Admin · Student · Parent

SECTION 8

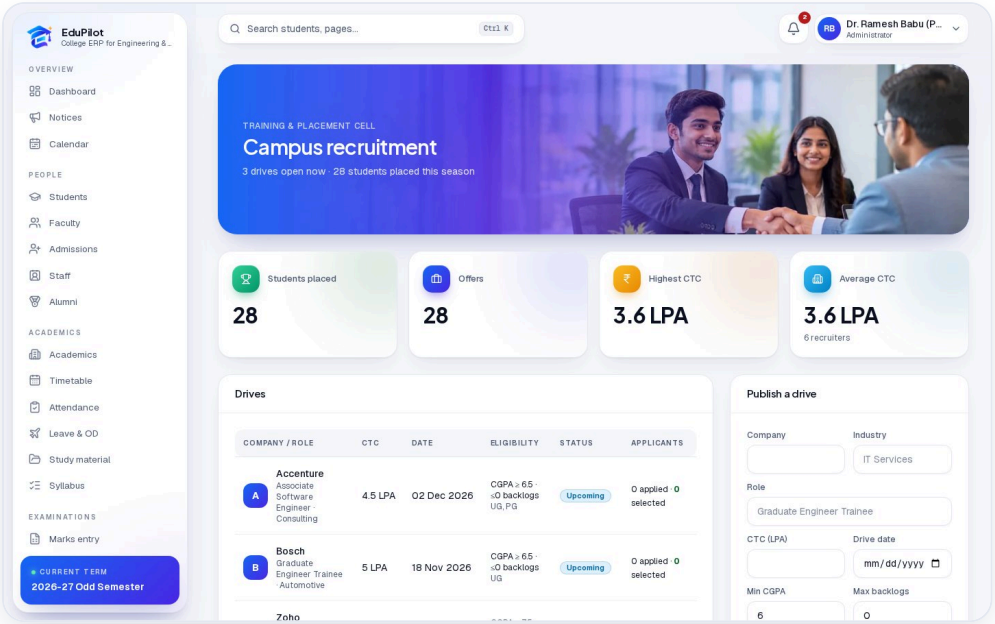

Campus and student services

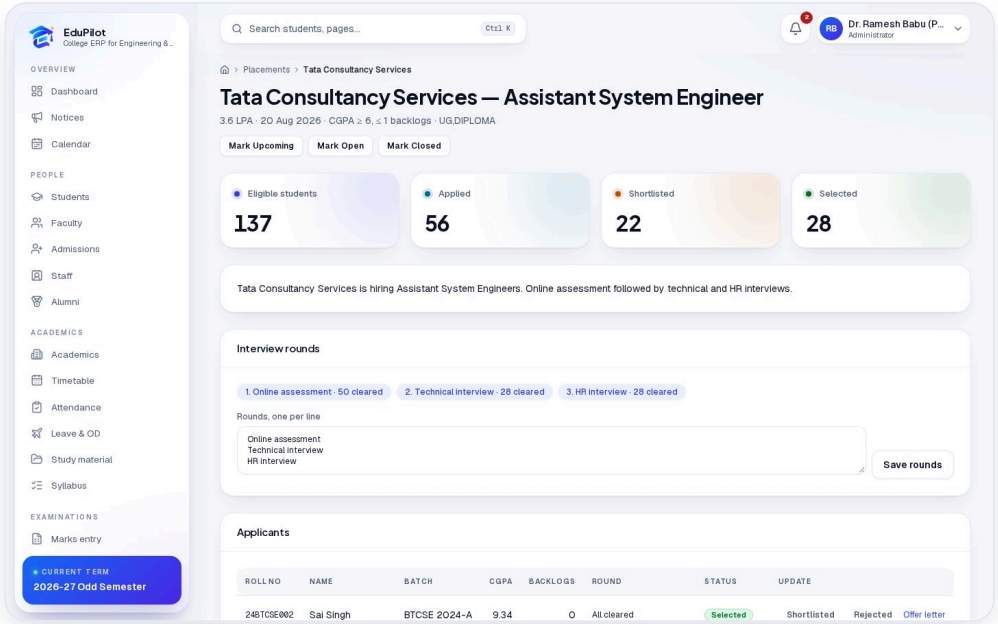

Placements, library, hostel, transport, certificates, helpdesk and notices.

- Placement drives
- Placements for students
- Library
- Hostel
- Transport
- Inventory
- Gate and visitors
- Certificates
- Helpdesk
- Notices and the notification centre

Placement drives

Publish a drive and let EduPilot work out who is eligible.

WHAT IT DOES

- A drive has the company, role, package, date and eligibility: programme level, minimum CGPA and maximum backlogs.
- Eligibility is checked automatically for every pre-final and final-year student.
- Interview rounds per drive; move applicants through shortlisted, selected or rejected.
- A selected student receives a notification and a placement confirmation letter.
- Tiles show students placed, offers, highest and average package.

WHO USES IT

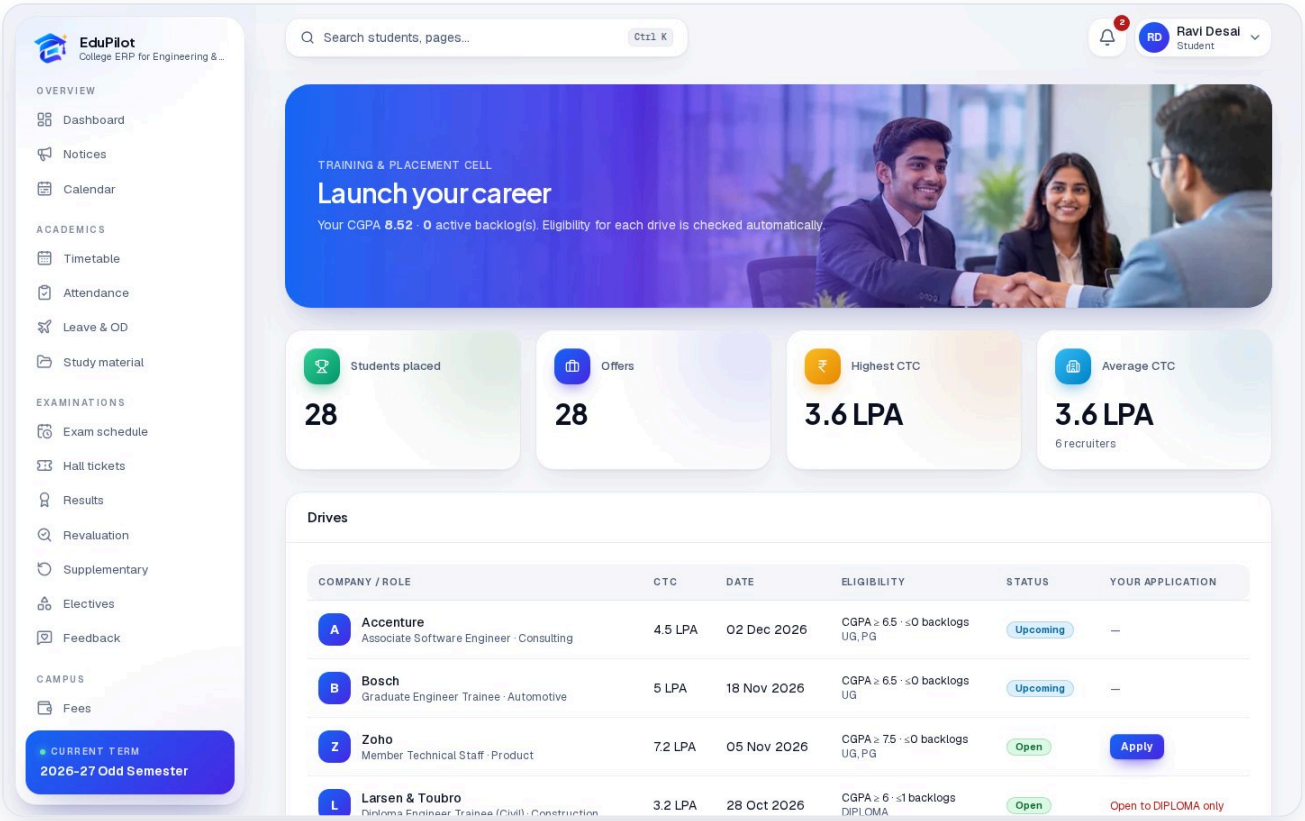

Admin · Student

HOW IT WORKS

1. Publish the drive
2. Eligible students apply
3. Shortlist through the rounds
4. Mark selected
5. Offer letter is issued

Placements for students

Students see only the drives they qualify for, and why they don't for the others.

WHAT IT DOES

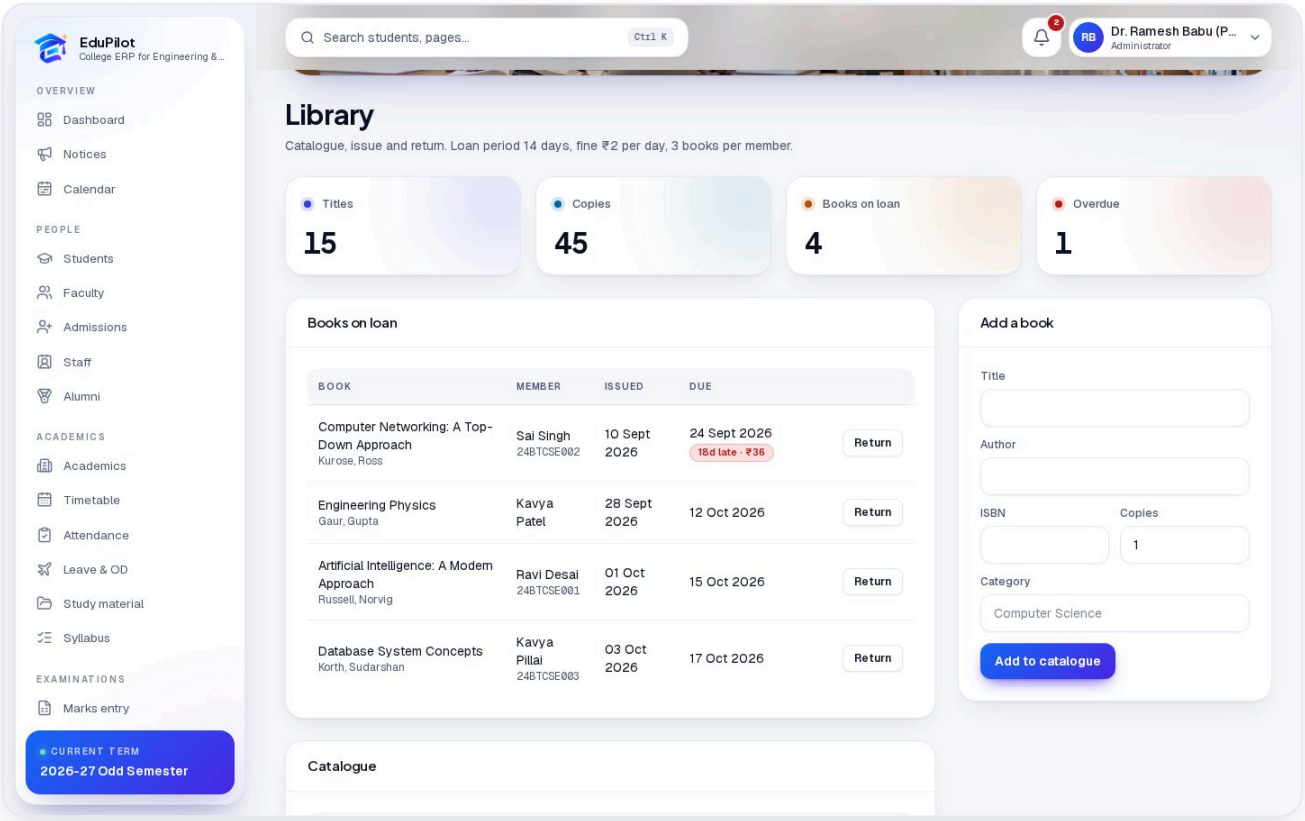

- Each drive shows package, date, criteria and the student's own application status.
- Apply is offered only when the student meets the criteria; otherwise the reason is shown.
- A résumé profile is kept alongside the academic record.

WHO USES IT

Student

Library

Catalogue, issue and return, with overdue fines.

WHAT IT DOES

- Catalogue with title, author, ISBN, category and number of copies.
- Issue a book to a member; loans run for 14 days.
- Overdue loans are flagged and a per-day fine is calculated on return.
- Students and staff search the catalogue and see the books they hold.

WHO USES IT

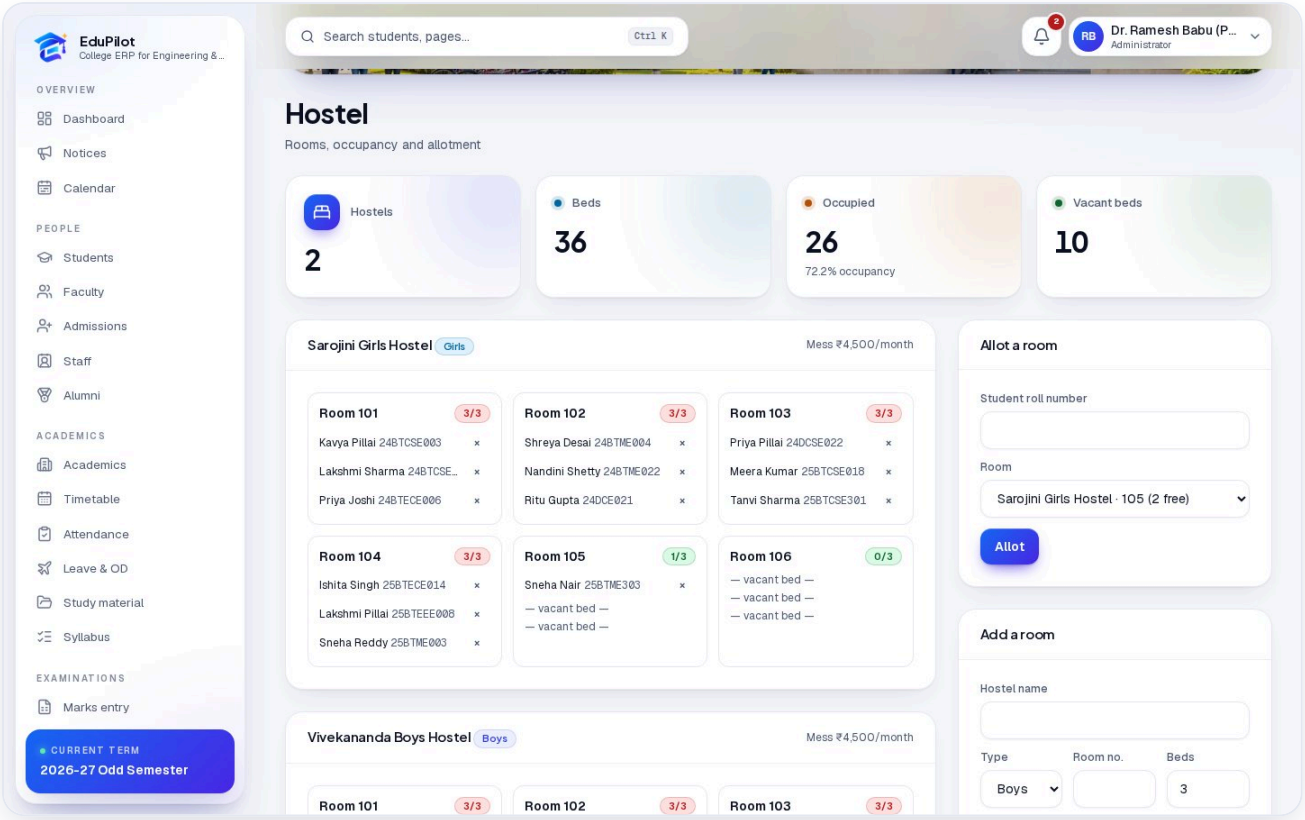

Admin · Office · Student · Faculty

HOW IT WORKS

1. Add books to the catalogue
2. Issue to a member
3. Return (fine if late)

Hostel

Hostels, rooms, beds and who is in each one.

WHAT IT DOES

- Separate boys' and girls' hostels; a student can only be allotted to the matching one.
- Each room shows its beds and occupants, with vacant beds visible at a glance.
- Tiles for hostels, total beds, occupied and vacant.

WHO USES IT

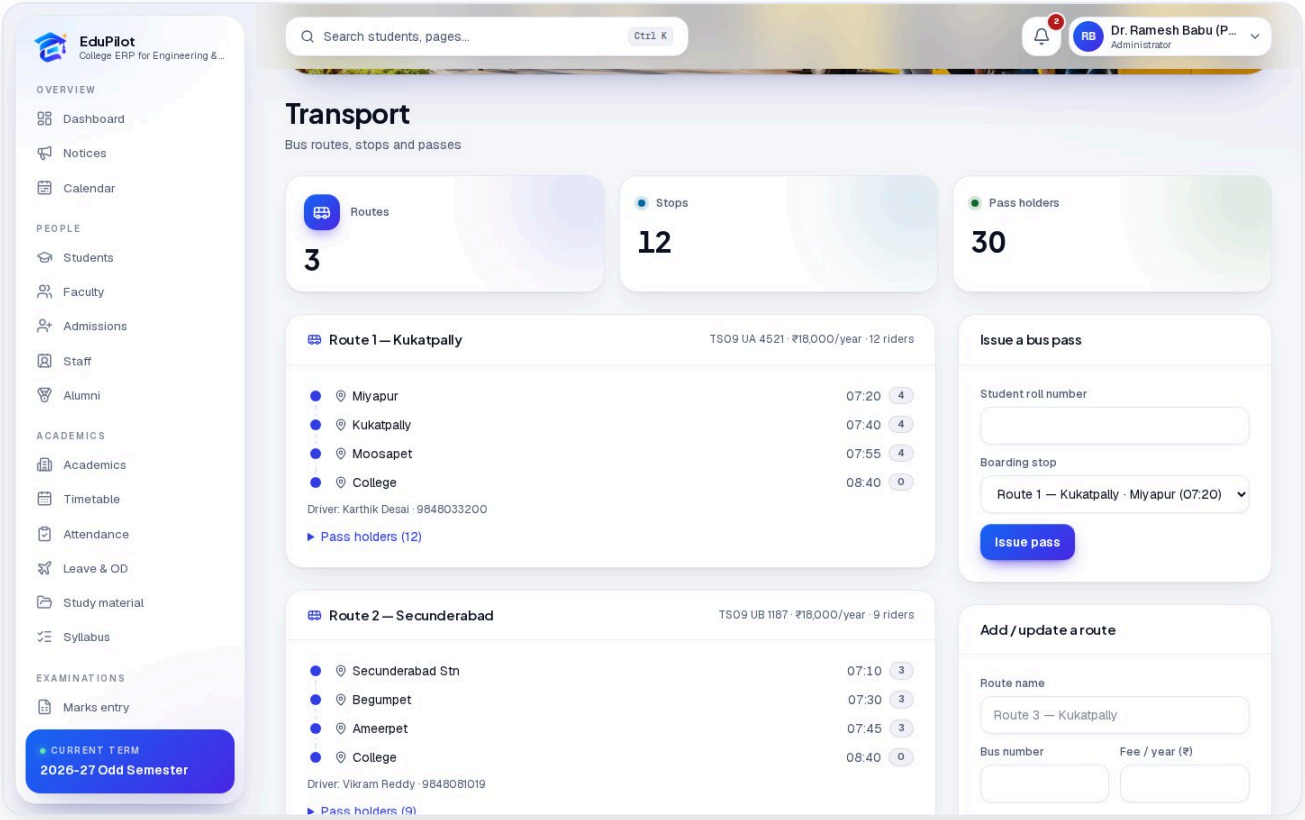

Admin · Office

HOW IT WORKS

1. Create the hostel and rooms
2. Allot a student to a room
3. Vacate at the end of the year

Transport

Bus routes, stops with pickup times, and passes.

HOW IT WORKS

1. Add the route and stops
2. Issue passes
3. See riders per stop

WHAT IT DOES

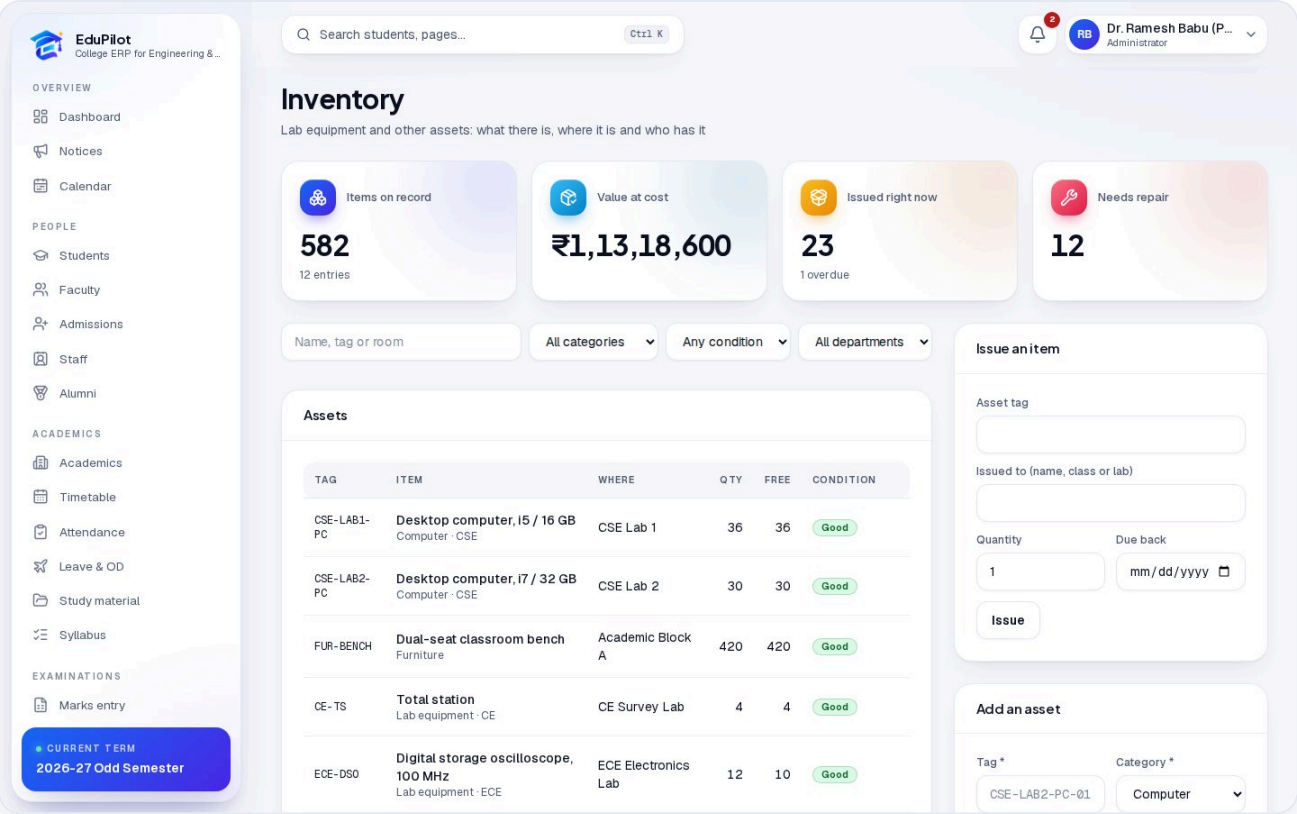

- Each route has its bus number, driver, yearly fee and an ordered list of stops with times.
- Issue a bus pass to a student for a route and boarding stop.
- The number of riders is shown per route and per stop.

WHO USES IT

Admin · Office

Inventory

Lab equipment and other assets: what there is, where it is, and who has it.

HOW IT WORKS

1. Add the asset with its tag
2. Issue it with a due date
3. Mark it returned

WHAT IT DOES

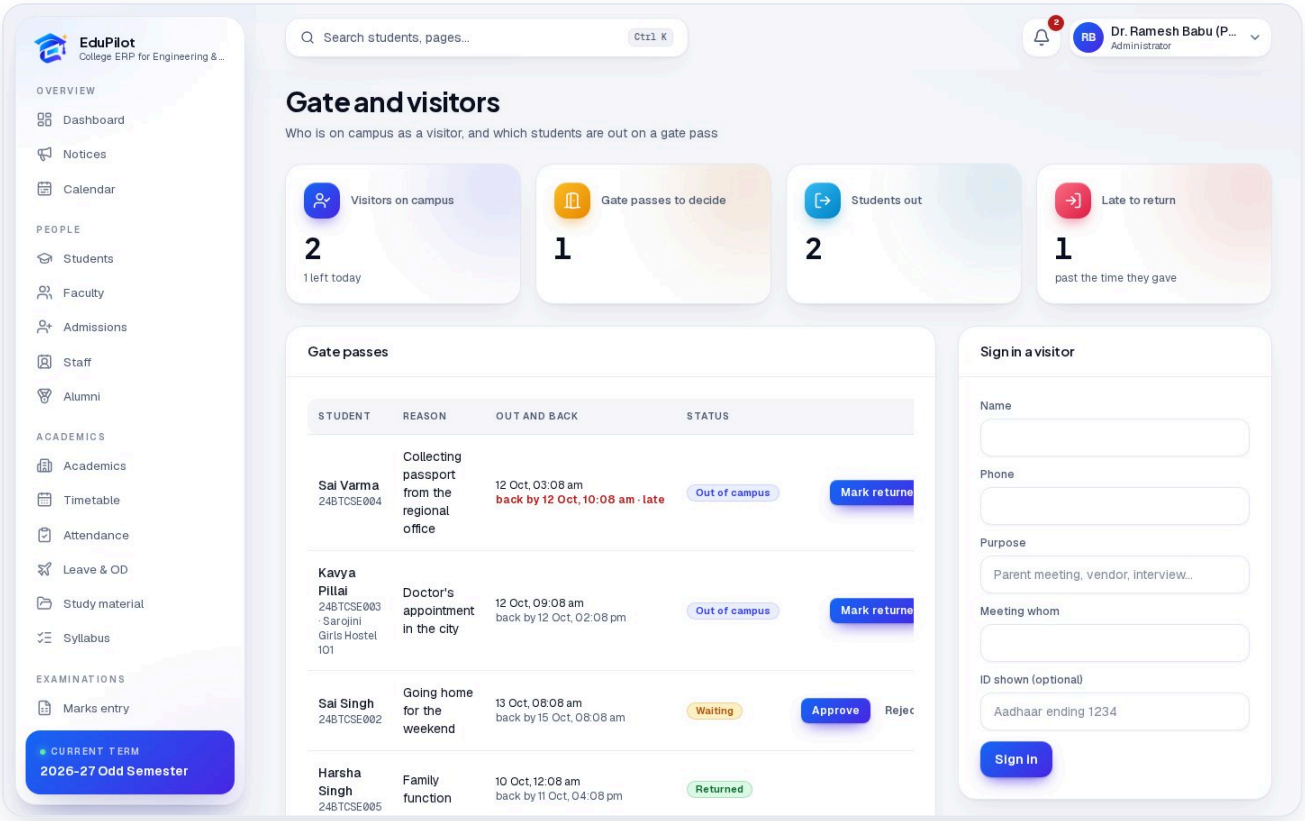

- Each asset has a tag, category, room or lab, quantity, cost, purchase date and condition.
- Issue a quantity to a person, class or lab with a due date; mark it returned when it comes back.
- Items past their due date are flagged as overdue, and more than is available cannot be issued.
- Tiles show total items, value at cost, how many are out and how many need repair.
- HODs see and manage their own department's assets.

WHO USES IT

Admin · HOD · Office

Gate and visitors

Who is on campus as a visitor, and which students are out.

HOW IT WORKS

1. Student requests a gate pass
2. Office approves
3. Marked out at the gate
4. Marked returned

WHAT IT DOES

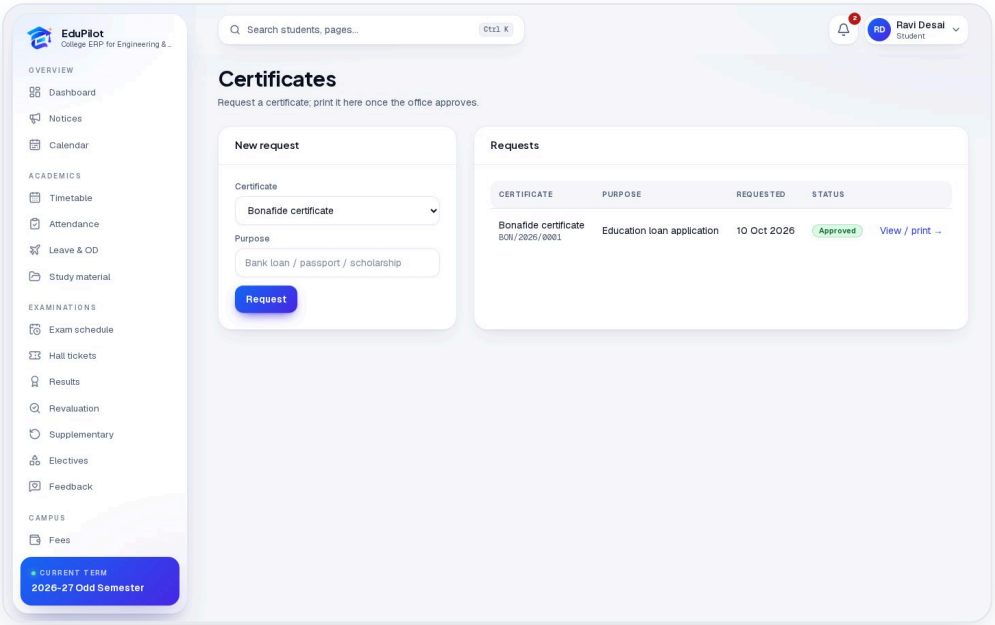

- Visitors are signed in with name, phone, purpose and who they are meeting, and signed out when they leave.
- A student asks for a gate pass with a reason and the times of leaving and returning.
- The office approves or rejects it, marks the student out at the gate, and marks them back on return.
- Students who are past the time they gave are shown as late, with their hostel room.

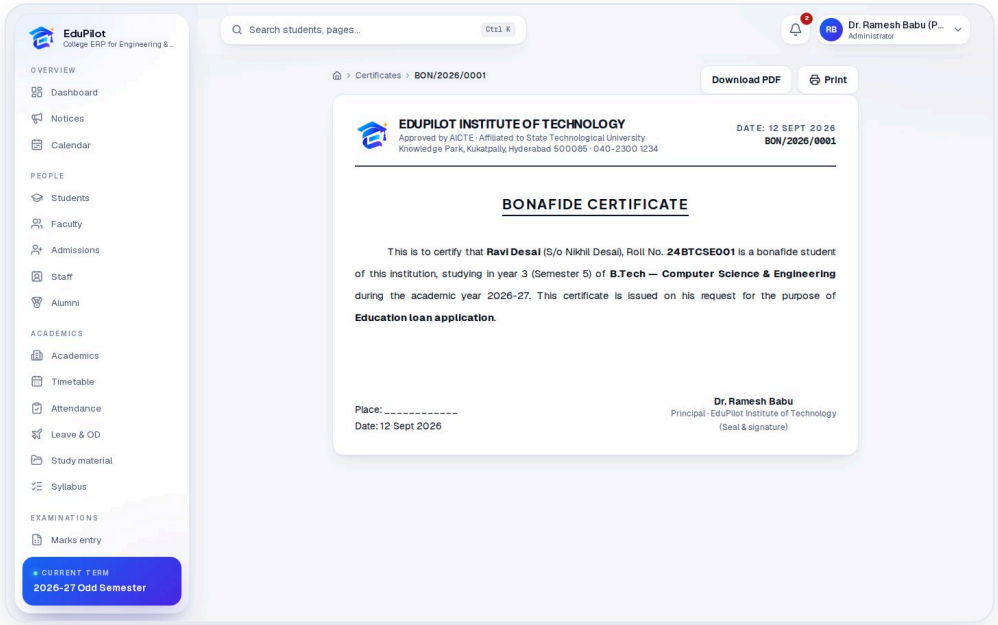

WHO USES IT

Office · Admin · Student

Certificates

Bonafide, study, conduct and transfer certificates without a visit to the office.

WHAT IT DOES

- The student chooses the certificate and states the purpose.
- The office approves or rejects the request.
- An approved certificate gets a serial number and is printed on the college letterhead with the principal's name, or downloaded as a PDF.
- For a scholarship round, the office issues the same certificate to every student of a batch in one step, each with its own serial number, and prints them together.

WHO USES IT

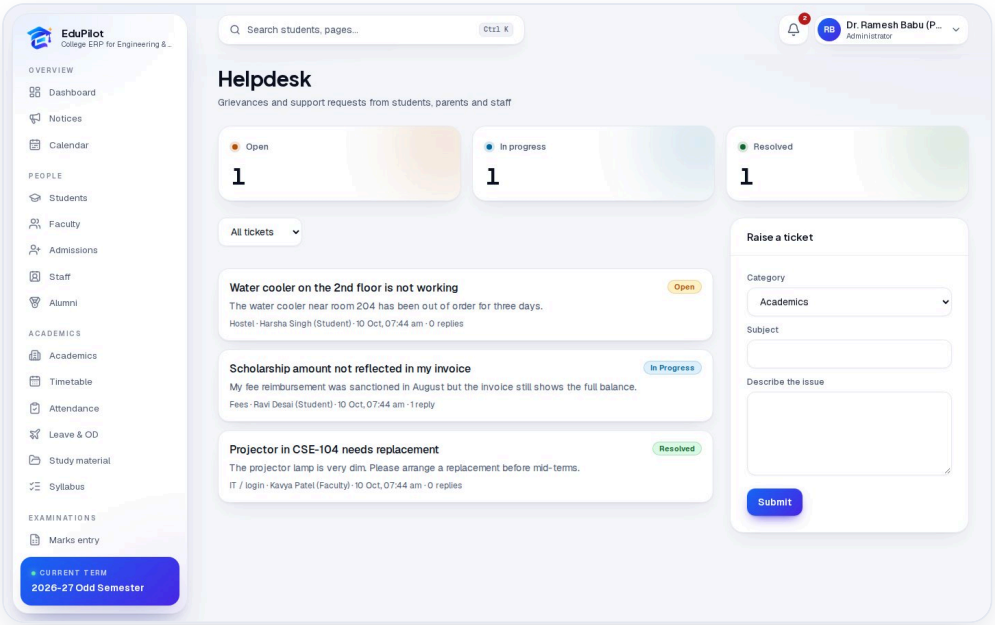

Student · Admin · Office

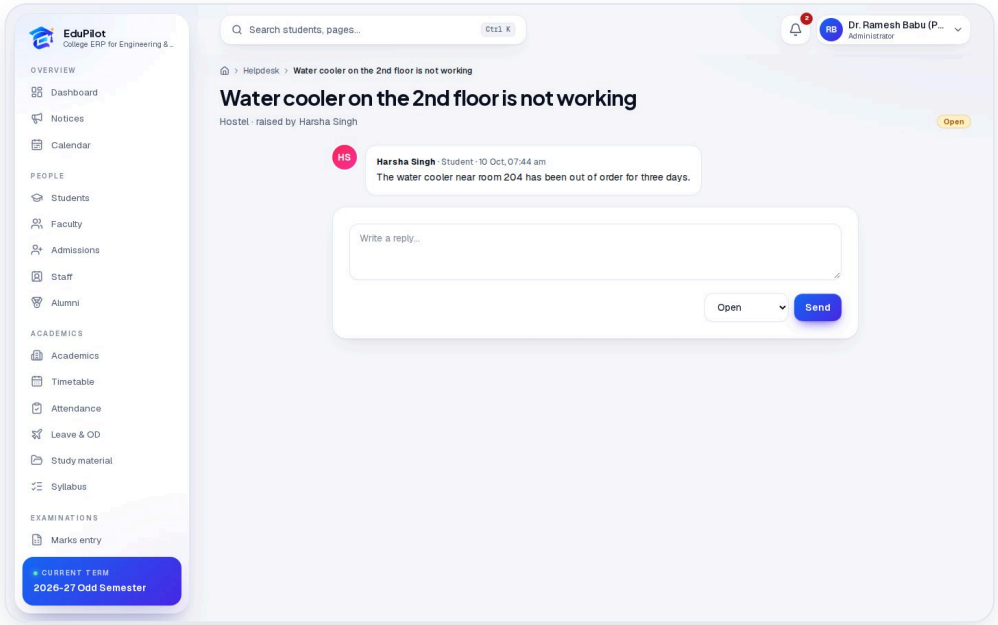

HOW IT WORKS

1. Student requests
2. Office approves
3. Serial number is issued
4. Student prints or downloads

Helpdesk

Grievances and support requests, tracked to resolution.

WHAT IT DOES

- Tickets have a category, a subject and a description.
- Replies form a thread, so the whole conversation stays in one place.
- Status moves from open to in progress to resolved, and the person who raised it is notified of each reply.

WHO USES IT

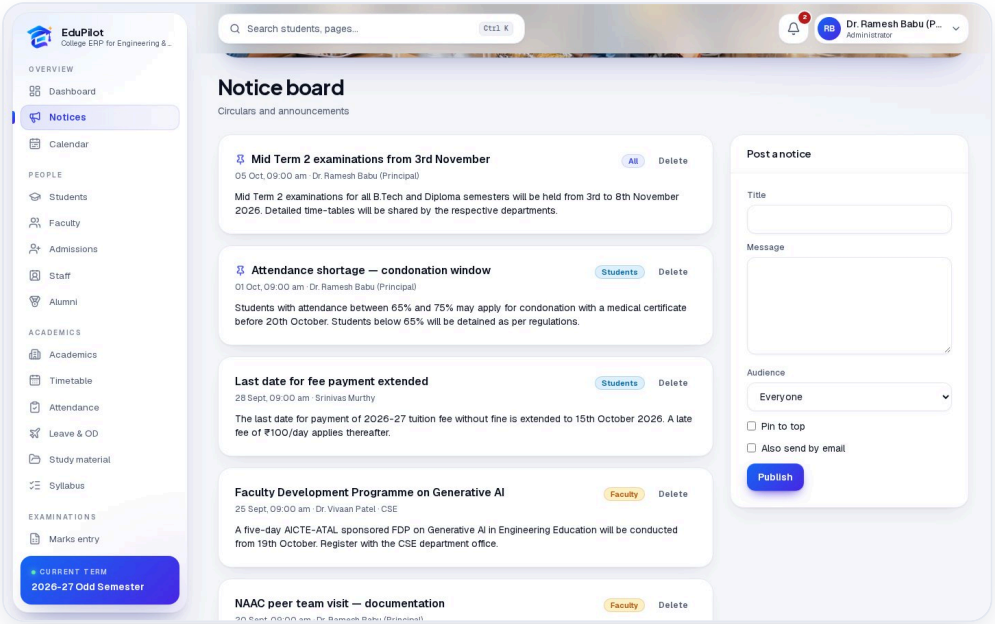

Student · Parent · Faculty · Admin · Office

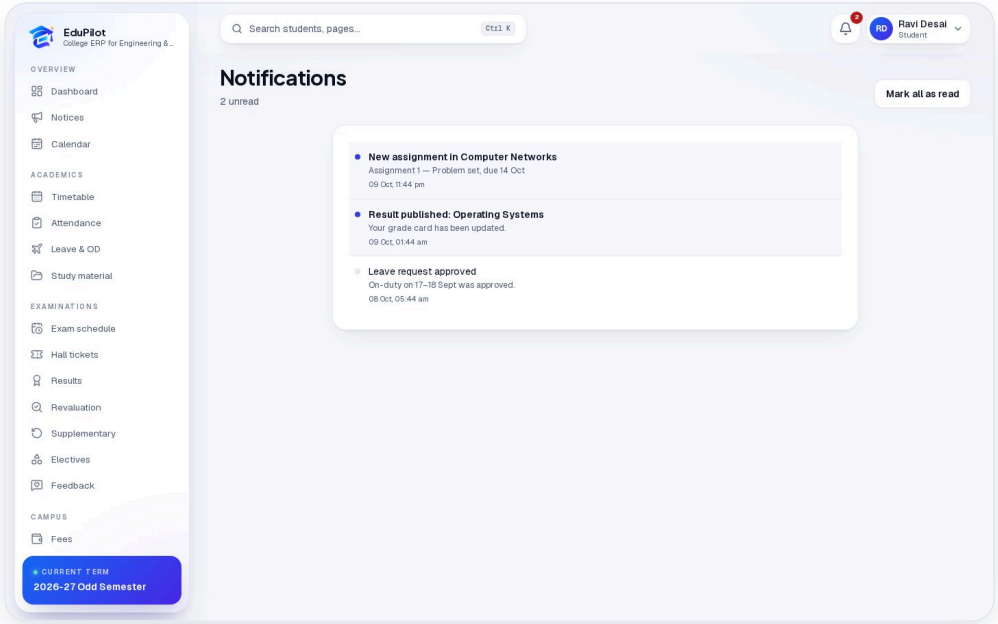

HOW IT WORKS

1. Raise a ticket
2. Office replies
3. Status is updated
4. Ticket is resolved

Notices and the notification centre

Circulars for everyone, and a personal inbox for each person.

WHAT IT DOES

- Post a notice to everyone, to students only or to staff only. Important notices can be pinned to the top.
- A notice can also be sent by email.
- The notification centre lists everything addressed to one person, newest first, with Mark all as read.

WHO USES IT

Admin · HOD · Faculty · Student · Parent

SECTION 9

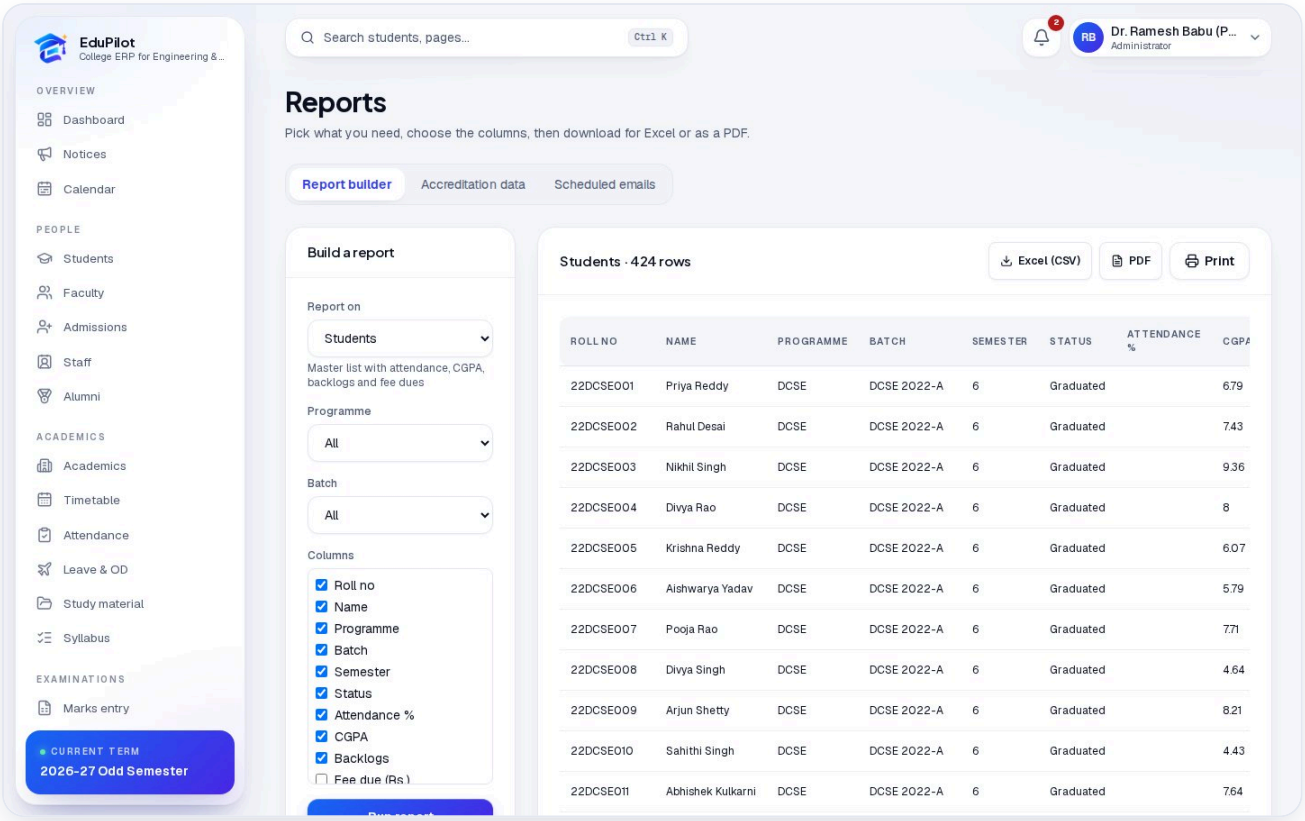

Reports and administration

Getting data out, and keeping the system in order.

- Report builder
- Accreditation data and scheduled reports
- College setup
- Academic rules
- Users and access
- Branding and settings
- System health
- Email outbox and audit log
- My profile

Report builder

Pick a report, choose the columns, download.

WHAT IT DOES

- Seven reports: students, faculty, fee dues, collections, results, placements and alumni.
- Filter by programme and batch, and tick only the columns you need.
- Download for Excel (CSV) or as a PDF, or print.
- HODs get the same reports limited to their department.

WHO USES IT

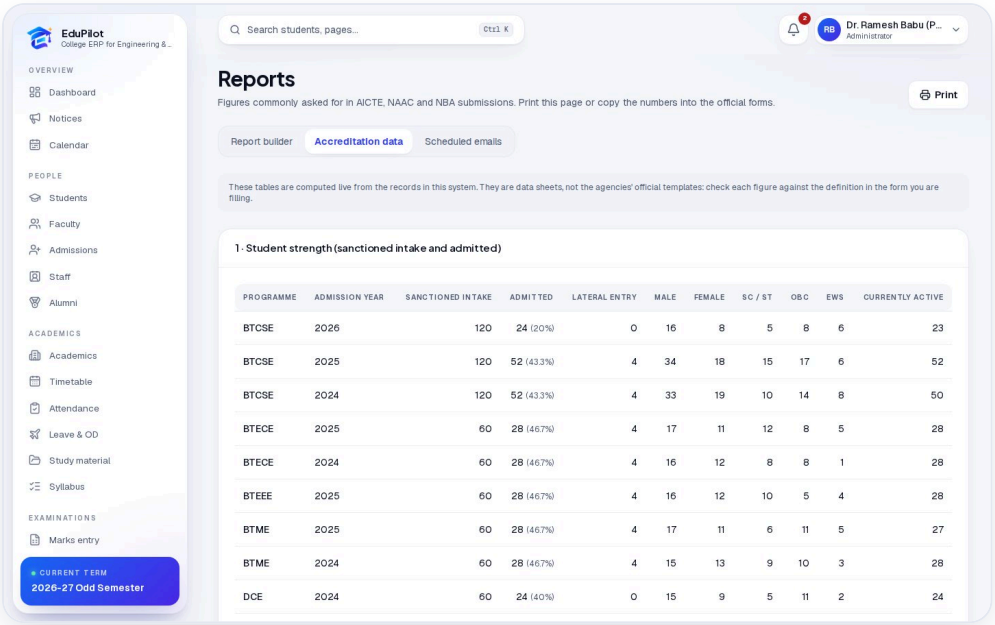

Admin · HOD · Accounts

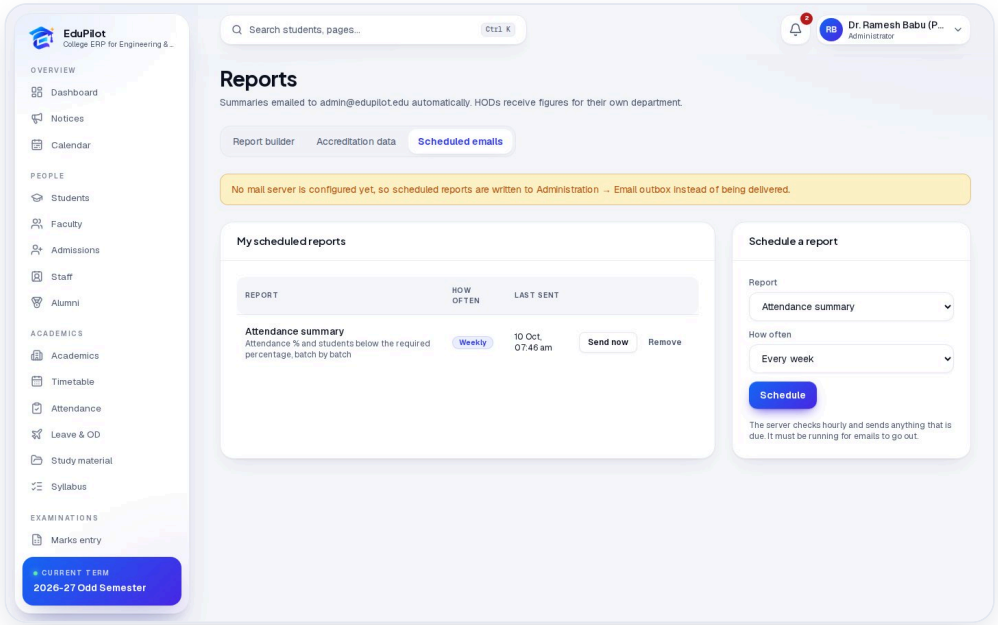

HOW IT WORKS

1. Choose the report
2. Set filters and columns
3. Run
4. Download as CSV or PDF

Accreditation data and scheduled reports

Figures for AICTE, NAAC and NBA files, and summaries that arrive by email.

WHAT IT DOES

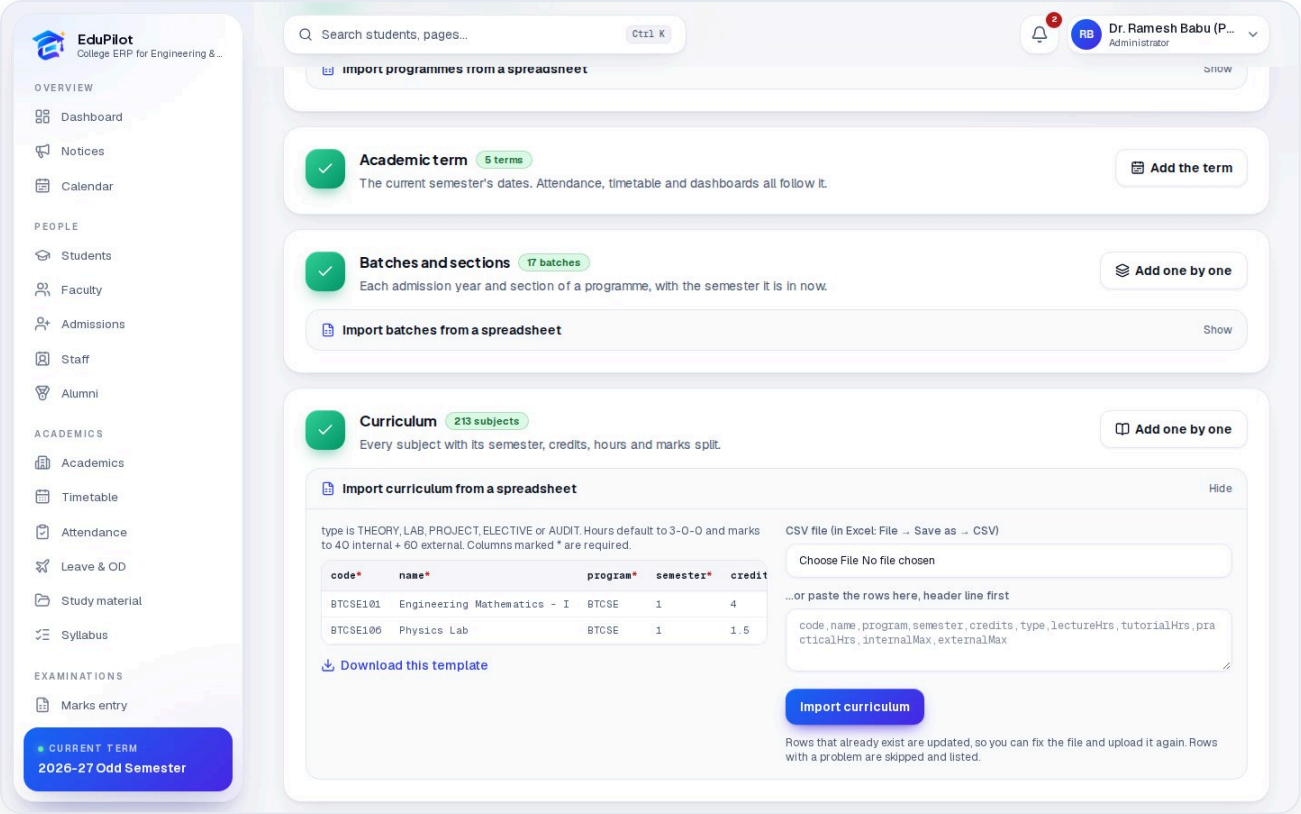

- Student strength by sanctioned intake, faculty cadre and ratios, results, placements and faculty contributions, calculated from live records.
- These are data sheets to copy from. They are not the agencies' official templates.
- Scheduled reports send a weekly or monthly summary of attendance, fee collection or pending approvals by email.

WHO USES IT

Admin HOD

College setup

A guided checklist for bringing a new college onto the system, with spreadsheet import for the bulk steps.

HOW IT WORKS

1. Download the template
2. Fill it in Excel
3. Save as CSV and upload
4. Fix any skipped rows
5. Move to the next step

WHAT IT DOES

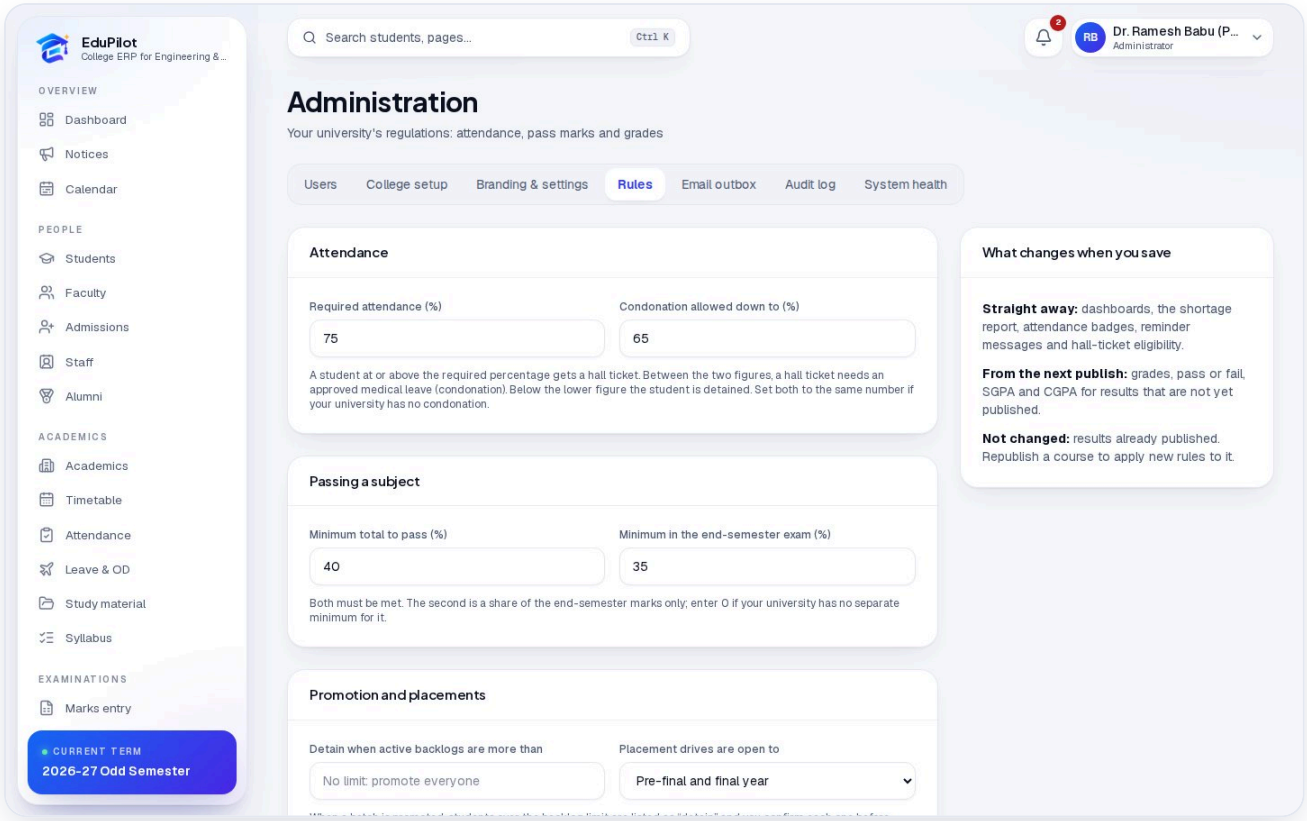

- Nine steps in order: college details, departments, programmes, academic term, batches, curriculum, faculty, fee structures and students.
- Each step shows whether it is done and how many records exist.
- Six steps accept a spreadsheet saved as CSV. A template with the exact columns and example rows can be downloaded for each.
- Rows that already exist are updated, so a corrected file can be uploaded again. Rows with a problem are skipped and listed with the reason.
- Importing faculty or students creates their logins at the same time.

WHO USES IT

Admin

Academic rules

Set your university's regulations yourself. Nothing here needs a programmer.

WHAT IT DOES

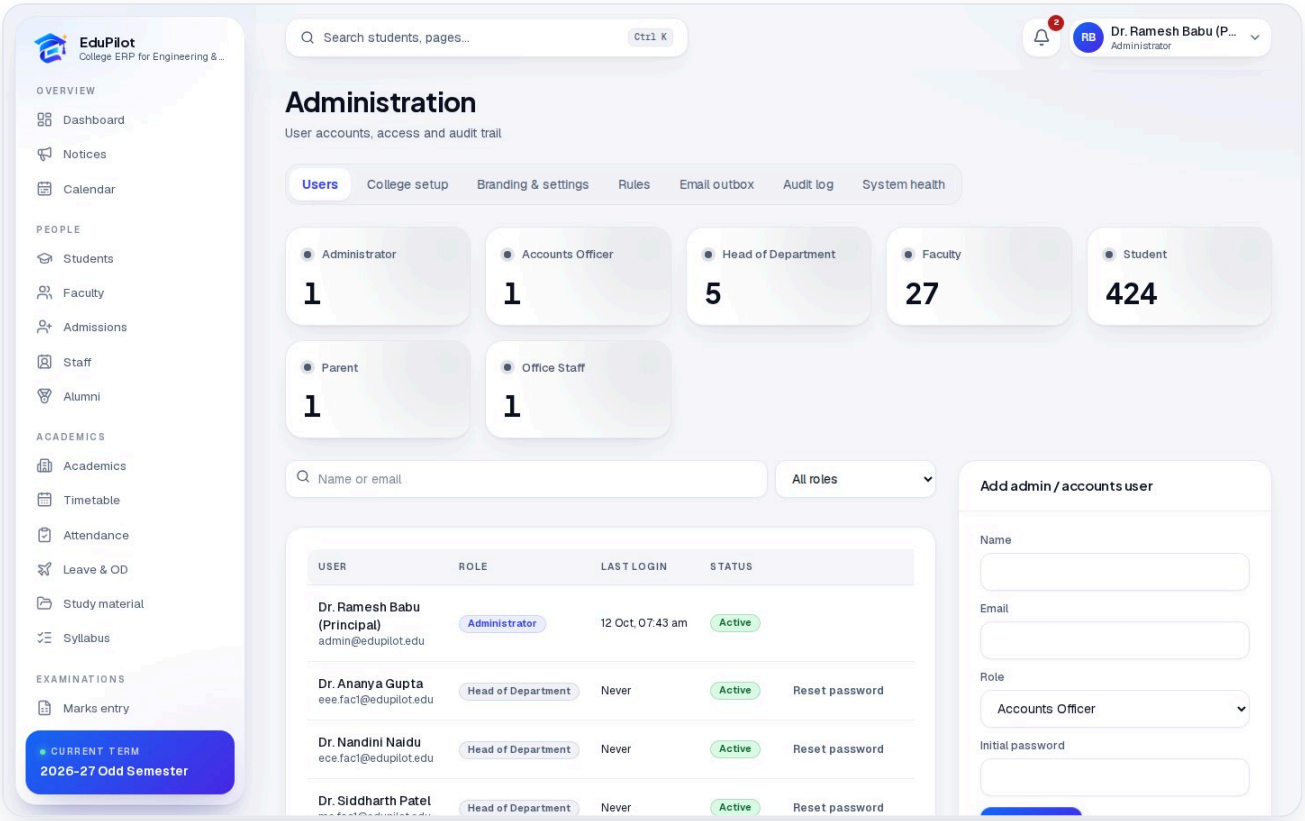

- Attendance: the required percentage and how far below it condonation is allowed.
- Passing a subject: the minimum total, and the minimum in the end-semester exam.
- The grade scale: each grade's letter, the marks it starts at and its grade points.
- Attendance changes apply everywhere at once: dashboards, the shortage report, reminders and hall-ticket eligibility.
- Pass marks and grades apply to results published from then on. Results already published keep their grades.
- Promotion: the backlog limit above which a student is held back. Placements: which years may apply.
- A scale that could not work (for example, a pass mark with no grade to give) is refused with an explanation.

WHO USES IT

Admin

Users and access

Who can sign in, and what they can do.

WHAT IT DOES

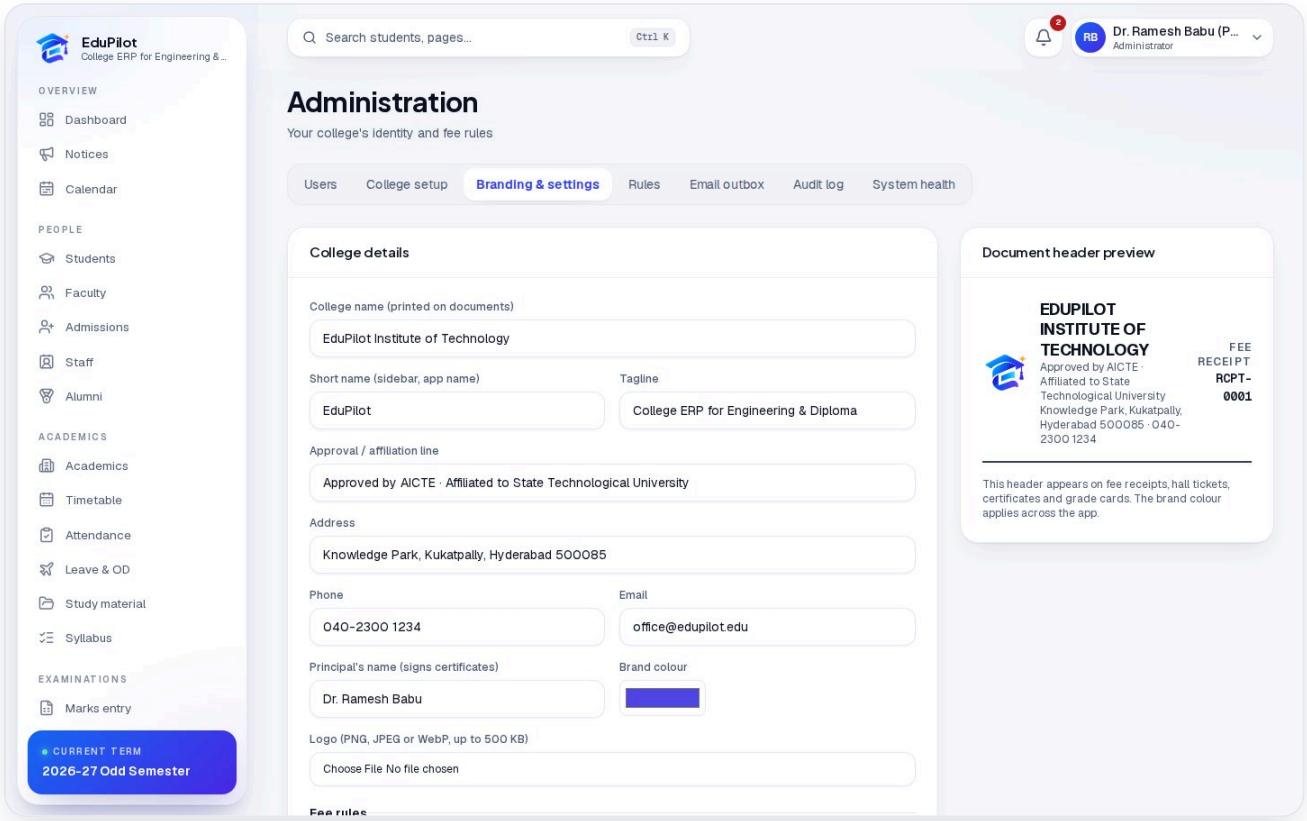

- Every account with its role, last sign-in and status.
- Add administrator, accounts and office-staff users; students and faculty get their logins from their own records.
- See who has two-step sign-in on, and switch it off for someone who has lost access to their mailbox.
- Disable an account to lock that person out immediately.
- Reset a password to a temporary one that must be changed at next sign-in.

WHO USES IT

Admin

Branding and settings

Make it your college's system.

WHAT IT DOES

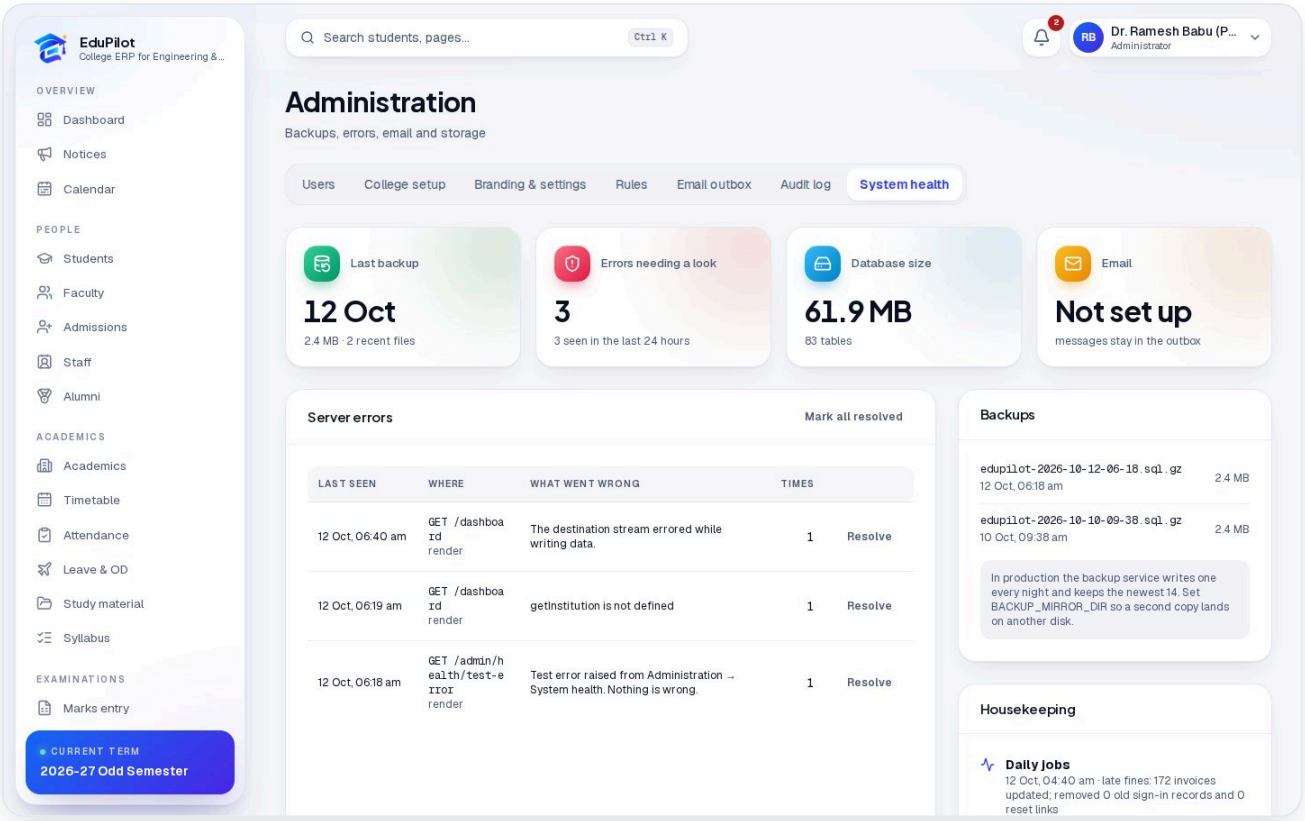

- College name, short name, tagline, approval line, address, phone, email and principal's name.
- Upload the logo and choose the brand colour used across the app.
- A live preview shows the header that appears on receipts, hall tickets, certificates and grade cards.
- Fee rules: late fine per day and its cap.

WHO USES IT

Admin

System health

Is the system being looked after? Backups, errors, email and storage on one page.

WHAT IT DOES

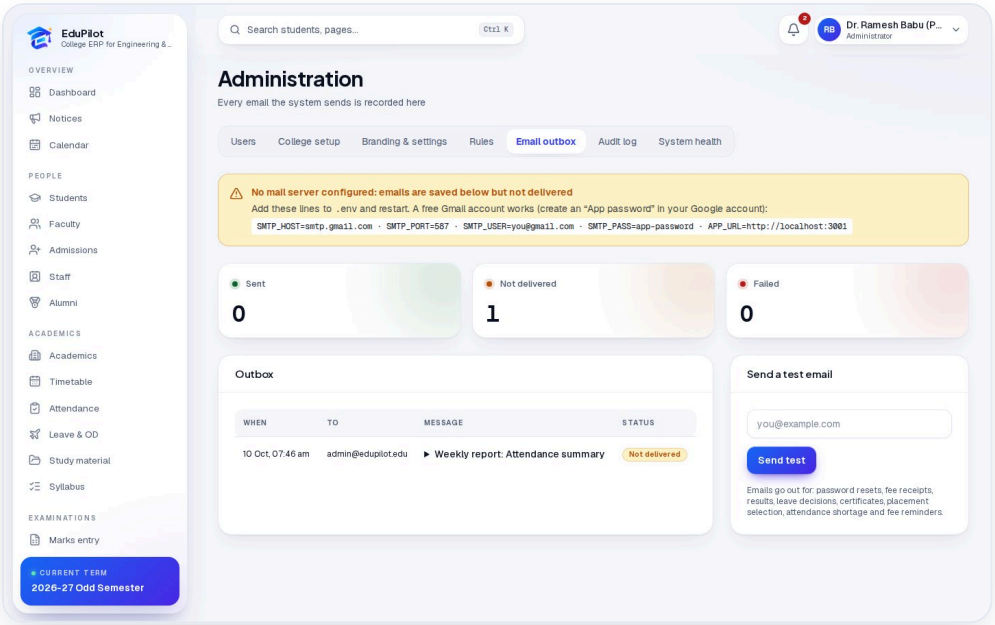

- The date and size of the latest database backup, with a warning when there is none from the last two days.
- Server errors, each listed once with how many times it has happened. Administrators are emailed when a new one appears.
- Database size, whether email is connected, and when the daily housekeeping last ran.
- A year-end archive: every record as one downloadable file.

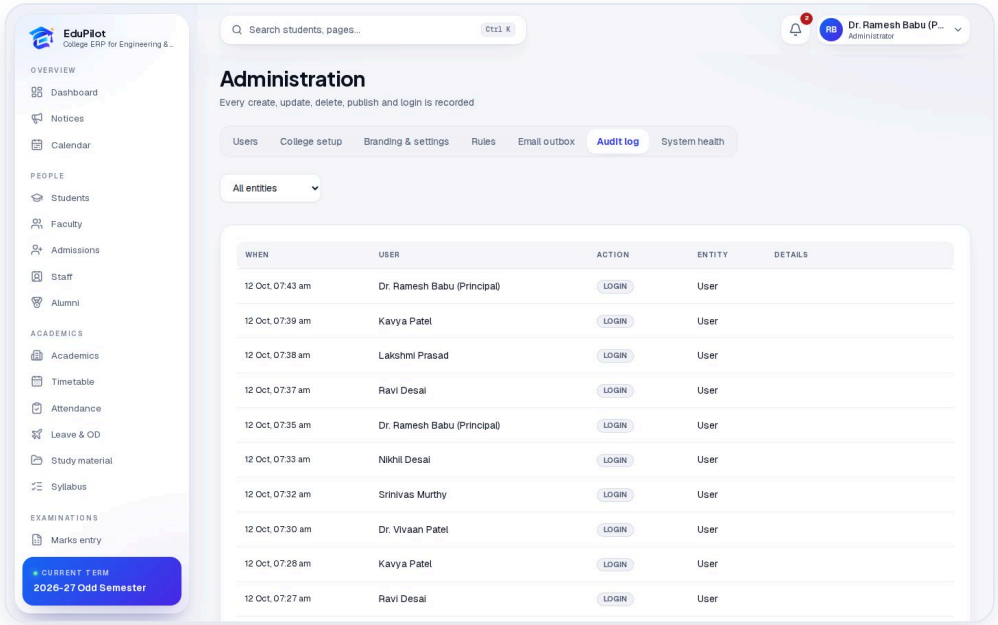

WHO USES IT

Admin

Email outbox and audit log

A record of every message sent and every change made.

WHAT IT DOES

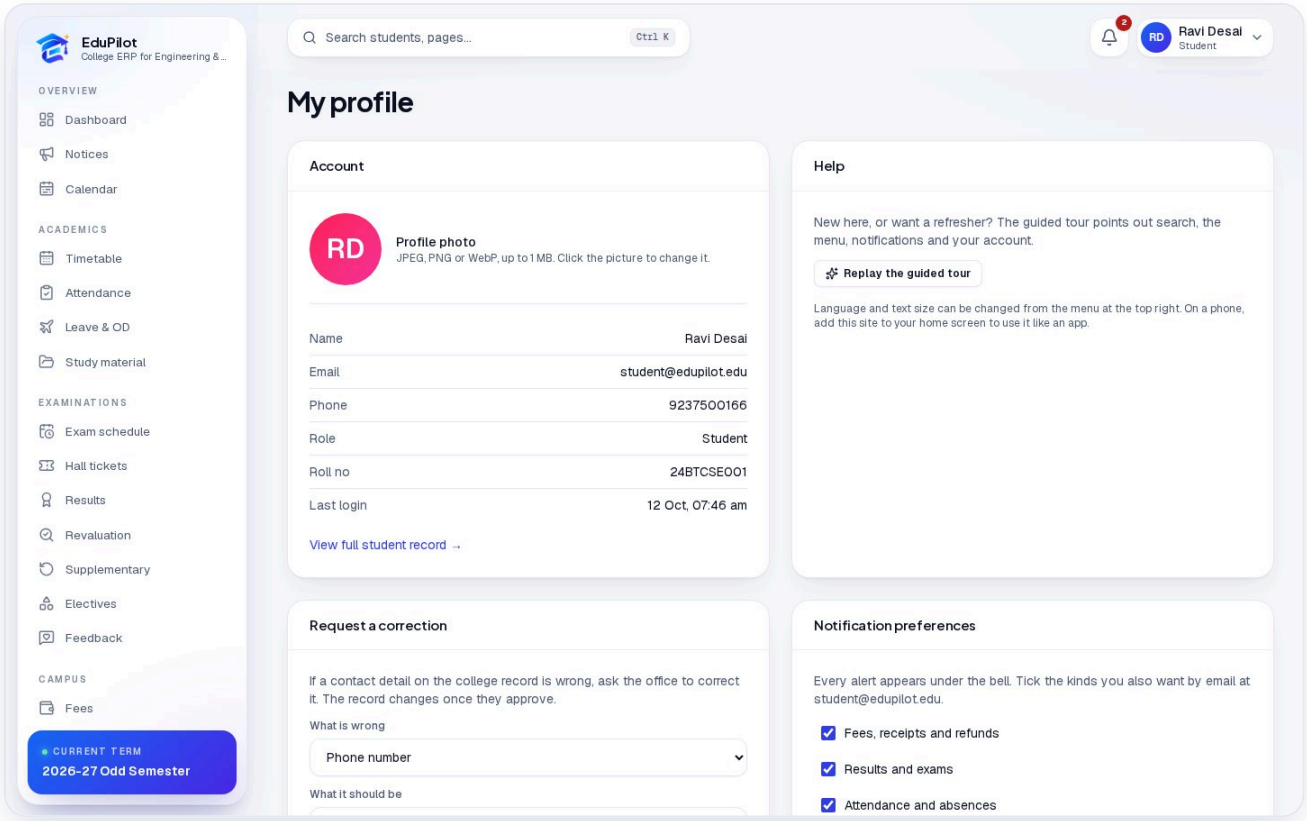

- Emails cover password resets, fee receipts, results, leave decisions, certificates, placement selection and reminders.
- Every email is listed in the outbox with its status. Until a mail server is connected, messages are stored here and not delivered.
- The audit log records every create, update, delete, publish and sign-in, with who did it and when.

WHO USES IT

Admin

My profile

Each person's own account page.

WHAT IT DOES

- Upload a profile photo, used on the ID card and hall ticket.
- Change password. Passwords need at least 8 characters with letters and numbers.
- Changing a password signs out every other device using that account.
- Staff can turn on two-step sign-in here. It is switched on only after a test code reaches their mailbox.
- Notification preferences: choose which kinds of alert are also sent by email.
- Replay the guided tour at any time.

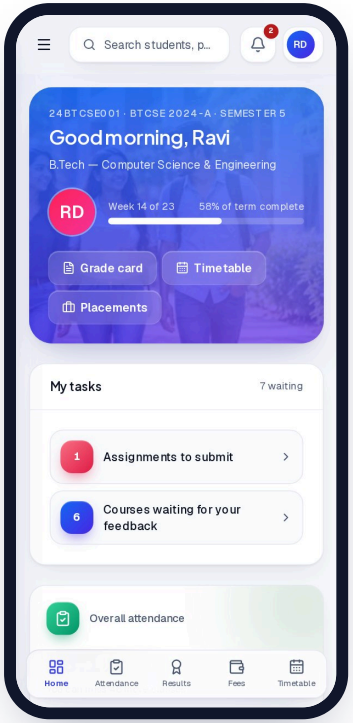

WHO USES IT

Admin · HOD · Faculty · Accounts · Office · Student · Parent

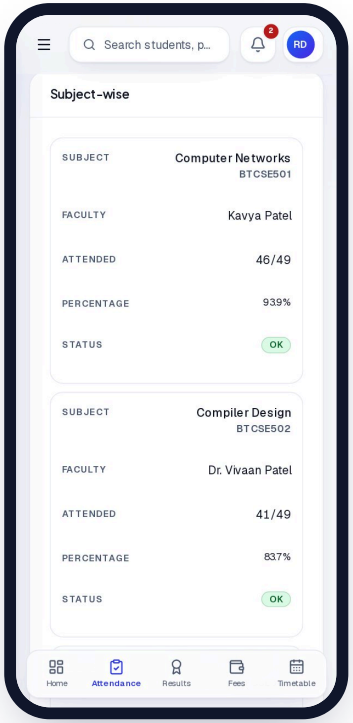

SECTION 10

On a phone

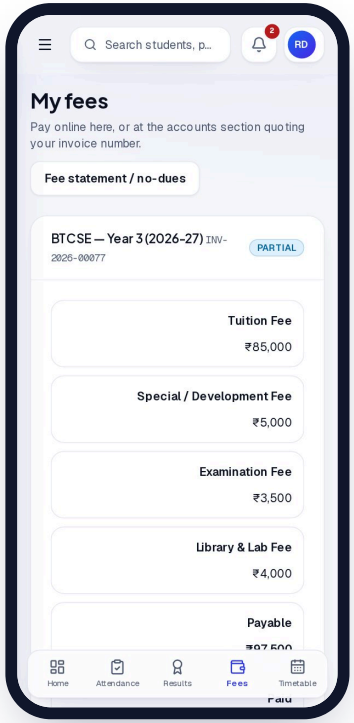

EduPilot runs in the phone's browser. Nothing to install from an app store.

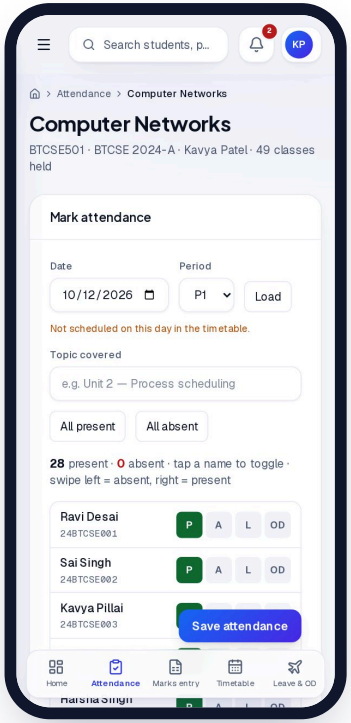

Student dashboard

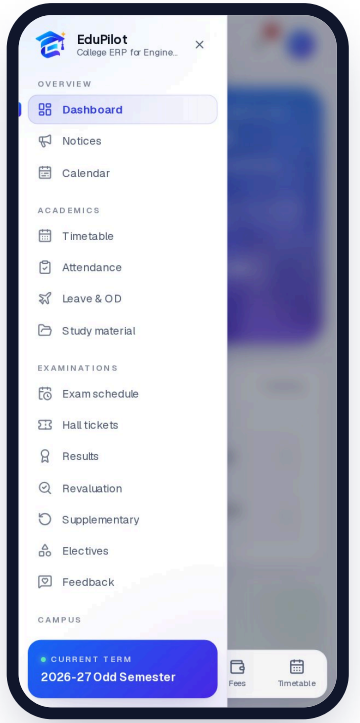

Attendance calendar

Fees and Pay now

Teacher's attendance sheet

Full menu

- A tab bar at the bottom gives students, parents and teachers their five most-used pages.
- Teachers swipe left or right to mark attendance, and can mark without a connection.
- It can be added to the home screen and opened like an app.
- Tables become a list of cards on a phone, with the column heading beside each value.

SECTION 11

End-to-end workflows

How the modules connect across a college year. Each step shows who does it.

- Admission to first day
- A teaching day
- The examination cycle
- The fee cycle
- A placement drive
- A certificate request
- End of semester

WORKFLOW 11.1

Admission to first day

How a prospective student becomes an enrolled one.

1. **Office** — Record the enquiry
   Admissions pipeline
2. **Office** — Follow up and move to Applied
   Follow-up dates and reminders
3. **Office** — Verify documents
   Stage: Documents verified
4. **Office** — Mark Admitted and create the student
   Roll number, batch, admission type
5. **System** — Create the login and the parent login
   Roll number as first password
6. **Accounts** — Generate the fee invoice
   From the fee structure
7. **Student** — Sign in, set a password, pay the fee
   Online or at the counter
8. **System** — Issue receipt and ID card
   PDF and printable card

WORKFLOW 11.2

A teaching day

What happens between the first bell and the last.

1. **Faculty** — Open today's class from the dashboard
   My courses · Today
2. **Faculty** — Mark attendance and the topic covered
   Tap absentees, save
3. **System** — Update each student's percentage
   Dashboards and shortage report
4. **Student** — Apply for leave or on-duty if needed
   Leave & OD
5. **HOD** — Approve leave; assign a substitute
   Attendance corrected automatically
6. **Faculty** — Share notes or set an assignment
   Study material
7. **Student** — Submit the assignment
   Online
8. **Faculty** — Grade, and tick the syllabus topic
   Coverage visible to the HOD

WORKFLOW 11.3

The examination cycle

From internal assessments to the grade card.

1. **Faculty** — **Enter internal marks**
   Mid-terms, assignments, lab
2. **Admin** — **Schedule end-semester papers**
   Clash checks
3. **Admin** — **Add halls and generate seating**
   Alternating papers
4. **System** — **Decide hall-ticket eligibility**
   75% attendance, no overdue fee
5. **Student** — **Download the hall ticket**
   With seat numbers and QR code
6. **Faculty** — **Enter end-semester marks**
   Keyboard or paste from Excel
7. **HOD** — **Publish and lock results**
   Students are notified
8. **Student** — **View grades, SGPA, CGPA; print the grade card**
   Backlogs tracked
9. **Student** — **Register for supplementary if needed**
   Invoice raised automatically

WORKFLOW 11.4

The fee cycle

From demand to receipt.

1. **Accounts** — **Create the fee structure**
   Per programme and year
2. **Accounts** — **Generate invoices for the batch**
   One click
3. **Student** — **See the invoice under My fees**
   With instalments
4. **Student** — **Pay online, or at the counter**
   UPI, card, cash, bank, DD
5. **System** — **Verify, then create the receipt**
   Sequential number, amount in words
6. **System** — **Notify student and parent**
   In-app and email
7. **Accounts** — **Chase overdue invoices**
   Email reminders, late fine
8. **Accounts** — **Credit scholarships when received**
   Balance reduced automatically
9. **Accounts** — **Close the day**
   Cash counted against the books

WORKFLOW 11.5

A placement drive

From announcement to offer letter.

Admin 1
Publish the drive with criteria
CGPA, backlogs, programme

System 2
Work out who is eligible
Pre-final and final year

Student 3
Apply
Only if eligible

Admin 4
Run the interview rounds
Shortlist at each round

Admin 5
Mark the selected students
Status: Selected

System 6
Notify and issue the confirmation letter
Printable

Admin 7
Review placement statistics
Placed, offers, packages

WORKFLOW 11.6

A certificate request

No queue at the office window.

Student 1
Request a certificate and state the purpose
Bonafide, study, conduct, transfer

Office 2
Approve or reject
From My tasks

System 3
Assign the serial number
On the college letterhead

Student 4
Print or download the PDF
Notified when ready

WORKFLOW 11.7

End of semester

Closing one term and opening the next.

HOD 1
Confirm all results are published
Marks locked

Admin 2
Create the next term and mark it current
Academic terms

Admin 3
Promote each batch
Next semester

Admin 4
Graduate final-year batches
Students become alumni

Admin 5
Generate the new term's courses
From the curriculum

HOD 6
Assign teachers and build the timetable
Clash checks

Accounts 7
Generate the new year's invoices
From fee structures

SECTION 12

Security, going live and scope

How the data is protected, what the college needs to provide, and what is deliberately outside this product.

SECURITY AND RELIABILITY

- Every page and every action checks the person's role on the server, so hidden menu items cannot be reached by typing an address.
- HODs are limited to their department, teachers to their courses, students and parents to one student's record.
- Passwords are stored encrypted (hashed). Accounts lock after repeated wrong passwords.
- Two-step sign-in for staff: an emailed one-time code after the password.
- A disabled account is locked out immediately, and changing a password signs out other devices.
- Every change is written to the audit log with the person and the time.
- The database is backed up automatically every night, the newest 14 are kept, and a second copy can go to another disk. Server errors are logged and emailed to the administrator.

WHAT IS NEEDED TO GO LIVE

A server or cloud machine
EduPilot and its MySQL database run in Docker and restart by themselves after a reboot.

A web address with HTTPS
For example erp.yourcollege.edu.

A mail account (optional)
Any SMTP account, including a free Gmail account with an app password. Without it, emails are stored in the outbox and not delivered.

A Razorpay account (optional)
For real online payments. Without it, fees are collected at the counter and the test checkout is used for demonstrations.

Your data
The College setup checklist imports departments, programmes, batches, curriculum, faculty, fee structures and students from spreadsheets.

Your regulations
Attendance thresholds, pass marks and the grade scale start from common practice and are changed by the administrator on the Rules page.

NOT INCLUDED

- SMS and automatic WhatsApp messages (paid services). WhatsApp reminders open the staff member's own WhatsApp with the message written.
- A separate app-store mobile app. The system runs in the phone's browser and can be added to the home screen.
- Official accreditation templates. The accreditation pages provide the figures to copy into them.

TRY IT

> The demonstration college has 424 students, 32 faculty, 5 departments and 8 programmes, with five semesters of history. Sign in as any role with the demo accounts to follow the workflows in this guide.
